Index of Subjects

A_1 receptor
NMDA receptor modulation by adenosine: BUCK AND BICKLER **198**, 1621.
Abdominal posture
control of abdominal posture in crayfish: McCARTHY AND MACMILLAN **198**, 2253.
Accessory flexor tibiae
locust tension receptor: MATHESON AND FIELD **198**, 1673.
Accessory gland
cockroach DUM neurones and colleterial glands: SINAKEVITCH, GEFFARD, PELHATE AND LAPIED **198**, 1539.
Acclimation
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
Acclimatization
muscle contractile properties in sculpin: BEDDOW AND JOHNSTON **198**, 193.
ACEP-1
modulation of snail buccal muscle contraction: YOSHIDA AND KOBAYASHI **198**, 729.
Acetylcholine
neurotransmitters and stridulation in the grasshopper: OCKER, HEDWIG AND ELSNER **198**, 1701.
Acetylcholine receptor
expression of a cloned muscarinic acetylcholine receptor: MILLAR, BAYLIS, REAPER, BUNTING, MASON AND SATTELLE **198**, 1843.
rhythmicity in insect thoracic nerve cord: BÜSCHGES, SCHMITZ AND BÄSSLER **198**, 435.
Achatina fulica
modulation of snail buccal muscle contraction: YOSHIDA AND KOBAYASHI **198**, 729.
Acheta domesticus
biomechanics of the cricket's kick: HUSTERT AND GNATZY **198**, 1275.
cricket femoral chordotonal organ: NOWEL, SHELTON AND STEPHEN **198**, 1977.
Acid
crayfish acid–base and ion status: ELLIS AND MORRIS **198**, 395.
crayfish metabolism: ELLIS AND MORRIS **198**, 409.
Acid secretion
function of heterodimeric β-type ATPases: CHOW AND FORTE **198**, 1.
Acid–base balance
acid–base status in the freshwater crayfish: WHITELY, NAYLOR AND TAYLOR **198**, 567.
ammonia and urea metabolism in an elasmobranch: WOOD, PÄRT AND WRIGHT **198**, 1545.
carbonic anhydrase infusion during hypoxia in fish: LESSARD, VAL, AOTA AND RANDALL **198**, 31.
haemoglobin function in intact lamprey erythrocytes: NIKINMAA, AIRAKSINEN AND VIRRKI **198**, 2423.
nitrogen excretion: WRIGHT **198**, 273.
Acid–base regulation
control of discontinuous ventilation in a grasshopper: HARRISON, HADLEY AND QUINLAN **198**, 1755.
crayfish acid–base and ion status: ELLIS AND MORRIS **198**, 395.
Acoustic startle response
acoustic startle in scarab beetles: FORREST, FARRIS AND HOY **198**, 2593.
Acoustics
bioacoustics of a miniature cricket: DAMBACH AND GRAS **198**, 721.
Acridine Orange
H^+-ATPase in crab gills: ONKEN AND PÜTZENLECHNER **198**, 767.
Actinia equina
L-Dopa in sea anemones: HUDMAN AND McFARLANE **198**, 1045.
Actin–myosin sliding
algal cell actin–myosin sliding: CHAEN, INOUE AND SUGI **198**, 1021.
Action potential
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
thermal adaptation of plaice cardiac pacemaker: HARPER, NEWTON AND WATT **198**, 137.
Active K^+ transport
midgut compartmental analysis in *Manduca sexta*: KOCH AND MOFFETT **198**, 2115.
patency of goblet valves in insect midgut: MOFFETT, KOCH AND WOODS **198**, 2103.
Adaptation
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
locust first ocellar synapse: SIMMONS **198**, 537.
malate dehydrogenases of barracudas: LIN AND SOMERO **198**, 551.
thermal adaptation of plaice cardiac pacemaker: HARPER, NEWTON AND WATT **198**, 137.
Adenylate kinase
adjustment of K' to varying pH and pMg: GOLDING, TEAGUE AND DOBSON **198**, 1775.
Adenylates
adenylate compartmentation in polychaete coelomic cells: HOEGER, DUNN AND MÄRKER **198**, 2079.
ADP
adenylate compartmentation in polychaete coelomic cells: HOEGER, DUNN AND MÄRKER **198**, 2079.
Adrenaline
trout blood viscosity: SØRENSEN AND WEBER **198**, 953.
Aedes aegypti
dynamics of neurochemical action in *Aedes aegypti*: MESSER AND BROWN **198**, 2325.
serotonin in mosquito salivary glands: NOVAK, RIBEIRO AND HILDEBRAND **198**, 167.
***Aedes* Head Peptide I**
dynamics of neurochemical action in *Aedes aegypti*: MESSER AND BROWN **198**, 2325.
Aerial respiration
buoyancy of gobies in hypoxia: GEE AND GEE **198**, 79.
Aerobic dive limit
cardiac response to diving in muskrats: SIGNORE AND JONES **198**, 2307.
Aerodynamic valving
expiratory valving in the avian lung: BROWN, KOVACS, BUTLER, WANG, LEHR AND BANZETT **198**, 2349.
Aerodynamics
extraordinary flight performance of orchid bees: DUDLEY **198**, 1065.
Aggression
octopamine and 'fight or flight' behaviour in a cricket: ADAMO, LINN AND HOY **198**, 1691.
Aglantha digitale
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
Agnatha
haemoglobin function in intact lamprey erythrocytes: NIKINMAA, AIRAKSINEN AND VIRRKI **198**, 2423.
natriuretic peptide receptors in hagfish gills: TOOP, DONALD AND EVANS **198**, 117.
natriuretic peptide receptors in hagfish kidney and aortae: TOOP, DONALD AND EVANS **198**, 1875.
oxygen affinity of lamprey erythrocytes: AIRAKSINEN AND NIKINMAA **198**, 2393.

Agonistic behaviour
octopamine and 'fight or flight' behaviour in a cricket: ADAMO, LINN AND HOY **198**, 1691.
Air-breathing fish
synbranchid sinus arrhythmia: GRAHAM, LAI, CHILLER AND ROBERTS **198**, 1455.
Airflow distribution
expiratory valving in the avian lung: BROWN, KOVACS, BUTLER, WANG, LEHR AND BANZETT **198**, 2349.
Alanine
metabolite transport in eel erythrocytes: SOENGAS AND MOON **198**, 877.
Alga
algal cell actin–myosin sliding: CHAEN, INOUE AND SUGI **198**, 1021.
Alkali
crayfish acid–base and ion status: ELLIS AND MORRIS **198**, 395.
crayfish metabolism: ELLIS AND MORRIS **198**, 409.
Alkali cation
a novel proline, glycine: K^+ symporter: BADER, PARTHASARATHY AND HARVEY **198**, 2599.
Allelic variation
allelic variation in fish myosin light chains: CROCKFORD, JOHNSTON AND McANDREW **198**, 2501.
Allometry
elephant energetics: LANGMAN, ROBERTS, BLACK, MALOIY, HEGLUND, WEBER, KRAM AND TAYLOR **198**, 629.
motor pattern allometry in *Micropterus salmoides*: WAINWRIGHT AND RICHARD **198**, 1161.
Ambystoma tigrinum
sunfish capture and transport behaviour: GILLIS AND LAUDER **198**, 709.
American eel
metabolite transport in eel erythrocytes: SOENGAS AND MOON **198**, 877.
Amiloride
ion transport by echinoderm gastrointestinal epithelium: ZHUANG, DUERR AND AHEARN **198**, 1207.
Amino acid
feeding and nitrogen excretion in toadfish: WALSH AND MILLIGAN **198**, 1559.
Amino acid sequence
exotic collagen gradients in the mussel: QIN AND WAITE **198**, 633.
Amino acid transport
basolateral taurine transport in *Mytilus* gill: NEUFELD AND WRIGHT **198**, 465.
K^+ and amino acid transport in carp red blood cells: JENSEN **198**, 155.
Aminoisobutyric acid
a novel proline, glycine: K^+ symporter: BADER, PARTHASARATHY AND HARVEY **198**, 2599.
3-Aminopropylphosphonous acid
insect $GABA_B$ receptor: BAI AND SATTELLE **198**, 889.
Ammonia
ammonia and urea metabolism in an elasmobranch: WOOD, PÄRT AND WRIGHT **198**, 1545.
copper and ammonia levels and swimming in trout: BEAUMONT, BUTLER AND TAYLOR **198**, 2213.
cortisol and nitrogen metabolism in toadfish: HOPKINS, WOOD AND WALSH **198**, 2229.
induction of urea cycle enzymes in larval trout: WRIGHT, FELSKIE AND ANDERSON **198**, 127.
nitrogen excretion: WRIGHT **198**, 273.
pulsatile urea excretion in toadfish: WOOD, HOPKINS, HOGSTRAND AND WALSH **198**, 1729.
AMP
adenylate compartmentation in polychaete coelomic cells: HOEGER, DUNN AND MÄRKER **198**, 2079.
recovery of ubiquitination in *Artemia franciscana*: ANCHORDOGUY AND HAND **198**, 1299.
Amphibian
Ca^{2+} exchange in frog skin: STIFFLER **198**, 967.
effects of sudden spinal cord cooling in frogs: DALÓ, HACKMAN, STOREY AND DAVIDOFF **198**, 1765.
ontogenetic stereotypy in salamander feeding: REILLY **198**, 701.
Anas platyrhynchos
hydroplaning by ducklings: AIGELDINGER AND FISH **198**, 1567.
Anaspides tasmaniae
serotonin immunoreactivity in a primitive crustacean: HARRISON, MACMILLAN AND YOUNG **198**, 531.
Anax junius
dragonfly flight behaviour and heat production: MAY **198**, 2385.
temperature regulation in a dragonfly: MAY **198**, 2373.
Anemotaxis
orientation to air current by walking beetles: BÖHM **198**, 1995.
Anguilla rostrata
metabolite transport in eel erythrocytes: SOENGAS AND MOON **198**, 877.
Anion exchange
Cl^- transport in fish red blood cells: JENSEN AND BRAHM **198**, 2237.
Anisoptera
dragonfly flight behaviour and heat production: MAY **198**, 2385.
temperature regulation in a dragonfly: MAY **198**, 2373.
Anoxia
energy status in anoxic fish brain: JOHANSSON AND NILSSON **198**, 2575.
microcalorimetry on crucian carp brain: JOHANSSON, NILSSON AND TÖRNBLOM **198**, 853.
recovery of ubiquitination in *Artemia franciscana*: ANCHORDOGUY AND HAND **198**, 1299.
Ant
comparative gas exchange in *Messor*: LIGHTON AND BERRIGAN **198**, 521.
hypoxic ant ventilation: LIGHTON AND GARRIGAN **198**, 1613.
optical scaling in ants: ZOLLIKOFER, WEHNER AND FUKUSHI **198**, 1637.
Antarctic fish
Na^+/K^+-ATPase in antarctic fish: GONZALEZ-CABRERA, DOWD, PEDIBHOTLA, ROSARIO, STANLEY-SAMUELSON AND PETZEL **198**, 2279.
Antarctic nematode
intracellular freezing in a nematode: WHARTON AND FERNS **198**, 1381.
Antennal lobe
effects of 5-HT on antennal-lobe neurones: MERCER, HAYASHI AND HILDEBRAND **198**, 613.
5-HT neuromodulation in moth antennal lobe: KLOPPENBURG AND HILDEBRAND **198**, 603.
NO synthesis in locust olfactory interneurones: ELPHICK, RAYNE, RIVEROS-MORENO, MONCADA AND O'SHEA **198**, 821.
Anterior pagoda neurone
remodelling of an intact neurone in the leech: CALABRESE AND PELLEGRINO **198**, 1989.
Antiport
ion transport by echinoderm gastrointestinal epithelium: ZHUANG, DUERR AND AHEARN **198**, 1207.
Anuran
metabolism during dehydration in leopard frogs: CHURCHILL AND STOREY **198**, 147.
Aorta
structure and physical properties of invertebrate arteries: DAVISON, WRIGHT AND DEMONT **198**, 2185.
Aphthona atrocaerulea
visual targeting in flea-beetles: BRACKENBURY AND WANG **198**, 1931.
Apis mellifera
stinging response of the honeybee: OGAWA, KAWAKAMI AND YAMAGUCHI **198**, 39.

Aplysia brasiliana
Na^+ and Ca^{2+} currents in *Aplysia californica*: FIEBER **198**, 2337.
Aplysia californica
Na^+ and Ca^{2+} currents in *Aplysia californica*: FIEBER **198**, 2337.
recovery of function by sensory neurones in *Aplysia californica*: DULIN, STEFFENSEN, MORRIS AND WALTERS **198**, 2055.
regeneration and sprouting of sensory neurones: STEFFENSEN, DULIN, WALTERS AND MORRIS **198**, 2067.
Apnoea
parasympathetic influence in hibernation: HARRIS AND MILSOM **198**, 931.
Apodemus sylvaticus
daily variations in response to noradrenaline: HAIM, McDEVITT AND SPEAKMAN **198**, 561.
Apyrase
serotonin in mosquito salivary glands: NOVAK, RIBEIRO AND HILDEBRAND **198**, 167.
Arachnida
spider excretion: BUTT AND TAYLOR **198**, 1137.
Arousal
octopamine and 'fight or flight' behaviour in a cricket: ADAMO, LINN AND HOY **198**, 1691.
Artemia franciscana
recovery of ubiquitination in *Artemia franciscana*: ANCHORDOGUY AND HAND **198**, 1299.
Artery
structure and physical properties of invertebrate arteries: DAVISON, WRIGHT AND DEMONT **198**, 2185.
Arthropod
centipede locomotion: ANDERSON, SHULTZ AND JAYNE **198**, 1185.
computer model of the insect leg: FULL AND AHN **198**, 1285.
insect leg function: FULL, YAMAUCHI AND JINDRICH **198**, 2441.
Asterias rubens
SALMFamide neuropeptides in starfish: ELPHICK, NEWMAN AND THORNDYKE **198**, 2519.
Asterina miniata
energy use by developing marine animals: HOEGH-GULDBERG AND MANAHAN **198**, 19.
Asymmetry
flatfish prey capture: GIBB **198**, 1173.
Atlantic cod
enteric reflexes and nitric oxide in fish intestine: KARILA AND HOLMGREN **198**, 2405.
enzyme activity in fish growth studies: PELLETIER, BLIER, DUTIL AND GUDERLEY **198**, 1493.
ATP
hypoxia and organic phosphates in rainbow trout: VAL, LESSARD AND RANDALL **198**, 305.
recovery of ubiquitination in *Artemia franciscana*: ANCHORDOGUY AND HAND **198**, 1299.
ATP hydrolysis
adjustment of K' to varying pH and pMg: GOLDING, TEAGUE AND DOBSON **198**, 1775.
Atropine
cardiac response to diving in muskrats: SIGNORE AND JONES **198**, 2307.
Attachment
functional morphology of pigeon feathers: ENNOS, HICKSON AND ROBERTS **198**, 1219.
Audition
sound transformation at the mouse pinna: CHEN, CAIN AND JEN **198**, 2007.
Auditory information processing
ventilation and hearing in the locust: MEYER AND HEDWIG **198**, 1327.
Auriparus flaviceps
variation in the respiratory quotient of birds: WALSBERG AND WOLF **198**, 213.
Austropotamobius pallipes
acid–base status in the freshwater crayfish: WHITELY, NAYLOR AND TAYLOR **198**, 567.
Autoregulation
modulation of a sensory neurone in the leech: WENNING AND CALABRESE **198**, 1405.
Auxotonic condition
microtubule–kinesin sliding *in vitro*: SHIRAKAWA, OIWA, CHAEN, SHIMIZU, TANAKA AND SUGI **198**, 1809.
Avian lung
expiratory valving in the avian lung: BROWN, KOVACS, BUTLER, WANG, LEHR AND BANZETT **198**, 2349.
Axonal retraction
electrical activity and neurite outgrowth: NEELY AND NICHOLLS **198**, 1433.
Axotomy
recovery of function by sensory neurones in *Aplysia californica*: DULIN, STEFFENSEN, MORRIS AND WALTERS **198**, 2055.
regeneration and sprouting of sensory neurones: STEFFENSEN, DULIN, WALTERS AND MORRIS **198**, 2067.

Bacillus thuringiensis
Bacillus thuringiensis toxin and receptor in planar lipid bilayer: MARTIN AND WOLFERSBERGER **198**, 91.
Bafilomycin A_1
effects of bafilomycinon A_1 sheep macrophage pH: HEMING, TRABER, HINDER AND BIDANI **198**, 1711.
H^+-ATPase in crab gills: ONKEN AND PÜTZENLECHNER **198**, 767.
Bag cell
Na^+ and Ca^{2+} currents in *Aplysia californica*: FIEBER **198**, 2337.
Balanus amphitrite amphitrite
cyclic AMP and barnacle settlement: CLARE, THOMAS AND RITTSCHOF **198**, 655.
Ballistic movement
biomechanics of the cricket's kick: HUSTERT AND GNATZY **198**, 1275.
Band 3
Cl^- transport in fish red blood cells: JENSEN AND BRAHM **198**, 2237.
Barnacle
cyclic AMP and barnacle settlement: CLARE, THOMAS AND RITTSCHOF **198**, 655.
Barracuda
malate dehydrogenases of barracudas: LIN AND SOMERO **198**, 551.
Basal body
motility of the distal flagellum of spermatozoa: WOOLLEY AND BOZKURT **198**, 1469.
Basolateral membrane
membrane-specific responses to temperature in rainbow trout: CROCKETT AND HAZEL **198**, 1105.
Bat
bat echolocation call structure: WATERS AND JONES **198**, 475.
flight speeds and energetics of foraging bats: DE LA CUEVA SALCEDO, FENTON, HICKEY AND BLAKE **198**, 2245.
moment of inertia of bird wings: VAN DEN BERG AND RAYNER **198**, 1655.
respiration and vocalization in bats: LANCASTER, HENSON AND KEATING **198**, 175.
Beat analysis
electrosensory thresholds in *Eigenmannia*: KAUNZINGER AND KRAMER **198**, 2365.
Beat frequency
microtubule sliding in beating flagella: SHINGYOJI, YOSHIMURA, ESHEL, AKAHASHI AND GIBBONS **198**, 645.
Bedbug
Cimex lectularius nitrophorin: VALENZUELA, WALKER AND RIBEIRO **198**, 1519.
Bee
extraordinary flight performance of orchid bees: DUDLEY **198**, 1065.

Beetle
acoustic startle in scarab beetles: FORREST, FARRIS AND HOY **198**, 2593.
Behaviour
acoustic startle in scarab beetles: FORREST, FARRIS AND HOY **198**, 2593.
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
development of locust kicking: NORMAN **198**, 1341.
feeding kinematics of phyllomedusine treefrogs: GRAY AND NISHIKAWA **198**, 457.
flatfish prey capture: GIBB **198**, 1173.
initiation of locomotion by photoreceptors in the lamprey: DELIAGINA, ULLÉN, GONZALEZ, EHRSSON, ORLOVSKY AND GRILLNER **198**, 2581.
ontogenetic stereotypy in salamander feeding: REILLY **198**, 701.
scaling of feeding kinematics: RICHARD AND WAINWRIGHT **198**, 419.
sunfish capture and transport behaviour: GILLIS AND LAUDER **198**, 709.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
Behavioural response
behavioural response to 17α,20β-P: BJERSELIUS, OLSÉN AND ZHENG **198**, 747.
Behavioural state
octopamine and 'fight or flight' behaviour in a cricket: ADAMO, LINN AND HOY **198**, 1691.
Bimolecular lipid membrane
Bacillus thuringiensis toxin and receptor in planar lipid bilayer: MARTIN AND WOLFERSBERGER **198**, 91.
Bioenergetics
adjustment of K' to varying pH and pMg: GOLDING, TEAGUE AND DOBSON **198**, 1775.
Biogeography
malate dehydrogenases of barracudas: LIN AND SOMERO **198**, 551.
Biomechanics
biomechanics of the cricket's kick: HUSTERT AND GNATZY **198**, 1275.
the stiffening response of holothurian dermis: TROTTER AND KOOB **198**, 1951.
Bird
expiratory valving in the avian lung: BROWN, KOVACS, BUTLER, WANG, LEHR AND BANZETT **198**, 2349.
homing in Cory's shearwater: DALL'ANTONIA, DALL'ANTONIA, BENVENUTI, IOALÈ, MASSA AND BONADONNA **198**, 359.
longitudinal variation in bone mechanics: BONSER **198**, 209.
moment of inertia of bird wings: VAN DEN BERG AND RAYNER **198**, 1655.
oxygen consumption in birds during flight: BISHOP AND BUTLER **198**, 2153.
particle-based magnetoreceptor in the bobolink: BEASON, DUSSOURD AND DEUTSCHLANDER **198**, 141.
the Young's modulus of feather keratin: BONSER AND PURSLOW **198**, 1029.
variation in the respiratory quotient of birds: WALSBERG AND WOLF **198**, 213.
Bird flight
wing tip slots and drag in a gliding hawk: TUCKER **198**, 775.
Blaberus discoidalis
insect leg function: FULL, YAMAUCHI AND JINDRICH **198**, 2441.
Blister beetle
fuels for flight in blister beetle: AUERSWALD AND GÄDE **198**, 1423.
Blood chemistry
feeding response of pythons: SECOR AND DIAMOND **198**, 1313.
Blood meal
hormonal activation of *Rhodnius* brain by feeding: MULYE AND DAVEY **198**, 1087.
Blood oxygen-carrying capacity
control of ventilation in *Bufo paracnemis*: BRANCO AND GLASS **198**, 1417.
Blood pressure
control of ventilation in *Bufo paracnemis*: BRANCO AND GLASS **198**, 1417.
Blood rheology
erythrocyte deformation in fish gills: NILSSON, LÖFMAN AND BLOCK **198**, 1151.
Blowfly
thermotolerance and mitochondrial function in the blowfly: EL-WADAWI AND BOWLER **198**, 2413.
Bobolink
particle-based magnetoreceptor in the bobolink: BEASON, DUSSOURD AND DEUTSCHLANDER **198**, 141.
Bode plot
orientation to air current by walking beetles: BÖHM **198**, 1995.
Body design
thermal adaptation in moth muscle: MARDEN **198**, 2087.
Body size
optical scaling in ants: ZOLLIKOFER, WEHNER AND FUKUSHI **198**, 1637.
Body temperature
dragonfly flight behaviour and heat production: MAY **198**, 2385.
temperature regulation in a dragonfly: MAY **198**, 2373.
Bohr effect
haemoglobin function in intact lamprey erythrocytes: NIKINMAA, AIRAKSINEN AND VIRRKI **198**, 2423.
Bottlenose dolphin
temperature regulation of dolphin testes: PABST, ROMMEL, McLELLAN, WILLIAMS AND ROWLES **198**, 221.
Bound
development of synchronous stepping: BLUMBERG-FELDMAN AND EILAM **198**, 363.
Bradycardia
cardiac response to diving in muskrats: SIGNORE AND JONES **198**, 2307.
parasympathetic influence in hibernation: HARRIS AND MILSOM **198**, 931.
performance of a perfused crocodile heart: AXELSSON AND FRANKLIN **198**, 2509.
synbranchid sinus arrhythmia: GRAHAM, LAI, CHILLER AND ROBERTS **198**, 1455.
Brain slices
microcalorimetry on crucian carp brain: JOHANSSON, NILSSON AND TÖRNBLOM **198**, 853.
Brainstem
initiation of locomotion by photoreceptors in the lamprey: DELIAGINA, ULLÉN, GONZALEZ, EHRSSON, ORLOVSKY AND GRILLNER **198**, 2581.
Brine shrimp
recovery of ubiquitination in *Artemia franciscana*: ANCHORDOGUY AND HAND **198**, 1299.
Brown adipose tissue
daily variations in response to noradrenaline: HAIM, McDEVITT AND SPEAKMAN **198**, 561.
Brown trout
copper and ammonia levels and swimming in trout: BEAUMONT, BUTLER AND TAYLOR **198**, 2213.
effects of thiocyanate on brown trout gills: MORGAN AND POTTS **198**, 1229.
Brush border
membrane-specific responses to temperature in rainbow trout: CROCKETT AND HAZEL **198**, 1105.
Brush-border membrane
ion transport by echinoderm gastrointestinal epithelium: ZHUANG, DUERR AND AHEARN **198**, 1207.
Bufo marinus
effects of sudden spinal cord cooling in frogs: DALÓ, HACKMAN, STOREY AND DAVIDOFF **198**, 1765.
Bufo paracnemis
control of ventilation in *Bufo paracnemis*: BRANCO AND GLASS **198**, 1417.

Buoyancy
buoyancy of gobies in hypoxia: GEE AND GEE **198**, 79.
nitrogen excretion: WRIGHT **198**, 273.
Byssus
exotic collagen gradients in the mussel: QIN AND WAITE **198**, 633.

C-start
acclimation of burst escape performance in fish: JOHNSON AND BENNETT **198**, 2165.
Ca^{2+}
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
Ca^{2+} current
Na^+ and Ca^{2+} currents in *Aplysia californica*: FIEBER **198**, 2337.
Ca^{2+} gradient
electromotor coupling of cilia in *Didinium nasutum*: PERNBERG AND MACHEMER **198**, 2537.
Cage size
cage size and flight speed in the tobacco hawkmoth: STEVENSON, CORBO, BACA AND QUANG **198**, 1665.
Caged ATP
motility of the distal flagellum of spermatozoa: WOOLLEY AND BOZKURT **198**, 1469.
Calcium
electrical activity and neurite outgrowth: NEELY AND NICHOLLS **198**, 1433.
ion transport by echinoderm gastrointestinal epithelium: ZHUANG, DUERR AND AHEARN **198**, 1207.
NMDA receptor modulation by adenosine: BUCK AND BICKLER **198**, 1621.
Calcium imaging
expression of a cloned muscarinic acetylcholine receptor: MILLAR, BAYLIS, REAPER, BUNTING, MASON AND SATTELLE **198**, 1843.
Calcium regulation
the stiffening response of holothurian dermis: TROTTER AND KOOB **198**, 1951.
Calcium transpo
Ca^{2+} exchange in frog skin: STIFFLER **198**, 967.
calcium pumps in the teleost kidney: BIJVELDS, VAN DER HEIJDEN, FLIK, VERBOST, KOLAR AND WENDELAAR BONGA **198**, 1351.
fluid reabsorption by *Drosphila* Malpighian tubules: O'DONNELL AND MADDRELL **198**, 1647.
Call mechanics
calling and locomotor frog muscles: McLISTER, STEVENS AND BOGART **198**, 1527.
Call structure
bat echolocation call structure: WATERS AND JONES **198**, 475.
Calliactis parasitica
L-Dopa in sea anemones: HUDMAN AND McFARLANE **198**, 1045.
nerve nets in sea anemones: CHO AND McFARLANE **198**, 817.
Calliphora vicina
thermotolerance and mitochondrial function in the blowfly: EL-WADAWI AND BOWLER **198**, 2413.
Calliphora vomitoria
callitachykinins in blowfly: NÄSSEL, KIM AND LUNDQUIST **198**, 2527.
***Calliptamus* sp.**
oviductal motor neurones: KALOGIANNI AND THEOPHILIDIS **198**, 507.
Calonectris diomedea
homing in Cory's shearwater, bird: DALL'ANTONIA, DALL'ANTONIA, BENVENUTI, IOALÈ, MASSA AND BONADONNA **198**, 359.
Calorimetry
microcalorimetry on crucian carp brain: JOHANSSON, NILSSON AND TÖRNBLOM **198**, 853.
variation in the respiratory quotient of birds: WALSBERG AND WOLF **198**, 213.
Camponotus vicinus
hypoxic ant ventilation. LIGHTON AND GARRIGAN **198**, 1613.
Cancer borealis
distribution of cholecystokinin-like peptides in stomatogastric ganglion: CHRISTIE, BALDWIN, TURRIGIANO, GRAUBARD AND MARDER **198**, 263.
neurohormones in the crab *Cancer borealis*: CHRISTIE, SKIEBE AND MARDER **198**, 2431.
Cancer magister
crustacean cardioactive peptides: McGAW, WILKENS, McMAHON AND AIRRIESS **198**, 2547.
Carassius auratus
acclimation of burst escape performance in fish: JOHNSON AND BENNETT **198**, 2165.
behavioural response to 17α,20β-P: BJERSELIUS, OLSÉN AND ZHENG **198**, 747.
Carassius carassius
energy status in anoxic fish brain: JOHANSSON AND NILSSON **198**, 2575.
microcalorimetry on crucian carp brain: JOHANSSON, NILSSON AND TÖRNBLOM **198**, 853.
Carausius morosus
rhythmicity in insect thoracic nerve cord: BÜSCHGES, SCHMITZ AND BÄSSLER **198**, 435.
Carbamoyl phosphate synthestase
induction of urea cycle enzymes in larval trout: WRIGHT, FELSKIE AND ANDERSON **198**, 127.
Carbamoyl phosphate synthetase
enzyme compartmentation in batrachoidid fishes: ANDERSON AND WALSH **198**, 755.
Carbon dioxide
carbonic anhydrase infusion during hypoxia in fish: LESSARD, VAL, AOTA AND RANDALL **198**, 31.
crayfish acid–base and ion status: ELLIS AND MORRIS **198**, 395.
variation in the respiratory quotient of birds: WALSBERG AND WOLF **198**, 213.
Carbon dioxide transport
haemoglobin function in intact lamprey erythrocytes: NIKINMAA, AIRAKSINEN AND VIRRKI **198**, 2423.
Carbonic anhydrase
carbonic anhydrase infusion during hypoxia in fish: LESSARD, VAL, AOTA AND RANDALL **198**, 31.
euryhaline crab gill physiology: PILLER, HENRY, DOELLER AND KRAUS **198**, 349.
hypoxia and organic phosphates in rainbow trout: VAL, LESSARD AND RANDALL **198**, 305.
Carboxyhaemoglobinaemia
control of ventilation in *Bufo paracnemis*: BRANCO AND GLASS **198**, 1417.
Cardiac effect
effects of FMRFamide-related peptides on crayfish: SKERRETT, PEAIRE, QUIGLEY AND MERCIER **198**, 109.
Cardiac muscle
papillary muscle work production: LAYLAND, YOUNG AND ALTRINGHAM **198**, 2491.
Cardiac output
crustacean cardioactive peptides: McGAW, WILKENS, McMAHON AND AIRRIESS **198**, 2547.
performance of a perfused crocodile heart: AXELSSON AND FRANKLIN **198**, 2509.
Cardiac pacemaker
thermal adaptation of plaice cardiac pacemaker: HARPER, NEWTON AND WATT **198**, 137.
Cardiac stomach
SALMFamide neuropeptides in starfish: ELPHICK, NEWMAN AND THORNDYKE **198**, 2519.
Cardiac work
heart mitochondrial properties and $\dot{V}_{O_2max}$: CONLEY, CHRISTIAN, HOPPELER AND WEIBEL **198**, 739.

Caretta caretta
perception of wave direction by turtles: LOHMANN, SWARTZ AND LOHMANN **198**, 1079.
Carp
glucose transport in carp red blood cells: TIIHONEN, NIKINMAA AND LAPPIVAARA **198**, 577.
K^+ and amino acid transport in carp red blood cells: JENSEN **198**, 155.
myosin expression in small muscle fibres of carp: ENNION, GAUVRY, BUTTERWORTH AND GOLDSPINK **198**, 1603.
Carrier system
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
Cat
dynamic EMG–force relationship: GUIMARAES, HERZOG, ALLINGER AND ZHANG **198**, 975.
Cataglyphis
optical scaling in ants: ZOLLIKOFER, WEHNER AND FUKUSHI **198**, 1637.
Catecholamine
performance of a perfused crocodile heart: AXELSSON AND FRANKLIN **198**, 2509.
Cell culture
effects of 5-HT on antennal-lobe neurones: MERCER, HAYASHI AND HILDEBRAND **198**, 613.
Cell isolation
ATPase activity in permeabilized gill cells in the mudsucker: KÜLTZ AND SOMERO **198**, 1883.
Cell locomotion
electromotor coupling of cilia in *Didinium nasutum*: PERNBERG AND MACHEMER **198**, 2537.
Cell motility
electrical activity and neurite outgrowth: NEELY AND NICHOLLS **198**, 1433.
Cell permeabilization
ATPase activity in permeabilized gill cells in the mudsucker: KÜLTZ AND SOMERO **198**, 1883.
Cell volume regulation
taurine release from embryonic skate heart: GOLDSTEIN AND DAVIS-AMARAL **198**, 2635.
the osmolality-sensitive taurine channel and noradrenaline: THOROED, SOERGAARD, CRAGOE AND FUGELLI **198**, 311.
Centipede
centipede locomotion: ANDERSON, SHULTZ AND JAYNE **198**, 1185.
Central circuitry
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
Central pattern generator
rhythmicity in insect thoracic nerve cord: BÜSCHGES, SCHMITZ AND BÄSSLER **198**, 435.
stinging response of the honeybee: OGAWA, KAWAKAMI AND YAMAGUCHI **198**, 39.
Centriole
motility of the distal flagellum of spermatozoa: WOOLLEY AND BOZKURT **198**, 1469.
Cephalopod
squid dorsal light reflex: PREUSS AND BUDELMANN **198**, 1157.
Cerebral cortex
NMDA receptor modulation by adenosine: BUCK AND BICKLER **198**, 1621.
Cerebral neurone
cerebral modulatory neurones in *Clione limacina*: SATTERLIE AND NOREKIAN **198**, 917.
Cetacean
perception of wave direction by turtles: LOHMANN, SWARTZ AND LOHMANN **198**, 1079.
Chalcoides aurata
visual targeting in flea-beetles: BRACKENBURY AND WANG **198**, 1931.
Chaos theory
dynamics of neurochemical action in *Aedes aegypti*: MESSER AND BROWN **198**, 2325.
Chara corallina
algal cell actin–myosin sliding: CHAEN, INOUE AND SUGI **198**, 1021.
Chelonia mydas
perception of wave direction by turtles: LOHMANN, SWARTZ AND LOHMANN **198**, 1079.
Chemocline
effects of salinity on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 61.
Chemosensitivity
chemosensitivity of pond snail osphradia: WEDEMEYER AND SCHILD **198**, 1743.
Chemosensory input
feeding-related inputs to Retzius neurones in *Hirudo medicinalis*: GROOME, VAUGHAN AND LENT **198**, 1233.
Cherax destructor
control of abdominal posture in crayfish: McCARTHY AND MACMILLAN **198**, 2253.
crayfish acid–base and ion status: ELLIS AND MORRIS **198**, 395.
crayfish metabolism: ELLIS AND MORRIS **198**, 409.
Chilopoda
centipede locomotion: ANDERSON, SHULTZ AND JAYNE **198**, 1185.
Chloride
effects of thiocyanate on brown trout gills: MORGAN AND POTTS **198**, 1229.
Chloride cell
branchial chloride cells in young tilapia: LI, EYGENSTEYN, LOCK, VERBOST, VAN DER HEIJDEN, WENDELAAR BONGA AND FLIK **198**, 2177.
gas transfer in softwater-acclimated trout: GRECO, GILMOUR, FENWICK AND PERRY **198**, 2557.
Chloride shift
Cl^- transport in fish red blood cells: JENSEN AND BRAHM **198**, 2237.
Cholesterol
membrane-specific responses to temperature in rainbow trout: CROCKETT AND HAZEL **198**, 1105.
Chordotonal organ
cricket femoral chordotonal organ: NOWEL, SHELTON AND STEPHEN **198**, 1977.
Chorthippus biguttulus
directional responses in grasshopper ears: MICHELSEN AND ROHRSEITZ **198**, 1817.
Chorthippus mollis
neurotransmitters and stridulation in the grasshopper: OCKER, HEDWIG AND ELSNER **198**, 1701.
Chromatophore muscle
dye coupling in squid chromatophore muscles: REED **198**, 2631.
Chrysemys picta belli
NMDA receptor modulation by adenosine: BUCK AND BICKLER **198**, 1621.
Cicada
function of the cicada tymbal: YOUNG AND BENNET-CLARK **198**, 1001.
Cilia
motility of the distal flagellum of spermatozoa: WOOLLEY AND BOZKURT **198**, 1469.
Ciliary beating
electromotor coupling of cilia in *Didinium nasutum*: PERNBERG AND MACHEMER **198**, 2537.
Cimex lectularius
Cimex lectularius nitrophorin: VALENZUELA, WALKER AND RIBEIRO **198**, 1519.
Circadian rhythm
pupil adjustments in the common backswimmer: RO AND NILSSON **198**, 71.

Circulatory control
temperature regulation in a dragonfly: MAY **198**, 2373.
Cl^- absorption
H^+-ATPase in crab gills: ONKEN AND PÜTZENLECHNER **198**, 767.
Cl^- transport
Cl^- transport in fish red blood cells: JENSEN AND BRAHM **198**, 2237.
Climbing
locust walking motor patterns: DUCH AND PFLÜGER **198**, 1963.
Clione limacina
cerebral modulatory neurones in *Clione limacina*: SATTERLIE AND NOREKIAN **198**, 917.
peripheral modulatory neurones in *Clione limacina*: SATTERLIE **198**, 905.
serotonin immunoreactivity in *Clione limacina*: SATTERLIE, NOREKIAN, JORDAN AND KAZILEK **198**, 895.
Clupea harengus
temperature and fish development: JOHNSTON, VIEIRA AND ABERCROMBY **198**, 1389.
Cnidaria
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
nerve nets in sea anemones: CHO AND McFARLANE **198**, 817.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
$^{14}CO_2$
water and carbon dioxide loss from the cockroach: CROGHAN, NOBLE-NESBITT AND APPEL **198**, 227.
water and carbon dioxide loss from the cockroach: NOBLE-NESBITT, APPEL AND CROGHAN **198**, 235.
Cocaine
electrogenic norepinephrine transporters in humans: GALLI, DeFELICE, DUKE, MOORE AND BLAKELY **198**, 2197.
Cockroach
cockroach DUM neurones and colleterial glands: SINAKEVITCH, GEFFARD, PELHATE AND LAPIED **198**, 1539.
electrical models of cockroach integument: SMITH, MACHIN AND LAMPERT **198**, 249.
insect $GABA_B$ receptor: BAI AND SATTELLE **198**, 889.
insect leg function: FULL, YAMAUCHI AND JINDRICH **198**, 2441.
water and carbon dioxide loss from the cockroach: NOBLE-NESBITT, APPEL AND CROGHAN **198**, 235.
water and carbon dioxide loss from the cockroach: CROGHAN, NOBLE-NESBITT AND APPEL **198**, 227.
Cod
effects of salinity on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 61.
effects of temperature on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 49.
Coelomic cell
adenylate compartmentation in polychaete coelomic cells: HOEGER, DUNN AND MÄRKER **198**, 2079.
Cold adaptation
thermal adaptation in moth muscle: MARDEN **198**, 2087.
Cold tolerance
differential scanning calorimetry of *Globodera rostochiensis* cysts: WHARTON AND RAMLØV **198**, 2551.
intracellular freezing in a nematode: WHARTON AND FERNS **198**, 1381.
Collagen
exotic collagen gradients in the mussel: QIN AND WAITE **198**, 633.
Coloration
solar heat gain and coat colour: WALSBERG AND WOLF **198**, 1499.
Columba livia
functional morphology of pigeon feathers: ENNOS, HICKSON AND ROBERTS **198**, 1219.
lack of polarization sensitivity in the pigeon: VOS HZN, COEMANS AND NUBOER **198**, 325.
longitudinal variation in bone mechanics: BONSER **198**, 209.
Common backswimmer
pupil adjustments in the common backswimmer: RO AND NILSSON **198**, 71.
Communication
atmospheric controls on elephant communication: GARSTANG, LAROM, RASPET AND LINDEQUE **198**, 939.
Compartmental model
midgut compartmental analysis in *Manduca sexta*: KOCH AND MOFFETT **198**, 2115.
Compartmentation
adenylate compartmentation in polychaete coelomic cells: HOEGER, DUNN AND MÄRKER **198**, 2079.
Compound eye
optical scaling in ants: ZOLLIKOFER, WEHNER AND FUKUSHI **198**, 1637.
pupil adjustments in the common backswimmer: RO AND NILSSON **198**, 71.
Computer model
computer model of the insect leg: FULL AND AHN **198**, 1285.
Concanavalin A
branchial chloride cells in young tilapia: LI, EYGENSTEYN, LOCK, VERBOST, VAN DER HEIJDEN, WENDELAAR BONGA AND FLIK **198**, 2177.
Confocal laser scanning microscopy
branchial chloride cells in young tilapia: LI, EYGENSTEYN, LOCK, VERBOST, VAN DER HEIJDEN, WENDELAAR BONGA AND FLIK **198**, 2177.
Confocal microscopy
distribution of cholecystokinin-like peptides in stomatogastric ganglion: CHRISTIE, BALDWIN, TURRIGIANO, GRAUBARD AND MARDER **198**, 263.
proteolipid localization in *Heliothesis virescens*: PIETRANTONIO AND GILL **198**, 2609.
Connective tissue
the stiffening response of holothurian dermis: TROTTER AND KOOB **198**, 1951.
Contractile bioassay
dynamics of neurochemical action in *Aedes aegypti*: MESSER AND BROWN **198**, 2325.
Contractile dynamics
calling and locomotor frog muscles: McLISTER, STEVENS AND BOGART **198**, 1527.
Contraction
thermal adaptation in moth muscle: MARDEN **198**, 2087.
Control of flight
visual targeting in flea-beetles: BRACKENBURY AND WANG **198**, 1931.
Control of ventilation
control of ventilation in *Bufo paracnemis*: BRANCO AND GLASS **198**, 1417.
Convection
solar heat gain and coat colour: WALSBERG AND WOLF **198**, 1499.
Convective inertia
expiratory valving in the avian lung: BROWN, KOVACS, BUTLER, WANG, LEHR AND BANZETT **198**, 2349.
Cooling
effects of sudden spinal cord cooling in frogs: DALÓ, HACKMAN, STOREY AND DAVIDOFF **198**, 1765.
Copper
copper and ammonia levels and swimming in trout: BEAUMONT, BUTLER AND TAYLOR **198**, 2213.
Copulation
octopamine and 'fight or flight' behaviour in a cricket: ADAMO, LINN AND HOY **198**, 1691.
Cortical bone
longitudinal variation in bone mechanics: BONSER **198**, 209.
Corticotropin-releasing factor
hormonal function of *Locusta*-DP: PATEL, HAYES AND COAST **198**, 793.

Cortisol
cortisol and nitrogen metabolism in toadfish: HOPKINS, WOOD AND WALSH **198**, 2229.
trout blood viscosity: SØRENSEN AND WEBER **198**, 953.
Cory's shearwater
homing in Cory's shearwater, bird: DALL'ANTONIA, DALL'ANTONIA, BENVENUTI, IOALÈ, MASSA AND BONADONNA **198**, 359.
Cost
energy use by developing marine animals: HOEGH-GULDBERG AND MANAHAN **198**, 19.
Cost of flight
flight speeds and energetics of foraging bats: DE LA CUEVA SALCEDO, FENTON, HICKEY AND BLAKE **198**, 2245.
Cost of lactation
flight speeds and energetics of foraging bats: DE LA CUEVA SALCEDO, FENTON, HICKEY AND BLAKE **198**, 2245.
Cotransport
a novel proline, glycine: K^+ symporter: BADER, PARTHASARATHY AND HARVEY **198**, 2599.
Coulometric respirometry
energy use by developing marine animals: HOEGH-GULDBERG AND MANAHAN **198**, 19.
Countercurrent heat exchange
temperature regulation of dolphin testes: PABST, ROMMEL, McLELLAN, WILLIAMS AND ROWLES **198**, 221.
Courtship
octopamine and 'fight or flight' behaviour in a cricket: ADAMO, LINN AND HOY **198**, 1691.
Coxal organ
spider excretion: BUTT AND TAYLOR **198**, 1137.
CO_2 output
water and carbon dioxide loss from the cockroach: CROGHAN, NOBLE-NESBITT AND APPEL **198**, 227.
water and carbon dioxide loss from the cockroach: NOBLE-NESBITT, APPEL AND CROGHAN **198**, 235.
Crab
crustacean cardioactive peptides: McGAW, WILKENS, McMAHON AND AIRRIESS **198**, 2547.
euryhaline crab gill physiology: PILLER, HENRY, DOELLER AND KRAUS **198**, 349.
H^+-ATPase in crab gills: ONKEN AND PÜTZENLECHNER **198**, 767.
neurohormones in the crab *Cancer borealis*: CHRISTIE, SKIEBE AND MARDER **198**, 2431.
Crassostrea gigas
energy use by developing marine animals: HOEGH-GULDBERG AND MANAHAN **198**, 19.
taurine metabolism in mollusc larvae: WELBORN AND MANAHAN **198**, 1791.
Crayfish
acid–base status in the freshwater crayfish: WHITELY, NAYLOR AND TAYLOR **198**, 567.
control of abdominal posture in crayfish: McCARTHY AND MACMILLAN **198**, 2253.
crayfish acid–base and ion status: ELLIS AND MORRIS **198**, 395.
crayfish metabolism: ELLIS AND MORRIS **198**, 409.
effects of FMRFamide-related peptides on crayfish: SKERRETT, PEAIRE, QUIGLEY AND MERCIER **198**, 109.
kinetics of free walking in crayfish: JAMON AND CLARAC **198**, 683.
membrane currents in swimmeret motor neurones: CHRACHRI **198**, 1483.
ovarian maturation in the crayfish: SAROJINI, NAGABHUSHANAM AND FINGERMAN **198**, 1253.
RPCH modulation of crayfish retinal function: GARFIAS, RODRÍGUEZ-SOSA AND ARÉCHIGA **198**, 1447.
serotonin immunoreactivity in a primitive crustacean: HARRISON, MACMILLAN AND YOUNG **198**, 531.
Creatine kinase
adjustment of K' to varying pH and pMg: GOLDING, TEAGUE AND DOBSON **198**, 1775.
Creep
creep of wallaby tendons: WANG AND KER **198**, 831.
Creep rupture
creep of wallaby tendons: WANG AND KER **198**, 831.
fatigue of wallaby tendons: WANG, KER AND ALEXANDER **198**, 847.
Cricket
bioacoustics of a miniature cricket: DAMBACH AND GRAS **198**, 721.
biomechanics of the cricket's kick: HUSTERT AND GNATZY **198**, 1275.
cricket femoral chordotonal organ: NOWEL, SHELTON AND STEPHEN **198**, 1977.
octopamine and 'fight or flight' behaviour in a cricket: ADAMO, LINN AND HOY **198**, 1691.
protein synthesis and degradation in cricket flight muscles: GOMI, OKUDA AND TANAKA **198**, 1071.
sound production in crickets: STEPHEN AND HARTLEY **198**, 2139.
wind-evoked cricket escape behaviour: TAUBER AND CAMHI **198**, 1895.
Crocodylus porosus
performance of a perfused crocodile heart: AXELSSON AND FRANKLIN **198**, 2509.
Crucian carp
energy status in anoxic fish brain: JOHANSSON AND NILSSON **198**, 2575.
microcalorimetry on crucian carp brain: JOHANSSON, NILSSON AND TÖRNBLOM **198**, 853.
Crustacea
actions of lobster peptide F_1: WORDEN, KRAVITZ AND GOY **198**, 97.
distribution of cholecystokinin-like peptides in stomatogastric ganglion: CHRISTIE, BALDWIN, TURRIGIANO, GRAUBARD AND MARDER **198**, 263.
effects of FMRFamide-related peptides on crayfish: SKERRETT, PEAIRE, QUIGLEY AND MERCIER **198**, 109.
neurohormones in the crab *Cancer borealis*: CHRISTIE, SKIEBE AND MARDER **198**, 2431.
serotonin immunoreactivity in a primitive crustacean: HARRISON, MACMILLAN AND YOUNG **198**, 531.
Crustacean
lobster magnetic compass: LOHMANN, PENTCHEFF, NEVITT, STETTEN, ZIMMER-FAUST, JARRARD AND BOLES **198**, 2041.
RPCH modulation of crayfish retinal function: GARFIAS, RODRÍGUEZ-SOSA AND ARÉCHIGA **198**, 1447.
Cucumaria frondosa
the stiffening response of holothurian dermis: TROTTER AND KOOB **198**, 1951.
Cuticle
electrical models of cockroach integument: SMITH, MACHIN AND LAMPERT **198**, 249.
Cyclic AMP
cyclic AMP and barnacle settlement: CLARE, THOMAS AND RITTSCHOF **198**, 655.
the osmolality-sensitive taurine channel and noradrenaline: THOROED, SOERGAARD, CRAGOE AND FUGELLI **198**, 311.
Cyclochila australasiae
function of the cicada tymbal: YOUNG AND BENNET-CLARK **198**, 1001.
Cycloptiloides canariensis
bioacoustics of a miniature cricket: DAMBACH AND GRAS **198**, 721.
Cyclura nubila
heart mitochondrial properties and $\dot{V}_{O_2max}$: CONLEY, CHRISTIAN, HOPPELER AND WEIBEL **198**, 739.

Cyprinus carpio
glucose transport in carp red blood cells: TIIHONEN, NIKINMAA AND LAPPIVAARA **198**, 577.
K^+ and amino acid transport in carp red blood cells: JENSEN **198**, 155.
myosin expression in small muscle fibres of carp: ENNION, GAUVRY, BUTTERWORTH AND GOLDSPINK **198**, 1603.
***Cypris* larva**
cyclic AMP and barnacle settlement: CLARE, THOMAS AND RITTSCHOF **198**, 655.
Cyst
differential scanning calorimetry of *Globodera rostochiensis* cysts: WHARTON AND RAMLØV **198**, 2551.
Cytochalasin B
glucose transport in carp red blood cells: TIIHONEN, NIKINMAA AND LAPPIVAARA **198**, 577.
Cytoplasmic streaming
algal cell actin–myosin sliding: CHAEN, INOUE AND SUGI **198**, 1021.

Daily rhythms
daily variations in response to noradrenaline: HAIM, McDEVITT AND SPEAKMAN **198**, 561.
Damage
creep of wallaby tendons: WANG AND KER **198**, 831.
Dark adaptation
pupil adjustments in the common backswimmer: RO AND NILSSON **198**, 71.
Data-logger
homing in Cory's shearwater, bird: DALL'ANTONIA, DALL'ANTONIA, BENVENUTI, IOALÈ, MASSA AND BONADONNA **198**, 359.
De-alation
protein synthesis and degradation in cricket flight muscles: GOMI, OKUDA AND TANAKA **198**, 1071.
Decapotoma lunata
fuels for flight in blister beetle: AUERSWALD AND GÄDE **198**, 1423.
Decticus albifrons
oviductal motor neurones: KALOGIANNI AND THEOPHILIDIS **198**, 507.
Deep-sea spider
deep-sea spiders that walk through the water: MARSHALL AND DIEBEL **198**, 1371.
Defensive kicking
biomechanics of the cricket's kick: HUSTERT AND GNATZY **198**, 1275.
Dehydration
metabolism during dehydration in leopard frogs: CHURCHILL AND STOREY **198**, 147.
spider excretion: BUTT AND TAYLOR **198**, 1137.
Dendraster excentricus
energy use by developing marine animals: HOEGH-GULDBERG AND MANAHAN **198**, 19.
Denervation
epaxial muscle function in a lizard: RITTER **198**, 2477.
feeding in the frog *Hemisus marmoratum*: RITTER AND NISHIKAWA **198**, 2025.
Depolarisation
energy status in anoxic fish brain: JOHANSSON AND NILSSON **198**, 2575.
Depth
effects of salinity on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 61.
effects of temperature on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 49.
Dermal gland
electrical models of cockroach integument: SMITH, MACHIN AND LAMPERT **198**, 249.

Dermal light sense
initiation of locomotion by photoreceptors in the lamprey: DELIAGINA, ULLÉN, GONZALEZ, EHRSSON, ORLOVSKY AND GRILLNER **198**, 2581.
Descending interneurone
locust hindleg steering: LOREZ **198**, 869.
Desiccation tolerance
metabolism during dehydration in leopard frogs: CHURCHILL AND STOREY **198**, 147.
Desipramine
electrogenic norepinephrine transporters in humans: GALLI, DeFELICE, DUKE, MOORE AND BLAKELY **198**, 2197.
Development
development of locust kicking: NORMAN **198**, 1341.
energy use by developing marine animals: HOEGH-GULDBERG AND MANAHAN **198**, 19.
locust hair plate receptor: NEWLAND, WATKINS, EMPTAGE AND NAGAYAMA **198**, 2397.
temperature and fish development: JOHNSTON, VIEIRA AND ABERCROMBY **198**, 1389.
oxygen consumption regulation in larval *Xenopus*: HASTINGS AND BURGGREN **198**, 2465.
Diaphorase
nitric oxide synthetase in *Rhodnius prolixus*: NUSSENZVEIG, BENTLEY AND RIBEIRO **198**, 1093.
Didinium nasutum
electromotor coupling of cilia in *Didinium nasutum*: PERNBERG AND MACHEMER **198**, 2537.
Dietary Na^+
effect of dietary Na^+ load on rainbow trout: SMITH, EDDY AND TALBOT **198**, 2359.
Difference thresholds
tactile sensitivity of mystacial vibrissae in seals: DEHNHARDT AND KAMINSKI **198**, 2317.
Differential scanning calorimetry
differential scanning calorimetry of *Globodera rostochiensis* cysts: WHARTON AND RAMLØV **198**, 2551.
Diffusion limitation
pulmonary gas exchange in the monitor lizard: HOPKINS, HICKS, COOPER AND POWELL **198**, 1783.
Digestive adaptation
feeding response of pythons: SECOR AND DIAMOND **198**, 1313.
17α,20β-dihydroxy-4-pregnen-3-one
behavioural response to 17α,20β-P: BJERSELIUS, OLSÉN AND ZHENG **198**, 747.
Direction recorder
homing in Cory's shearwater, bird: DALL'ANTONIA, DALL'ANTONIA, BENVENUTI, IOALÈ, MASSA AND BONADONNA **198**, 359.
Directionality
sound transformation at the mouse pinna: CHEN, CAIN AND JEN **198**, 2007.
Discontinuous ventilation
control of discontinuous ventilation in a grasshopper: HARRISON, HADLEY AND QUINLAN **198**, 1755.
hypoxic ant ventilation: LIGHTON AND GARRIGAN **198**, 1613.
Distance estimation
visual distance discrimination in praying mantis: POTESER AND KRAL **198**, 2127.
Diuretic hormone
hormonal function of *Locusta*-DP: PATEL, HAYES AND COAST **198**, 793.
Divalent cation transport
calcium pumps in the teleost kidney: BIJVELDS, VAN DER HEIJDEN, FLIK, VERBOST, KOLAR AND WENDELAAR BONGA **198**, 1351.
Divergence angle
optical scaling in ants: ZOLLIKOFER, WEHNER AND FUKUSHI **198**, 1637.

Diving
cardiac response to diving in muskrats: SIGNORE AND JONES **198**, 2307.
Dogfish
ammonia and urea metabolism in an elasmobranch: WOOD, PÄRT AND WRIGHT **198**, 1545.
Dolichonyx oryzivorus
particle-based magnetoreceptor in the bobolink: BEASON, DUSSOURD AND DEUTSCHLANDER **198**, 141.
L-Dopa
L-Dopa in sea anemones: HUDMAN AND McFARLANE **198**, 1045.
Dorsal unpaired median neurone
cockroach DUM neurones and colleterial glands: SINAKEVITCH, GEFFARD, PELHATE AND LAPIED **198**, 1539.
Dragonfly
temperature regulation in a dragonfly: MAY **198**, 2373.
thermally polymorphic dragonflies: MARDEN **198**, 2095.
Dreissena polymorpha
zebra mussel potassium transport: WILCOX AND DIETZ **198**, 861.
Drosophila melanogaster
expression of a cloned muscarinic acetylcholine receptor: MILLAR, BAYLIS, REAPER, BUNTING, MASON AND SATTELLE **198**, 1843.
flight initiation in *Drosophila melanogaster*: TRIMARCHI AND SCHNEIDERMAN **198**, 1099.
fluid reabsorption by *Drosphila* Malpighian tubules: O'DONNELL AND MADDRELL **198**, 1647.
Duckling
hydroplaning by ducklings: AIGELDINGER AND FISH **198**, 1567.
Dye coupling
dye coupling in squid chromatophore muscles: REED **198**, 2631.
Dynamic compression
expiratory valving in the avian lung: BROWN, KOVACS, BUTLER, WANG, LEHR AND BANZETT **198**, 2349.
Dynein
motility of the distal flagellum of spermatozoa: WOOLLEY AND BOZKURT **198**, 1469.

Echinoderm
ion transport by echinoderm gastrointestinal epithelium: ZHUANG, DUERR AND AHEARN **198**, 1207.
SALMFamide neuropeptides in starfish: ELPHICK, NEWMAN AND THORNDYKE **198**, 2519.
the stiffening response of holothurian dermis: TROTTER AND KOOB **198**, 1951.
Echolocation
bat echolocation call structure: WATERS AND JONES **198**, 475.
respiration and vocalization in bats: LANCASTER, HENSON AND KEATING **198**, 175.
Efficiency
fast-start efficiency and power output in northern pike: FRITH AND BLAKE **198**, 1863.
mechanical work in locomotion: WILLEMS, CAVAGNA AND HEGLUND **198**, 379.
Egg mass
oxygen availability in gelatinous egg masses: BOOTH **198**, 241.
***Eigenmannia* sp.**
electrosensory thresholds in *Eigenmannia*: KAUNZINGER AND KRAMER **198**, 2365.
Elasmobranch
ammonia and urea metabolism in an elasmobranch: WOOD, PÄRT AND WRIGHT **198**, 1545.
Elastic energy
muscle and tendon stresses during wallaby hopping: BIEWENER AND BAUDINETTE **198**, 1829.
Elasticity
structure and physical properties of invertebrate arteries: DAVISON, WRIGHT AND DEMONT **198**, 2185.
Electric fish
electrosensory thresholds in larvae of a mormyrid fish: POSTNER AND KRAMER **198**, 783.
Electric organ discharge
electrosensory thresholds in *Eigenmannia*: KAUNZINGER AND KRAMER **198**, 2365.
Electrical resistance
electrical models of cockroach integument: SMITH, MACHIN AND LAMPERT **198**, 249.
Electrogenic Ca^{2+}/H^+ exchange
ion transport by echinoderm gastrointestinal epithelium: ZHUANG, DUERR AND AHEARN **198**, 1207.
Electromotor coupling
electromotor coupling of cilia in *Didinium nasutum*: PERNBERG AND MACHEMER **198**, 2537.
Electromyography
bass red muscle activity: JAYNE AND LAUDER **198**, 1575.
centipede locomotion: ANDERSON, SHULTZ AND JAYNE **198**, 1185.
dynamic EMG–force relationship: GUIMARAES, HERZOG, ALLINGER AND ZHANG **198**, 975.
intermittent flight in starlings: TOBALSKE **198**, 1259.
respiration and vocalization in bats: LANCASTER, HENSON AND KEATING **198**, 175.
within-myomere recruitment patterns: JAYNE AND LAUDER **198**, 805.
Electron paramagnetic resonance
Cimex lectularius nitrophorin: VALENZUELA, WALKER AND RIBEIRO **198**, 1519.
Electrophysiology
hormonal activation of *Rhodnius* brain by feeding: MULYE AND DAVEY **198**, 1087.
nerve nets in sea anemones: CHO AND McFARLANE **198**, 817.
Electroreception
electrosensory thresholds in *Eigenmannia*: KAUNZINGER AND KRAMER **198**, 2365.
Electroretinography
lack of polarization sensitivity in the pigeon: VOS HZN, COEMANS AND NUBOER **198**, 325.
RPCH modulation of crayfish retinal function: GARFIAS, RODRÍGUEZ-SOSA AND ARÉCHIGA **198**, 1447.
Electrosensory threshold
electrosensory thresholds in larvae of a mormyrid fish: POSTNER AND KRAMER **198**, 783.
Electrosensory tuning
electrosensory thresholds in larvae of a mormyrid fish: POSTNER AND KRAMER **198**, 783.
Elephant
atmospheric controls on elephant communication: GARSTANG, LAROM, RASPET AND LINDEQUE **198**, 939.
elephant energetics: LANGMAN, ROBERTS, BLACK, MALOIY, HEGLUND, WEBER, KRAM AND TAYLOR **198**, 629.
ELISA
callitachykinins in blowfly: NÄSSEL, KIM AND LUNDQUIST **198**, 2527.
Embryo
induction of urea cycle enzymes in larval trout: WRIGHT, FELSKIE AND ANDERSON **198**, 127.
matrotrophic viviparity in rockfish: MACFARLANE AND BOWERS **198**, 1197.
temperature and fish development: JOHNSTON, VIEIRA AND ABERCROMBY **198**, 1389.
Embryonic development
oxygen availability in gelatinous egg masses: BOOTH **198**, 241.
Endotherm
feeding in seabirds: WILSON, PÜTZ, GRÉMILLET, CULIK, KIERSPEL, REGEL, BOST, LAGE AND COOPER **198**, 1115.
Endurance training
heart mitochondrial properties and $\dot{V}_{O_2max}$: CONLEY, CHRISTIAN, HOPPELER AND WEIBEL **198**, 739.

Energetics
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
bat echolocation call structure: WATERS AND JONES **198**, 475.
elephant energetics: LANGMAN, ROBERTS, BLACK, MALOIY, HEGLUND, WEBER, KRAM AND TAYLOR **198**, 629.
temperature regulation of dolphin testes: PABST, ROMMEL, McLELLAN, WILLIAMS AND ROWLES **198**, 221.
Energy balance
flight speeds and energetics of foraging bats: DE LA CUEVA SALCEDO, FENTON, HICKEY AND BLAKE **198**, 2245.
Energy charge
energy status in anoxic fish brain: JOHANSSON AND NILSSON **198**, 2575.
Energy metabolism
fuels for flight in blister beetle: AUERSWALD AND GÄDE **198**, 1423.
microcalorimetry on crucian carp brain: JOHANSSON, NILSSON AND TÖRNBLOM **198**, 853.
Energy transfer
mechanical work in locomotion: WILLEMS, CAVAGNA AND HEGLUND **198**, 379.
Enteric reflex
enteric reflexes and nitric oxide in fish intestine: KARILA AND HOLMGREN **198**, 2405.
Enzyme activity
enzyme activity in fish growth studies: PELLETIER, BLIER, DUTIL AND GUDERLEY **198**, 1493.
fuels for flight in blister beetle: AUERSWALD AND GÄDE **198**, 1423.
induction of urea cycle enzymes in larval trout: WRIGHT, FELSKIE AND ANDERSON **198**, 127.
Enzyme compartmentation
enzyme compartmentation in batrachoidid fishes: ANDERSON AND WALSH **198**, 755.
Epaxial muscles
epaxial muscle function in a lizard: RITTER **198**, 2477.
Epidermal barrier
electrical models of cockroach integument: SMITH, MACHIN AND LAMPERT **198**, 249.
Equilibrium
squid dorsal light reflex: PREUSS AND BUDELMANN **198**, 1157.
Eriocheir sinensis
H^+-ATPase in crab gills: ONKEN AND PÜTZENLECHNER **198**, 767.
Erythrocyte
glucose transport in carp red blood cells: TIIHONEN, NIKINMAA AND LAPPIVAARA **198**, 577.
haemoglobin function in intact lamprey erythrocytes: NIKINMAA, AIRAKSINEN AND VIRRKI **198**, 2423.
metabolite transport in eel erythrocytes: SOENGAS AND MOON **198**, 877.
rheology of fish red blood cells: LECKLIN, NASH AND EGGINTON **198**, 1801.
the osmolality-sensitive taurine channel and noradrenaline: THOROED, SOERGAARD, CRAGOE AND FUGELLI **198**, 311.
Escape behaviour
flight initiation in *Drosophila melanogaster*: TRIMARCHI AND SCHNEIDERMAN **198**, 1099.
wind-evoked cricket escape behaviour: TAUBER AND CAMHI **198**, 1895.
Escape swimming
acclimation of burst escape performance in fish: JOHNSON AND BENNETT **198**, 2165.
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
Esox lucius
fast-start efficiency and power output in northern pike: FRITH AND BLAKE **198**, 1863.
Ethanol production
microcalorimetry on crucian carp brain: JOHANSSON, NILSSON AND TÖRNBLOM **198**, 853.
Euetheola humilis
acoustic startle in scarab beetles: FORREST, FARRIS AND HOY **198**, 2593.
Euglossa dissimula
extraordinary flight performance of orchid bees: DUDLEY **198**, 1065.
Euglossa imperialis
extraordinary flight performance of orchid bees: DUDLEY **198**, 1065.
Eulaema meriana
extraordinary flight performance of orchid bees: DUDLEY **198**, 1065.
European starling
intermittent flight in starlings: TOBALSKE **198**, 1259.
Evolution
calling and locomotor frog muscles: McLISTER, STEVENS AND BOGART **198**, 1527.
Excitatory amino acids
effects of sudden spinal cord cooling in frogs: DALÓ, HACKMAN, STOREY AND DAVIDOFF **198**, 1765.
Excretion
fluid reabsorption by *Drosphila* Malpighian tubules: O'DONNELL AND MADDRELL **198**, 1647.
nitrogen excretion: WRIGHT **198**, 273.
spider excretion: BUTT AND TAYLOR **198**, 1137.
Exercise
effects of salinity on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 61.
effects of temperature on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 49.
heart mitochondrial properties and $\dot{V}_{O_2max}$: CONLEY, CHRISTIAN, HOPPELER AND WEIBEL **198**, 739.
pulmonary gas exchange in the monitor lizard: HOPKINS, HICKS, COOPER AND POWELL **198**, 1783.
temperature regulation of dolphin testes: PABST, ROMMEL, McLELLAN, WILLIAMS AND ROWLES **198**, 221.
Exoskeleton
development of locust kicking: NORMAN **198**, 1341.
Expression
mRNA-induced leucine transport in a lepidopteran larva: SACCHI, PEREGO AND MAGAGNIN **198**, 961.
External work
mechanical work in locomotion: WILLEMS, CAVAGNA AND HEGLUND **198**, 379.
Extracellular potassium
energy status in anoxic fish brain: JOHANSSON AND NILSSON **198**, 2575.
Extraretinal photosensitivity
initiation of locomotion by photoreceptors in the lamprey: DELIAGINA, ULLÉN, GONZALEZ, EHRSSON, ORLOVSKY AND GRILLNER **198**, 2581.
Eye
squid dorsal light reflex: PREUSS AND BUDELMANN **198**, 1157.

Fast-start
fast-start efficiency and power output in northern pike: FRITH AND BLAKE **198**, 1863.
Fatigue
fatigue of wallaby tendons: WANG, KER AND ALEXANDER **198**, 847.
Fatigue rupture
fatigue of wallaby tendons: WANG, KER AND ALEXANDER **198**, 847.
Fatty acid composition
Na^+/K^+-ATPase in antarctic fish: GONZALEZ-CABRERA, DOWD, PEDIBHOTLA, ROSARIO, STANLEY-SAMUELSON AND PETZEL **198**, 2279.
Feather
functional morphology of pigeon feathers: ENNOS, HICKSON AND ROBERTS **198**, 1219.

wing tip slots and drag in a gliding hawk: TUCKER **198**, 775.
Feather keratin
the Young's modulus of feather keratin: BONSER AND PURSLOW **198**, 1029.
Feedback control
sound production in crickets: STEPHEN AND HARTLEY **198**, 2139.
Feeding
Cimex lectularius nitrophorin: VALENZUELA, WALKER AND RIBEIRO **198**, 1519.
feeding and nitrogen excretion in toadfish: WALSH AND MILLIGAN **198**, 1559.
feeding in seabirds: WILSON, PÜTZ, GRÉMILLET, CULIK, KIERSPEL, REGEL, BOST, LAGE AND COOPER **198**, 1115.
feeding in the frog *Hemisus marmoratum*: RITTER AND NISHIKAWA **198**, 2025.
feeding kinematics of phyllomedusine treefrogs: GRAY AND NISHIKAWA **198**, 457.
flatfish prey capture: GIBB **198**, 1173.
hormonal activation of *Rhodnius* brain by feeding: MULYE AND DAVEY **198**, 1087.
motor pattern allometry in *Micropterus salmoides*: WAINWRIGHT AND RICHARD **198**, 1161.
ontogenetic stereotypy in salamander feeding: REILLY **198**, 701.
scaling of feeding kinematics: RICHARD AND WAINWRIGHT **198**, 419.
spider excretion: BUTT AND TAYLOR **198**, 1137.
sunfish capture and transport behaviour: GILLIS AND LAUDER **198**, 709.
Fibrils
structure and physical properties of invertebrate arteries: DAVISON, WRIGHT AND DEMONT **198**, 2185.
Ficedula hypoleuca
distribution of melatonin binding sites in avian brains: SCHNEIDER **198**, 1943.
Fish
acclimation of burst escape performance in fish: JOHNSON AND BENNETT **198**, 2165.
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
allelic variation in fish myosin light chains: CROCKFORD, JOHNSTON AND McANDREW **198**, 2501.
bass red muscle activity: JAYNE AND LAUDER **198**, 1575.
bass steady swimming: JAYNE AND LAUDER **198**, 585.
Cl^- transport in fish red blood cells: JENSEN AND BRAHM **198**, 2237.
enzyme activity in fish growth studies: PELLETIER, BLIER, DUTIL AND GUDERLEY **198**, 1493.
mechanical control of swimming speed in fish: McHENRY, PELL AND LONG **198**, 2293.
muscle power during fast-starts in short-horned sculpin: JOHNSTON, VAN LEEUWEN, DAVIES AND BEDDOW **198**, 1851.
perception of wave direction by turtles: LOHMANN, SWARTZ AND LOHMANN **198**, 1079.
sunfish capture and transport behaviour: GILLIS AND LAUDER **198**, 709.
temperature and fish development: JOHNSTON, VIEIRA AND ABERCROMBY **198**, 1389.
the osmolality-sensitive taurine channel and noradrenaline: THOROED, SOERGAARD, CRAGOE AND FUGELLI **198**, 311.
tuning in to fish swimming waves: WARDLE, VIDELER AND ALTRINGHAM **198**, 1629.
within-myomere recruitment patterns: JAYNE AND LAUDER **198**, 805.
Fish blood
trout blood viscosity: SØRENSEN AND WEBER **198**, 953.
Fish larva
electrosensory thresholds in larvae of a mormyrid fish: POSTNER AND KRAMER **198**, 783.
Flagella
microtubule sliding in beating flagella: SHINGYOJI, YOSHIMURA, ESHEL, AKAHASHI AND GIBBONS **198**, 645.
motility of the distal flagellum of spermatozoa: WOOLLEY AND BOZKURT **198**, 1469.
Flap-bound
intermittent flight in starlings: TOBALSKE **198**, 1259.
Flap-glide
intermittent flight in starlings: TOBALSKE **198**, 1259.
Flapping flight
moment of inertia of bird wings: VAN DEN BERG AND RAYNER **198**, 1655.
Flatfish
flatfish prey capture: GIBB **198**, 1173.
Flea-beetle
visual targeting in flea-beetles: BRACKENBURY AND WANG **198**, 1931.
Flight
extraordinary flight performance of orchid bees: DUDLEY **198**, 1065.
fuels for flight in blister beetle: AUERSWALD AND GÄDE **198**, 1423.
intermittent flight in starlings: TOBALSKE **198**, 1259.
locust hindleg steering: LOREZ **198**, 869.
oxygen consumption in birds during flight: BISHOP AND BUTLER **198**, 2153.
Flight metabolism
dragonfly flight behaviour and heat production: MAY **198**, 2385.
Flight muscle
adipokinetic hormone in the insect CNS: **198**, 1307.
Flight muscle degeneration
protein synthesis and degradation in cricket flight muscles: GOMI, OKUDA AND TANAKA **198**, 1071.
Flight performance
cage size and flight speed in the tobacco hawkmoth: STEVENSON, CORBO, BACA AND QUANG **198**, 1665.
thermal adaptation in moth muscle: MARDEN **198**, 2087.
Flight speed
cage size and flight speed in the tobacco hawkmoth: STEVENSON, CORBO, BACA AND QUANG **198**, 1665.
Flounder
the osmolality-sensitive taurine channel and noradrenaline: THOROED, SOERGAARD, CRAGOE AND FUGELLI **198**, 311.
Flow
performance of a perfused crocodile heart: AXELSSON AND FRANKLIN **198**, 2509.
Flow analysis
particle image velocimetry flow analysis on aquatic animals: STAMHUIS AND VIDELER **198**, 283.
Flow velocity
particle image velocimetry flow analysis on aquatic animals: STAMHUIS AND VIDELER **198**, 283.
Fluid transport
fluid reabsorption by *Drosphila* Malpighian tubules: O'DONNELL AND MADDRELL **198**, 1647.
Fluorometry
NMDA receptor modulation by adenosine: BUCK AND BICKLER **198**, 1621.
FMRFamide
effects of FMRFamide-related peptides on crayfish: SKERRETT, PEAIRE, QUIGLEY AND MERCIER **198**, 109.
modulation of a sensory neurone in the leech: WENNING AND CALABRESE **198**, 1405.
FMRFamide-related peptides
crustacean cardioactive peptides: McGAW, WILKENS, McMAHON AND AIRRIESS **198**, 2547.
Food intake
flight speeds and energetics of foraging bats: DE LA CUEVA SALCEDO, FENTON, HICKEY AND BLAKE **198**, 2245.
Foraging
bat echolocation call structure: WATERS AND JONES **198**, 475.

Force
computer model of the insect leg: FULL AND AHN **198**, 1285.
dynamic EMG–force relationship: GUIMARAES, HERZOG, ALLINGER AND ZHANG **198**, 975.
Force–velocity relationship
algal cell actin–myosin sliding: CHAEN, INOUE AND SUGI **198**, 1021.
microtubule–kinesin sliding *in vitro*: SHIRAKAWA, OIWA, CHAEN, SHIMIZU, TANAKA AND SUGI **198**, 1809.
muscle contractile properties in sculpin: BEDDOW AND JOHNSTON **198**, 193.
Formicidae
optical scaling in ants: ZOLLIKOFER, WEHNER AND FUKUSHI **198**, 1637.
Free magnesium
adjustment of K' to varying pH and pMg: GOLDING, TEAGUE AND DOBSON **198**, 1775.
Freeze tolerance
metabolism during dehydration in leopard frogs: CHURCHILL AND STOREY **198**, 147.
Freezing
differential scanning calorimetry of *Globodera rostochiensis* cysts: WHARTON AND RAMLØV **198**, 2551.
Freshwater bivalve
zebra mussel potassium transport: WILCOX AND DIETZ **198**, 861.
Freshwater tilapia
branchial chloride cells in young tilapia: LI, EYGENSTEYN, LOCK, VERBOST, VAN DER HEIJDEN, WENDELAAR BONGA AND FLIK **198**, 2177.
Frog
Ca^{2+} exchange in frog skin: STIFFLER **198**, 967.
feeding in the frog *Hemisus marmoratum*: RITTER AND NISHIKAWA **198**, 2025.
feeding kinematics of phyllomedusine treefrogs: GRAY AND NISHIKAWA **198**, 457.
metabolism during dehydration in leopard frogs: CHURCHILL AND STOREY **198**, 147.
muscle length and work from frog heart: SYME AND JOSEPHSON **198**, 2221.
oxygen consumption regulation in larval *Xenopus*: HASTINGS AND BURGGREN **198**, 2465.
Fruit fly
flight initiation in *Drosophila melanogaster*: TRIMARCHI AND SCHNEIDERMAN **198**, 1099.
Fundulus heteroclitus
acclimation of burst escape performance in fish: JOHNSON AND BENNETT **198**, 2165.
Fura-2
NMDA receptor modulation by adenosine: BUCK AND BICKLER **198**, 1621.

GABA
neurotransmitters and stridulation in the grasshopper: OCKER, HEDWIG AND ELSNER **198**, 1701.
Gadus morhua
effects of salinity on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 61.
effects of temperature on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 49.
enteric reflexes and nitric oxide in fish intestine: KARILA AND HOLMGREN **198**, 2405.
enzyme activity in fish growth studies: PELLETIER, BLIER, DUTIL AND GUDERLEY **198**, 1493.
Gait
deep-sea spiders that walk through the water: MARSHALL AND DIEBEL **198**, 1371.
Gallus domesticus
motility of the distal flagellum of spermatozoa: WOOLLEY AND BOZKURT **198**, 1469.
Gap junction
proteolipid localization in *Heliothesis virescens*: PIETRANTONIO AND GILL **198**, 2609.
Gas exchange
comparative gas exchange in *Messor*: LIGHTON AND BERRIGAN **198**, 521.
erythrocyte deformation in fish gills: NILSSON, LÖFMAN AND BLOCK **198**, 1151.
Gas transfer
gas transfer in softwater-acclimated trout: GRECO, GILMOUR, FENWICK AND PERRY **198**, 2557.
Gerbil
development of synchronous stepping: BLUMBERG-FELDMAN AND EILAM **198**, 363.
Gerbillus dasyurus
development of synchronous stepping: BLUMBERG-FELDMAN AND EILAM **198**, 363.
Ghost crab
integrating field and laboratory studies of locomotion: WEINSTEIN **198**, 989.
Giant axon
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
Giant fibre
flight initiation in *Drosophila melanogaster*: TRIMARCHI AND SCHNEIDERMAN **198**, 1099.
Gill
basolateral taurine transport in *Mytilus* gill: NEUFELD AND WRIGHT **198**, 465.
branchial chloride cells in young tilapia: LI, EYGENSTEYN, LOCK, VERBOST, VAN DER HEIJDEN, WENDELAAR BONGA AND FLIK **198**, 2177.
effect of dietary Na^+ load on rainbow trout: SMITH, EDDY AND TALBOT **198**, 2359.
euryhaline crab gill physiology: PILLER, HENRY, DOELLER AND KRAUS **198**, 349.
gas transfer in softwater-acclimated trout: GRECO, GILMOUR, FENWICK AND PERRY **198**, 2557.
H^+-ATPase in crab gills: ONKEN AND PÜTZENLECHNER **198**, 767.
immunolocalization of H^+ pumps in trout pavement cells: SULLIVAN, FRYER AND PERRY **198**, 2619.
ion regulation in rainbow trout: POSTLETHWAITE AND McDONALD **198**, 295.
Gill epithelial cells
ATPase activity in permeabilized gill cells in the mudsucker: KÜLTZ AND SOMERO **198**, 1883.
Gill epithelium
immunolocalization of H^+ pumps in trout pavement cells: SULLIVAN, FRYER AND PERRY **198**, 2619.
Gill permeability
ammonia and urea metabolism in an elasmobranch: WOOD, PÄRT AND WRIGHT **198**, 1545.
Gillichthys mirabilis
ATPase activity in permeabilized gill cells in the mudsucker: KÜLTZ AND SOMERO **198**, 1883.
Gills
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
effects of thiocyanate on brown trout gills: MORGAN AND POTTS **198**, 1229.
pulsatile urea excretion in toadfish: WOOD, HOPKINS, HOGSTRAND AND WALSH **198**, 1729.
Glibenclamide
energy status in anoxic fish brain: JOHANSSON AND NILSSON **198**, 2575.
Globodera rostochiensis
differential scanning calorimetry of *Globodera rostochiensis* cysts: WHARTON AND RAMLØV **198**, 2551.

Glucose
glycerol synthesis in smelt: RAYMOND **198**, 2569.
metabolite transport in eel erythrocytes: SOENGAS AND MOON **198**, 877.
Glucose metabolism
metabolism during dehydration in leopard frogs: CHURCHILL AND STOREY **198**, 147.
Glucose transport
glucose transport in carp red blood cells: TIIHONEN, NIKINMAA AND LAPPIVAARA **198**, 577.
Glutamate
neurotransmitters and stridulation in the grasshopper: OCKER, HEDWIG AND ELSNER **198**, 1701.
Glutamine synthetase
cortisol and nitrogen metabolism in toadfish: HOPKINS, WOOD AND WALSH **198**, 2229.
enzyme compartmentation in batrachoidid fishes: ANDERSON AND WALSH **198**, 755.
feeding and nitrogen excretion in toadfish: WALSH AND MILLIGAN **198**, 1559.
Glycerol synthesis
glycerol synthesis in smelt: RAYMOND **198**, 2569.
Glycerylphosphorylcholine
urea and trimethylamines in *Xenopus* tissue: WRAY AND WILKIE **198**, 373.
Glycine
a novel proline, glycine: K^+ symporter: BADER, PARTHASARATHY AND HARVEY **198**, 2599.
Glycine betaine
urea and trimethylamines in *Xenopus* tissue: WRAY AND WILKIE **198**, 373.
Glycogen
glycerol synthesis in smelt: RAYMOND **198**, 2569.
Glycogen phosphorylase
glycerol synthesis in smelt: RAYMOND **198**, 2569.
Glycosylation
function of heterodimeric β-type ATPases: CHOW AND FORTE **198**, 1.
Gobiidae
buoyancy of gobies in hypoxia: GEE AND GEE **198**, 79.
Goblet cell
midgut compartmental analysis in *Manduca sexta*: KOCH AND MOFFETT **198**, 2115.
patency of goblet valves in insect midgut: MOFFETT, KOCH AND WOODS **198**, 2103.
proteolipid localization in *Heliothesis virescens*: PIETRANTONIO AND GILL **198**, 2609.
Goldfish
acclimation of burst escape performance in fish: JOHNSON AND BENNETT **198**, 2165.
behavioural response to 17α,20β-P: BJERSELIUS, OLSÉN AND ZHENG **198**, 747.
Gonadotropin
behavioural response to 17α,20β-P: BJERSELIUS, OLSÉN AND ZHENG **198**, 747.
Gradient
exotic collagen gradients in the mussel: QIN AND WAITE **198**, 633.
Grasshopper
control of discontinuous ventilation in a grasshopper: HARRISON, HADLEY AND QUINLAN **198**, 1755.
directional responses in grasshopper ears: MICHELSEN AND ROHRSEITZ **198**, 1817.
locust hair plate receptor: NEWLAND, WATKINS, EMPTAGE AND NAGAYAMA **198**, 2397.
neurotransmitters and stridulation in the grasshopper: OCKER, HEDWIG AND ELSNER **198**, 1701.
Green darner dragonfly
dragonfly flight behaviour and heat production: MAY **198**, 2385.
temperature regulation in a dragonfly: MAY **198**, 2373.
Ground squirrel
parasympathetic influence in hibernation: HARRIS AND MILSOM **198**, 931.
solar heat gain and coat colour: WALSBERG AND WOLF **198**, 1499.
Growth
myosin expression in small muscle fibres of carp: ENNION, GAUVRY, BUTTERWORTH AND GOLDSPINK **198**, 1603.
Growth rate
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
enzyme activity in fish growth studies: PELLETIER, BLIER, DUTIL AND GUDERLEY **198**, 1493.
Gryllus bimaculatus
octopamine and 'fight or flight' behaviour in a cricket: ADAMO, LINN AND HOY **198**, 1691.
protein synthesis and degradation in cricket flight muscles: GOMI, OKUDA AND TANAKA **198**, 1071.
sound production in crickets: STEPHEN AND HARTLEY **198**, 2139.
wind-evoked cricket escape behaviour: TAUBER AND CAMHI **198**, 1895.
GTP
hypoxia and organic phosphates in rainbow trout: VAL, LESSARD AND RANDALL **198**, 305.
Guanethidine
electrogenic norepinephrine transporters in humans: GALLI, DeFELICE, DUKE, MOORE AND BLAKELY **198**, 2197.
Gulf toadfish
cortisol and nitrogen metabolism in toadfish: HOPKINS, WOOD AND WALSH **198**, 2229.
feeding and nitrogen excretion in toadfish: WALSH AND MILLIGAN **198**, 1559.
Gut motility
enteric reflexes and nitric oxide in fish intestine: KARILA AND HOLMGREN **198**, 2405.

H^+ pump
function of heterodimeric β-type ATPases: CHOW AND FORTE **198**, 1.
H^+-ATPase
ATPase activity in permeabilized gill cells in the mudsucker: KÜLTZ AND SOMERO **198**, 1883.
H^+-ATPase in crab gills: ONKEN AND PÜTZENLECHNER **198**, 767.
immunolocalization of H^+ pumps in trout pavement cells: SULLIVAN, FRYER AND PERRY **198**, 2619.
Haematophagy
Cimex lectularius nitrophorin: VALENZUELA, WALKER AND RIBEIRO **198**, 1519.
Haemoglobin
Cl^- transport in fish red blood cells: JENSEN AND BRAHM **198**, 2237.
haemoglobin function in intact lamprey erythrocytes: NIKINMAA, AIRAKSINEN AND VIRRKI **198**, 2423.
oxygen affinity of lamprey erythrocytes: AIRAKSINEN AND NIKINMAA **198**, 2393.
Haemolymph
euryhaline crab gill physiology: PILLER, HENRY, DOELLER AND KRAUS **198**, 349.
Haemoprotein
Cimex lectularius nitrophorin: VALENZUELA, WALKER AND RIBEIRO **198**, 1519.
Hagfish
natriuretic peptide receptors in hagfish gills: TOOP, DONALD AND EVANS **198**, 117.
natriuretic peptide receptors in hagfish kidney and aortae: TOOP, DONALD AND EVANS **198**, 1875.
structure and physical properties of invertebrate arteries: DAVISON, WRIGHT AND DEMONT **198**, 2185.

Hair plate
central connections of hair plate sensory neurones: KUENZI AND BURROWS **198**, 1589.
Haldane effect
haemoglobin function in intact lamprey erythrocytes: NIKINMAA, AIRAKSINEN AND VIRRKI **198**, 2423.
Haliotis rufescens
taurine metabolism in mollusc larvae: WELBORN AND MANAHAN **198**, 1791.
Halocline
effects of salinity on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 61.
Harbour seals
tactile sensitivity of mystacial vibrissae in seals: DEHNHARDT AND KAMINSKI **198**, 2317.
Harris' hawk
wing tip slots and drag in a gliding hawk: TUCKER **198**, 775.
Hearing
acoustic startle in scarab beetles: FORREST, FARRIS AND HOY **198**, 2593.
directional responses in grasshopper ears: MICHELSEN AND ROHRSEITZ **198**, 1817.
sound transformation at the mouse pinna: CHEN, CAIN AND JEN **198**, 2007.
Heart
actions of lobster peptide F_1: WORDEN, KRAVITZ AND GOY **198**, 97.
crustacean cardioactive peptides: McGAW, WILKENS, McMAHON AND AIRRIESS **198**, 2547.
heart mitochondrial properties and $\dot{V}_{O_2max}$: CONLEY, CHRISTIAN, HOPPELER AND WEIBEL **198**, 739.
muscle length and work from frog heart: SYME AND JOSEPHSON **198**, 2221.
taurine release from embryonic skate heart: GOLDSTEIN AND DAVIS-AMARAL **198**, 2635.
Heart rate
effects of salinity on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 61.
effects of temperature on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 49.
oxygen consumption in birds during flight: BISHOP AND BUTLER **198**, 2153.
parasympathetic influence in hibernation: HARRIS AND MILSOM **198**, 931.
performance of a perfused crocodile heart: AXELSSON AND FRANKLIN **198**, 2509.
synbranchid sinus arrhythmia: GRAHAM, LAI, CHILLER AND ROBERTS **198**, 1455.
Heartbeat
ventilation and heartbeat in *Octopus vulgaris*: WELLS AND WELLS **198**, 1717.
Heat balance
hindleg energy balance during cold-exposure in the rat: ADÁN, ARDÉVOL, REMESAR, ALEMANY AND FERNANDEZ-LOPEZ **198**, 1243.
Heat exchange
dragonfly flight behaviour and heat production: MAY **198**, 2385.
temperature regulation in a dragonfly: MAY **198**, 2373.
Heat injury
thermotolerance and mitochondrial function in the blowfly: EL-WADAWI AND BOWLER **198**, 2413.
Heat stress
indices of protein damage in *Mytilus trossulus*: HOFMANN AND SOMERO **198**, 1509.
Heavy metal
ion transport by echinoderm gastrointestinal epithelium: ZHUANG, DUERR AND AHEARN **198**, 1207.
Heliothis virescens
proteolipid localization in *Heliothesis virescens*: PIETRANTONIO AND GILL **198**, 2609.
Hemisus marmoratum
feeding in the frog *Hemisus marmoratum*: RITTER AND NISHIKAWA **198**, 2025.
Herring
temperature and fish development: JOHNSTON, VIEIRA AND ABERCROMBY **198**, 1389.
Hibernation
parasympathetic influence in hibernation: HARRIS AND MILSOM **198**, 931.
High-resolution video recording
biomechanics of the cricket's kick: HUSTERT AND GNATZY **198**, 1275.
Hindleg steering
locust hindleg steering: LOREZ **198**, 869.
Hirudo medicinalis
feeding-related inputs to Retzius neurones in *Hirudo medicinalis*: GROOME, VAUGHAN AND LENT **198**, 1233.
modulation of a sensory neurone in the leech: WENNING AND CALABRESE **198**, 1405.
remodelling of an intact neurone in the leech: CALABRESE AND PELLEGRINO **198**, 1989.
Holothurian
the stiffening response of holothurian dermis: TROTTER AND KOOB **198**, 1951.
Homarus americanus
actions of lobster peptide F_1: WORDEN, KRAVITZ AND GOY **198**, 97.
Homing
homing in Cory's shearwater: DALL'ANTONIA, DALL'ANTONIA, BENVENUTI, IOALÈ, MASSA AND BONADONNA **198**, 359.
hydrodynamic orientation by spiny lobsters: NEVITT, PENTCHEFF, LOHMANN AND ZIMMER-FAUST **198**, 2049.
lack of polarization sensitivity in the pigeon: VOS HZN, COEMANS AND NUBOER **198**, 325.
Homology
extensor innervation in the squat lobster *Munida quadrispina*: WALLIS, PAUL, ANTONSEN AND HOLLENBERG **198**, 2453.
serotonin immunoreactivity in a primitive crustacean: HARRISON, MACMILLAN AND YOUNG **198**, 531.
Honeybee
stinging response of the honeybee: OGAWA, KAWAKAMI AND YAMAGUCHI **198**, 39.
Hopping
muscle and tendon stresses during wallaby hopping: BIEWENER AND BAUDINETTE **198**, 1829.
Hormonal control
ion regulation in rainbow trout: POSTLETHWAITE AND McDONALD **198**, 295.
Hornyhead turbot
flatfish prey capture: GIBB **198**, 1173.
Horseshoe crab
structure and physical properties of invertebrate arteries: DAVISON, WRIGHT AND DEMONT **198**, 2185.
Hot-wire anemometer
orientation to air current by walking beetles: BÖHM **198**, 1995.
Hovering
extraordinary flight performance of orchid bees: DUDLEY **198**, 1065.
HPLC
callitachykinins in blowfly: NÄSSEL, KIM AND LUNDQUIST **198**, 2527.
HPLC-EC
feeding-related inputs to Retzius neurones in *Hirudo medicinalis*: GROOME, VAUGHAN AND LENT **198**, 1233.
hsp70
indices of protein damage in *Mytilus trossulus*: HOFMANN AND SOMERO **198**, 1509.
Human locomotion
mechanical work in locomotion: WILLEMS, CAVAGNA AND HEGLUND **198**, 379.

Human norepinephrine transporter
electrogenic norepinephrine transporters in humans: GALLI, DeFELICE, DUKE, MOORE AND BLAKELY **198**, 2197.
Hydraulic
feeding in the frog *Hemisus marmoratum*: RITTER AND NISHIKAWA **198**, 2025.
Hydromedusan
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
Hydroplaning
hydroplaning by ducklings: AIGELDINGER AND FISH **198**, 1567.
Hydrostatic
feeding in the frog *Hemisus marmoratum*: RITTER AND NISHIKAWA **198**, 2025.
5-Hydroxytryptamine
effects of 5-HT on antennal-lobe neurones: MERCER, HAYASHI AND HILDEBRAND **198**, 613.
5-HT neuromodulation in moth antennal lobe: KLOPPENBURG AND HILDEBRAND **198**, 603.
serotonin in mosquito salivary glands: NOVAK, RIBEIRO AND HILDEBRAND **198**, 167.
Hyla chrysoscelis
calling and locomotor frog muscles: McLISTER, STEVENS AND BOGART **198**, 1527.
Hyla cinerea
calling and locomotor frog muscles: McLISTER, STEVENS AND BOGART **198**, 1527.
feeding kinematics of phyllomedusine treefrogs: GRAY AND NISHIKAWA **198**, 457.
Hyla versicolor
calling and locomotor frog muscles: McLISTER, STEVENS AND BOGART **198**, 1527.
Hyperexcitability
recovery of function by sensory neurones in *Aplysia californica*: DULIN, STEFFENSEN, MORRIS AND WALTERS **198**, 2055.
Hypometabolism
crayfish metabolism: ELLIS AND MORRIS **198**, 409.
Hypoxia
buoyancy of gobies in hypoxia: GEE AND GEE **198**, 79.
carbonic anhydrase infusion during hypoxia in fish: LESSARD, VAL, AOTA AND RANDALL **198**, 31.
control of ventilation in *Bufo paracnemis*: BRANCO AND GLASS **198**, 1417.
gas transfer in softwater-acclimated trout: GRECO, GILMOUR, FENWICK AND PERRY **198**, 2557.
hypoxia and organic phosphates in rainbow trout: VAL, LESSARD AND RANDALL **198**, 305.
hypoxic ant ventilation: LIGHTON AND GARRIGAN **198**, 1613.
oxygen availability in gelatinous egg masses: BOOTH **198**, 241.

Identified synapse
modulation of snail buccal muscle contraction: YOSHIDA AND KOBAYASHI **198**, 729.
Iguana
heart mitochondrial properties and $\dot{V}_{O_2max}$: CONLEY, CHRISTIAN, HOPPELER AND WEIBEL **198**, 739.
Image motion
visual distance discrimination in praying mantis: POTESER AND KRAL **198**, 2127.
Immunocytochemistry
callitachykinins in blowfly: NÄSSEL, KIM AND LUNDQUIST **198**, 2527.
immunolocalization of H^+ pumps in trout pavement cells: SULLIVAN, FRYER AND PERRY **198**, 2619.
Immunoreactivity
neurohormones in the crab *Cancer borealis*: CHRISTIE, SKIEBE AND MARDER **198**, 2431.
serotonin immunoreactivity in *Clione limacina*: SATTERLIE, NOREKIAN, JORDAN AND KAZILEK **198**, 895.
serotonin immunoreactivity in a primitive crustacean: HARRISON, MACMILLAN AND YOUNG **198**, 531.
Impedance matching
function of the cicada tymbal: YOUNG AND BENNET-CLARK **198**, 1001.
***In vitro* motility assay**
microtubule–kinesin sliding *in vitro*: SHIRAKAWA, OIWA, CHAEN, SHIMIZU, TANAKA AND SUGI **198**, 1809.
Indirect calorimetry
variation in the respiratory quotient of birds: WALSBERG AND WOLF **198**, 213.
Induced drag
wing tip slots and drag in a gliding hawk: TUCKER **198**, 775.
Inert gas
pulmonary gas exchange in the monitor lizard: HOPKINS, HICKS, COOPER AND POWELL **198**, 1783.
Inertial power
moment of inertia of bird wings: VAN DEN BERG AND RAYNER **198**, 1655.
Infrasound
atmospheric controls on elephant communication: GARSTANG, LAROM, RASPET AND LINDEQUE **198**, 939.
Ingestion
feeding in seabirds: WILSON, PÜTZ, GRÉMILLET, CULIK, KIERSPEL, REGEL, BOST, LAGE AND COOPER **198**, 1115.
Initiation
initiation of locomotion by photoreceptors in the lamprey: DELIAGINA, ULLÉN, GONZALEZ, EHRSSON, ORLOVSKY AND GRILLNER **198**, 2581.
Insect
cockroach DUM neurones and colleterial glands: SINAKEVITCH, GEFFARD, PELHATE AND LAPIED **198**, 1539.
development of locust kicking: NORMAN **198**, 1341.
insect leg function: FULL, YAMAUCHI AND JINDRICH **198**, 2441.
locust first ocellar synapse: SIMMONS **198**, 537.
midgut compartmental analysis in *Manduca sexta*: KOCH AND MOFFETT **198**, 2115.
NO synthesis in locust olfactory interneurones: ELPHICK, RAYNE, RIVEROS-MORENO, MONCADA AND O'SHEA **198**, 821.
octopamine and 'fight or flight' behaviour in a cricket: ADAMO, LINN AND HOY **198**, 1691.
oviductal motor neurones: KALOGIANNI AND THEOPHILIDIS **198**, 507.
patency of goblet valves in insect midgut: MOFFETT, KOCH AND WOODS **198**, 2103.
proteolipid localization in *Heliothesis virescens*: PIETRANTONIO AND GILL **198**, 2609.
thermal adaptation in moth muscle: MARDEN **198**, 2087.
thermally polymorphic dragonflies: MARDEN **198**, 2095.
visual distance discrimination in praying mantis: POTESER AND KRAL **198**, 2127.
water and carbon dioxide loss from the cockroach: CROGHAN, NOBLE-NESBITT AND APPEL **198**, 227.
Insect control
Bacillus thuringiensis toxin and receptor in planar lipid bilayer: MARTIN AND WOLFERSBERGER **198**, 91.
Insect flight
fuels for flight in blister beetle: AUERSWALD AND GÄDE **198**, 1423.
phase and lift in flying locust pairs: CAMHI, SUMBRE AND WENDLER **198**, 1051.
Insect $GABA_B$ receptor
insect $GABA_B$ receptor: BAI AND SATTELLE **198**, 889.
Insect nervous system
callitachykinins in blowfly: NÄSSEL, KIM AND LUNDQUIST **198**, 2527.
Insect vision
spectral sensitivity of hawkmoth feeding: CUTLER, BENNETT, STEVENSON AND WHITE **198**, 1909.

Integument
electrical models of cockroach integument: SMITH, MACHIN AND LAMPERT **198**, 249.
Intermittent flight
intermittent flight in starlings: TOBALSKE **198**, 1259.
Internal work
mechanical work in locomotion: WILLEMS, CAVAGNA AND HEGLUND **198**, 379.
Interneurone
flight initiation in *Drosophila melanogaster*: TRIMARCHI AND SCHNEIDERMAN **198**, 1099.
Interspecific differences
Cl^- transport in fish red blood cells: JENSEN AND BRAHM **198**, 2237.
Interspecific variation
the Young's modulus of feather keratin: BONSER AND PURSLOW **198**, 1029.
Intestine
enteric reflexes and nitric oxide in fish intestine: KARILA AND HOLMGREN **198**, 2405.
Intracellular freezing
intracellular freezing in a nematode: WHARTON AND FERNS **198**, 1381.
Intracellular pH
effects of bafilomycinon A_1 sheep macrophage pH: HEMING, TRABER, HINDER AND BIDANI **198**, 1711.
recovery of ubiquitination in *Artemia franciscana*: ANCHORDOGUY AND HAND **198**, 1299.
Intracellular recording
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
Invertebrate
lobster magnetic compass: LOHMANN, PENTCHEFF, NEVITT, STETTEN, ZIMMER-FAUST, JARRARD AND BOLES **198**, 2041.
rhythmicity in insect thoracic nerve cord: BÜSCHGES, SCHMITZ AND BÄSSLER **198**, 435.
Iodoacetic acid
energy status in anoxic fish brain: JOHANSSON AND NILSSON **198**, 2575.
Ion channel
ion transport by echinoderm gastrointestinal epithelium: ZHUANG, DUERR AND AHEARN **198**, 1207.
Ion permeability
ion regulation in rainbow trout: POSTLETHWAITE AND McDONALD **198**, 295.
Ion transport
ATPase activity in permeabilized gill cells in the mudsucker: KÜLTZ AND SOMERO **198**, 1883.
ion regulation in rainbow trout: POSTLETHWAITE AND McDONALD **198**, 295.
Ion-coupled transport
electrogenic norepinephrine transporters in humans: GALLI, DeFELICE, DUKE, MOORE AND BLAKELY **198**, 2197.
Ionoregulation
spider excretion: BUTT AND TAYLOR **198**, 1137.
Isoenzyme
malate dehydrogenases of barracudas: LIN AND SOMERO **198**, 551.
Isopod
deep-sea spiders that walk through the water: MARSHALL AND DIEBEL **198**, 1371.

Jamming avoidance response
electrosensory thresholds in *Eigenmannia*: KAUNZINGER AND KRAMER **198**, 2365.
Jellyfish
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
Joint coordination
rhythmicity in insect thoracic nerve cord: BÜSCHGES, SCHMITZ AND BÄSSLER **198**, 435.
Jumping
development of locust kicking: NORMAN **198**, 1341.
flight initiation in *Drosophila melanogaster*: TRIMARCHI AND SCHNEIDERMAN **198**, 1099.
visual targeting in flea-beetles: BRACKENBURY AND WANG **198**, 1931.
wind-evoked cricket escape behaviour: TAUBER AND CAMHI **198**, 1895.
Juvenile
branchial chloride cells in young tilapia: LI, EYGENSTEYN, LOCK, VERBOST, VAN DER HEIJDEN, WENDELAAR BONGA AND FLIK **198**, 2177.

K^+ channel
pore properties of a stretch-activated K^+ channel in *Lymnaea stagnalis*: SMALL AND MORRIS **198**, 1919.
K^+ transport
K^+ and amino acid transport in carp red blood cells: JENSEN **198**, 155.
K^+-selective microelectrode
patency of goblet valves in insect midgut: MOFFETT, KOCH AND WOODS **198**, 2103.
Key innovation
epaxial muscle function in a lizard: RITTER **198**, 2477.
Kick
development of locust kicking: NORMAN **198**, 1341.
Kidney function
ammonia and urea metabolism in an elasmobranch: WOOD, PÄRT AND WRIGHT **198**, 1545.
Killifish
acclimation of burst escape performance in fish: JOHNSON AND BENNETT **198**, 2165.
Kinematics
acclimation of burst escape performance in fish: JOHNSON AND BENNETT **198**, 2165.
bass steady swimming: JAYNE AND LAUDER **198**, 585.
feeding in the frog *Hemisus marmoratum*: RITTER AND NISHIKAWA **198**, 2025.
feeding kinematics of phyllomedusine treefrogs: GRAY AND NISHIKAWA **198**, 457.
flatfish prey capture: GIBB **198**, 1173.
hydroplaning by ducklings: AIGELDINGER AND FISH **198**, 1567.
intermittent flight in starlings: TOBALSKE **198**, 1259.
ontogenetic stereotypy in salamander feeding: REILLY **198**, 701.
scaling of feeding kinematics: RICHARD AND WAINWRIGHT **198**, 419.
sunfish capture and transport behaviour: GILLIS AND LAUDER **198**, 709.
visual targeting in flea-beetles: BRACKENBURY AND WANG **198**, 1931.
Kinetics
Ca^{2+} exchange in frog skin: STIFFLER **198**, 967.
kinetics of free walking in crayfish: JAMON AND CLARAC **198**, 683.
Knollenorgan
electrosensory thresholds in larvae of a mormyrid fish: POSTNER AND KRAMER **198**, 783.

Lactate
metabolite transport in eel erythrocytes: SOENGAS AND MOON **198**, 877.
Lactate production
microcalorimetry on crucian carp brain: JOHANSSON, NILSSON AND TÖRNBLOM **198**, 853.
Lagopus lagopus
longitudinal variation in bone mechanics: BONSER **198**, 209.

Lamella
erythrocyte deformation in fish gills: NILSSON, LÖFMAN AND BLOCK **198**, 1151.
Lampetra fluviatilis
control of pitch and roll in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 665.
haemoglobin function in intact lamprey erythrocytes: NIKINMAA, AIRAKSINEN AND VIRRKI **198**, 2423.
initiation of locomotion by photoreceptors in the lamprey: DELIAGINA, ULLÉN, GONZALEZ, EHRSSON, ORLOVSKY AND GRILLNER **198**, 2581.
oxygen affinity of lamprey erythrocytes: AIRAKSINEN AND NIKINMAA **198**, 2393.
visual influence on spatial orientation in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 675.
Lamprey
control of pitch and roll in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 665.
haemoglobin function in intact lamprey erythrocytes: NIKINMAA, AIRAKSINEN AND VIRRKI **198**, 2423.
initiation of locomotion by photoreceptors in the lamprey: DELIAGINA, ULLÉN, GONZALEZ, EHRSSON, ORLOVSKY AND GRILLNER **198**, 2581.
oxygen affinity of lamprey erythrocytes: AIRAKSINEN AND NIKINMAA **198**, 2393.
structure and physical properties of invertebrate arteries: DAVISON, WRIGHT AND DEMONT **198**, 2185.
visual influence on spatial orientation in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 675.
Largemouth bass
bass red muscle activity: JAYNE AND LAUDER **198**, 1575.
bass steady swimming: JAYNE AND LAUDER **198**, 585.
motor pattern allometry in *Micropterus salmoides*: WAINWRIGHT AND RICHARD **198**, 1161.
scaling of feeding kinematics: RICHARD AND WAINWRIGHT **198**, 419.
Larus argentatus
longitudinal variation in bone mechanics: BONSER **198**, 209.
Larva
branchial chloride cells in young tilapia: LI, EYGENSTEYN, LOCK, VERBOST, VAN DER HEIJDEN, WENDELAAR BONGA AND FLIK **198**, 2177.
induction of urea cycle enzymes in larval trout: WRIGHT, FELSKIE AND ANDERSON **198**, 127.
mRNA-induced leucine transport in a lepidopteran larva: SACCHI, PEREGO AND MAGAGNIN **198**, 961.
proteolipid localization in *Heliothesis virescens*: PIETRANTONIO AND GILL **198**, 2609.
taurine metabolism in mollusc larvae: WELBORN AND MANAHAN **198**, 1791.
Laser interferometry
ventilation and hearing in the locust: MEYER AND HEDWIG **198**, 1327.
Laser scanning confocal microscopy
immunolocalization of H^+ pumps in trout pavement cells: SULLIVAN, FRYER AND PERRY **198**, 2619.
Laser vibrometry
ventilation and hearing in the locust: MEYER AND HEDWIG **198**, 1327.
Lasiurus borealis
flight speeds and energetics of foraging bats: DE LA CUEVA SALCEDO, FENTON, HICKEY AND BLAKE **198**, 2245.
Lasiurus cinereus
flight speeds and energetics of foraging bats: DE LA CUEVA SALCEDO, FENTON, HICKEY AND BLAKE **198**, 2245.
Lateral bending
epaxial muscle function in a lizard: RITTER **198**, 2477.
Lateral line
initiation of locomotion by photoreceptors in the lamprey: DELIAGINA, ULLÉN, GONZALEZ, EHRSSON, ORLOVSKY AND GRILLNER **198**, 2581.
Leech
modulation of a sensory neurone in the leech: WENNING AND CALABRESE **198**, 1405.
remodelling of an intact neurone in the leech: CALABRESE AND PELLEGRINO **198**, 1989.
Leg coordination
kinetics of free walking in crayfish: JAMON AND CLARAC **198**, 683.
Length
muscle length and work from frog heart: SYME AND JOSEPHSON **198**, 2221.
Leopard frog
metabolism during dehydration in leopard frogs: CHURCHILL AND STOREY **198**, 147.
Lepidoptera
mRNA-induced leucine transport in a lepidopteran larva: SACCHI, PEREGO AND MAGAGNIN **198**, 961.
proteolipid localization in *Heliothesis virescens*: PIETRANTONIO AND GILL **198**, 2609.
Lepomis macrochirus
sunfish capture and transport behaviour: GILLIS AND LAUDER **198**, 709.
Leucine cotransport
mRNA-induced leucine transport in a lepidopteran larva: SACCHI, PEREGO AND MAGAGNIN **198**, 961.
Leucomyosuppressin
dynamics of neurochemical action in *Aedes aegypti*: MESSER AND BROWN **198**, 2325.
Leukocyte
effects of bafilomycinon A_1 sheep macrophage pH: HEMING, TRABER, HINDER AND BIDANI **198**, 1711.
Libellula pulchella
thermally polymorphic dragonflies: MARDEN **198**, 2095.
Lift
phase and lift in flying locust pairs: CAMHI, SUMBRE AND WENDLER **198**, 1051.
Liver
induction of urea cycle enzymes in larval trout: WRIGHT, FELSKIE AND ANDERSON **198**, 127.
Lizard
epaxial muscle function in a lizard: RITTER **198**, 2477.
Load compensation
control of abdominal posture in crayfish: McCARTHY AND MACMILLAN **198**, 2253.
Lobster
actions of lobster peptide F_1: WORDEN, KRAVITZ AND GOY **198**, 97.
lobster magnetic compass: LOHMANN, PENTCHEFF, NEVITT, STETTEN, ZIMMER-FAUST, JARRARD AND BOLES **198**, 2041.
structure and physical properties of invertebrate arteries: DAVISON, WRIGHT AND DEMONT **198**, 2185.
Locomotion
bass red muscle activity: JAYNE AND LAUDER **198**, 1575.
bass steady swimming: JAYNE AND LAUDER **198**, 585.
centipede locomotion: ANDERSON, SHULTZ AND JAYNE **198**, 1185.
computer model of the insect leg: FULL AND AHN **198**, 1285.
control of pitch and roll in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 665.
deep-sea spiders that walk through the water: MARSHALL AND DIEBEL **198**, 1371.
development of synchronous stepping: BLUMBERG-FELDMAN AND EILAM **198**, 363.
dynamic EMG–force relationship: GUIMARAES, HERZOG, ALLINGER AND ZHANG **198**, 975.
electromotor coupling of cilia in *Didinium nasutum*: PERNBERG AND MACHEMER **198**, 2537.

elephant energetics: LANGMAN, ROBERTS, BLACK, MALOIY, HEGLUND, WEBER, KRAM AND TAYLOR **198**, 629.
epaxial muscle function in a lizard: RITTER **198**, 2477.
initiation of locomotion by photoreceptors in the lamprey: DELIAGINA, ULLÉN, GONZALEZ, EHRSSON, ORLOVSKY AND GRILLNER **198**, 2581.
insect leg function: FULL, YAMAUCHI AND JINDRICH **198**, 2441.
integrating field and laboratory studies of locomotion: WEINSTEIN **198**, 989.
kinetics of free walking in crayfish: JAMON AND CLARAC **198**, 683.
locust walking motor patterns: DUCH AND PFLÜGER **198**, 1963.
mechanics of mammalian muscle: JAMES, ALTRINGHAM AND GOLDSPINK **198**, 491.
muscle tendon compliance: JAMES, YOUNG AND ALTRINGHAM **198**, 503.
swimming kinematics of sculpin: BEDDOW, VAN LEEUWEN AND JOHNSTON **198**, 203.
temperature regulation of dolphin testes: PABST, ROMMEL, McLELLAN, WILLIAMS AND ROWLES **198**, 221.
visual influence on spatial orientation in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 675.
within-myomere recruitment patterns: JAYNE AND LAUDER **198**, 805.

Locomotor activity
behavioural response to 17α,20β-P: BJERSELIUS, OLSÉN AND ZHENG **198**, 747.

Locust
central connections of hair plate sensory neurones: KUENZI AND BURROWS **198**, 1589.
development of locust kicking: NORMAN **198**, 1341.
directional responses in grasshopper ears: MICHELSEN AND ROHRSEITZ **198**, 1817.
locust first ocellar synapse: SIMMONS **198**, 537.
locust hindleg steering: LOREZ **198**, 869.
locust tension receptor: MATHESON AND FIELD **198**, 1673.
locust walking motor patterns: DUCH AND PFLÜGER **198**, 1963.
NO synthesis in locust olfactory interneurones: ELPHICK, RAYNE, RIVEROS-MORENO, MONCADA AND O'SHEA **198**, 821.
ovipositor mechanoreceptors in the locust: KALOGIANNI **198**, 1359.
phase and lift in flying locust pairs: CAMHI, SUMBRE AND WENDLER **198**, 1051.
wind-evoked cricket escape behaviour: TAUBER AND CAMHI **198**, 1895.

***Locusta*-diuretic peptide**
hormonal function of *Locusta*-DP: PATEL, HAYES AND COAST **198**, 793.

Locusta migratoria
hormonal function of *Locusta*-DP: PATEL, HAYES AND COAST **198**, 793.
locust first ocellar synapse: SIMMONS **198**, 537.
locust hindleg steering: LOREZ **198**, 869.
locust tension receptor: MATHESON AND FIELD **198**, 1673.
phase and lift in flying locust pairs: CAMHI, SUMBRE AND WENDLER **198**, 1051.
ventilation and hearing in the locust: MEYER AND HEDWIG **198**, 1327.

Loligo vulgaris
dye coupling in squid chromatophore muscles: REED **198**, 2631.

Lolliguncula brevis
squid dorsal light reflex: PREUSS AND BUDELMANN **198**, 1157.

Longitudinal variation
longitudinal variation in bone mechanics: BONSER **198**, 209.
the Young's modulus of feather keratin: BONSER AND PURSLOW **198**, 1029.

Low-frequency sound
atmospheric controls on elephant communication: GARSTANG, LAROM, RASPET AND LINDEQUE **198**, 939.

Low pH
copper and ammonia levels and swimming in trout: BEAUMONT, BUTLER AND TAYLOR **198**, 2213.

Loxodonta africana
atmospheric controls on elephant communication: GARSTANG, LAROM, RASPET AND LINDEQUE **198**, 939.

Lucifer Yellow
dye coupling in squid chromatophore muscles: REED **198**, 2631.

Lymnaea stagnalis
chemosensitivity of pond snail osphradia: WEDEMEYER AND SCHILD **198**, 1743.
pore properties of a stretch-activated K^+ channel in *Lymnaea stagnalis*: SMALL AND MORRIS **198**, 1919.

Macropus eugenii
muscle and tendon stresses during wallaby hopping: BIEWENER AND BAUDINETTE **198**, 1829.

Macropus rufogriseus
creep of wallaby tendons: WANG AND KER **198**, 831.
fatigue of wallaby tendons: WANG, KER AND ALEXANDER **198**, 847.

Magnetic compass
lobster magnetic compass: LOHMANN, PENTCHEFF, NEVITT, STETTEN, ZIMMER-FAUST, JARRARD AND BOLES **198**, 2041.

Magnetite
particle-based magnetoreceptor in the bobolink: BEASON, DUSSOURD AND DEUTSCHLANDER **198**, 141.

Magnetoreception
lobster magnetic compass: LOHMANN, PENTCHEFF, NEVITT, STETTEN, ZIMMER-FAUST, JARRARD AND BOLES **198**, 2041.
particle-based magnetoreceptor in the bobolink: BEASON, DUSSOURD AND DEUTSCHLANDER **198**, 141.

Malate dehydrogenase
malate dehydrogenases of barracudas: LIN AND SOMERO **198**, 551.

Mallard
hydroplaning by ducklings: AIGELDINGER AND FISH **198**, 1567.

Malpighian tubule
fluid reabsorption by *Drosphila* Malpighian tubules: O'DONNELL AND MADDRELL **198**, 1647.

Mammal
mechanics of mammalian muscle: JAMES, ALTRINGHAM AND GOLDSPINK **198**, 491.
muscle tendon compliance: JAMES, YOUNG AND ALTRINGHAM **198**, 503.

Manduca sexta
a novel proline, glycine: K^+ symporter: BADER, PARTHASARATHY AND HARVEY **198**, 2599.
adipokinetic hormone in the insect CNS: **198**, 1307.
Bacillus thuringiensis toxin and receptor in planar lipid bilayer: MARTIN AND WOLFERSBERGER **198**, 91.
cage size and flight speed in the tobacco hawkmoth: STEVENSON, CORBO, BACA AND QUANG **198**, 1665.
effects of 5-HT on antennal-lobe neurones: MERCER, HAYASHI AND HILDEBRAND **198**, 613.
5-HT neuromodulation in moth antennal lobe: KLOPPENBURG AND HILDEBRAND **198**, 603.
midgut compartmental analysis in *Manduca sexta*: KOCH AND MOFFETT **198**, 2115.
patency of goblet valves in insect midgut: MOFFETT, KOCH AND WOODS **198**, 2103.
spectral sensitivity of hawkmoth feeding: CUTLER, BENNETT, STEVENSON AND WHITE **198**, 1909.
thermal adaptation in moth muscle: MARDEN **198**, 2087.

Marine turtle
perception of wave direction by turtles: LOHMANN, SWARTZ AND LOHMANN **198**, 1079.

Matrotrophic viviparity
matrotrophic viviparity in rockfish: MACFARLANE AND BOWERS **198**, 1197.
Mechanical competence
longitudinal variation in bone mechanics: BONSER **198**, 209.
Mechanical modelling
mechanical control of swimming speed in fish: McHENRY, PELL AND LONG **198**, 2293.
Mechanical properties
structure and physical properties of invertebrate arteries: DAVISON, WRIGHT AND DEMONT **198**, 2185.
Mechanical resonator
function of the cicada tymbal: YOUNG AND BENNET-CLARK **198**, 1001.
Mechanics
computer model of the insect leg: FULL AND AHN **198**, 1285.
insect leg function: FULL, YAMAUCHI AND JINDRICH **198**, 2441.
mechanics of mammalian muscle: JAMES, ALTRINGHAM AND GOLDSPINK **198**, 491.
Mechanoreceptor
central connections of hair plate sensory neurones: KUENZI AND BURROWS **198**, 1589.
locust hair plate receptor: NEWLAND, WATKINS, EMPTAGE AND NAGAYAMA **198**, 2397.
ovipositor mechanoreceptors in the locust: KALOGIANNI **198**, 1359.
Mechanosensitive channel
pore properties of a stretch-activated K^+ channel in *Lymnaea stagnalis*: SMALL AND MORRIS **198**, 1919.
Medial octavolateral nucleus
initiation of locomotion by photoreceptors in the lamprey: DELIAGINA, ULLÉN, GONZALEZ, EHRSSON, ORLOVSKY AND GRILLNER **198**, 2581.
Melatonin
distribution of melatonin binding sites in avian brains: SCHNEIDER **198**, 1943.
Melatonin binding sites
distribution of melatonin binding sites in avian brains: SCHNEIDER **198**, 1943.
Melting
differential scanning calorimetry of *Globodera rostochiensis* cysts: WHARTON AND RAMLØV **198**, 2551.
Membrane function
haemoglobin function in intact lamprey erythrocytes: NIKINMAA, AIRAKSINEN AND VIRRKI **198**, 2423.
Membrane permeability
Bacillus thuringiensis toxin and receptor in planar lipid bilayer: MARTIN AND WOLFERSBERGER **198**, 91.
Membrane permeation
K^+ and amino acid transport in carp red blood cells: JENSEN **198**, 155.
Membrane pore
Bacillus thuringiensis toxin and receptor in planar lipid bilayer: MARTIN AND WOLFERSBERGER **198**, 91.
Membrane transport
nitrogen excretion: WRIGHT **198**, 273.
Memory
regeneration and sprouting of sensory neurones: STEFFENSEN, DULIN, WALTERS AND MORRIS **198**, 2067.
Messor julianus
comparative gas exchange in *Messor*: LIGHTON AND BERRIGAN **198**, 521.
Messor pergandei
comparative gas exchange in *Messor*: LIGHTON AND BERRIGAN **198**, 521.
Metabolic depression
microcalorimetry on crucian carp brain: JOHANSSON, NILSSON AND TÖRNBLOM **198**, 853.
Metabolic rate
crayfish metabolism: ELLIS AND MORRIS **198**, 409.
elephant energetics: LANGMAN, ROBERTS, BLACK, MALOIY, HEGLUND, WEBER, KRAM AND TAYLOR **198**, 629.
hypoxic ant ventilation: LIGHTON AND GARRIGAN **198**, 1613.
Metabolism
adjustment of K' to varying pH and pMg: GOLDING, TEAGUE AND DOBSON **198**, 1775.
energy use by developing marine animals: HOEGH-GULDBERG AND MANAHAN **198**, 19.
fuels for flight in blister beetle: AUERSWALD AND GÄDE **198**, 1423.
glucose transport in carp red blood cells: TIIHONEN, NIKINMAA AND LAPPIVAARA **198**, 577.
metabolite transport in eel erythrocytes: SOENGAS AND MOON **198**, 877.
nitrogen excretion: WRIGHT **198**, 273.
solar heat gain and coat colour: WALSBERG AND WOLF **198**, 1499.
Metallothionein
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
Metathoracic leg
cricket femoral chordotonal organ: NOWEL, SHELTON AND STEPHEN **198**, 1977.
Microinjection
adipokinetic hormone in the insect CNS: **198**, 1307.
Micropterus salmoides
bass red muscle activity: JAYNE AND LAUDER **198**, 1575.
bass steady swimming: JAYNE AND LAUDER **198**, 585.
motor pattern allometry in *Micropterus salmoides*: WAINWRIGHT AND RICHARD **198**, 1161.
scaling of feeding kinematics: RICHARD AND WAINWRIGHT **198**, 419.
within-myomere recruitment patterns: JAYNE AND LAUDER **198**, 805.
Microtubule
microtubule sliding in beating flagella: SHINGYOJI, YOSHIMURA, ESHEL, AKAHASHI AND GIBBONS **198**, 645.
Microtubule–kinesin sliding
microtubule–kinesin sliding *in vitro*: SHIRAKAWA, OIWA, CHAEN, SHIMIZU, TANAKA AND SUGI **198**, 1809.
Midgut
midgut compartmental analysis in *Manduca sexta*: KOCH AND MOFFETT **198**, 2115.
mRNA-induced leucine transport in a lepidopteran larva: SACCHI, PEREGO AND MAGAGNIN **198**, 961.
patency of goblet valves in insect midgut: MOFFETT, KOCH AND WOODS **198**, 2103.
Mitochondria
branchial chloride cells in young tilapia: LI, EYGENSTEYN, LOCK, VERBOST, VAN DER HEIJDEN, WENDELAAR BONGA AND FLIK **198**, 2177.
euryhaline crab gill physiology: PILLER, HENRY, DOELLER AND KRAUS **198**, 349.
heart mitochondrial properties and $\dot{V}_{O_2max}$: CONLEY, CHRISTIAN, HOPPELER AND WEIBEL **198**, 739.
thermotolerance and mitochondrial function in the blowfly: EL-WADAWI AND BOWLER **198**, 2413.
Mitochondria-rich cell
ATPase activity in permeabilized gill cells in the mudsucker: KÜLTZ AND SOMERO **198**, 1883.
Mitochondrial respiratory rate
fuels for flight in blister beetle: AUERSWALD AND GÄDE **198**, 1423.
Modulation
cerebral modulatory neurones in *Clione limacina*: SATTERLIE AND NOREKIAN **198**, 917.
modulation of snail buccal muscle contraction: YOSHIDA AND KOBAYASHI **198**, 729.
peripheral modulatory neurones in *Clione limacina*: SATTERLIE **198**, 905.

serotonin immunoreactivity in *Clione limacina*: SATTERLIE, NOREKIAN, JORDAN AND KAZILEK **198**, 895.
Molecular-mass-dependent intrapulmonary gas mixing
pulmonary gas exchange in the monitor lizard: HOPKINS, HICKS, COOPER AND POWELL **198**, 1783.
Mollusc
cerebral modulatory neurones in *Clione limacina*: SATTERLIE AND NOREKIAN **198**, 917.
oxygen availability in gelatinous egg masses: BOOTH **198**, 241.
peripheral modulatory neurones in *Clione limacina*: SATTERLIE **198**, 905.
pore properties of a stretch-activated K^+ channel in *Lymnaea stagnalis*: SMALL AND MORRIS **198**, 1919.
serotonin immunoreactivity in *Clione limacina*: SATTERLIE, NOREKIAN, JORDAN AND KAZILEK **198**, 895.
taurine metabolism in mollusc larvae: WELBORN AND MANAHAN **198**, 1791.
Moment of inertia
moment of inertia of bird wings: VAN DEN BERG AND RAYNER **198**, 1655.
Monopterus albus
synbranchid sinus arrhythmia: GRAHAM, LAI, CHILLER AND ROBERTS **198**, 1455.
Mormyridae
electrosensory thresholds in larvae of a mormyrid fish: POSTNER AND KRAMER **198**, 783.
Mosquito
dynamics of neurochemical action in *Aedes aegypti*: MESSER AND BROWN **198**, 2325.
serotonin in mosquito salivary glands: NOVAK, RIBEIRO AND HILDEBRAND **198**, 167.
Moth
thermal adaptation in moth muscle: MARDEN **198**, 2087.
Motion analysis
integrating field and laboratory studies of locomotion: WEINSTEIN **198**, 989.
Motion parallax
visual distance discrimination in praying mantis: POTESER AND KRAL **198**, 2127.
Motor control
central connections of hair plate sensory neurones: KUENZI AND BURROWS **198**, 1589.
Motor coordination
biomechanics of the cricket's kick: HUSTERT AND GNATZY **198**, 1275.
Motor neurone
central connections of hair plate sensory neurones: KUENZI AND BURROWS **198**, 1589.
extensor innervation in the squat lobster *Munida quadrispina*: WALLIS, PAUL, ANTONSEN AND HOLLENBERG **198**, 2453.
locust hindleg steering: LOREZ **198**, 869.
membrane currents in swimmeret motor neurones: CHRACHRI **198**, 1483.
oviductal motor neurones: KALOGIANNI AND THEOPHILIDIS **198**, 507.
Motor neurone D_f
insect $GABA_B$ receptor: BAI AND SATTELLE **198**, 889.
Motor pattern
development of locust kicking: NORMAN **198**, 1341.
locust walking motor patterns: DUCH AND PFLÜGER **198**, 1963.
motor pattern allometry in *Micropterus salmoides*: WAINWRIGHT AND RICHARD **198**, 1161.
Motor programme
stinging response of the honeybee: OGAWA, KAWAKAMI AND YAMAGUCHI **198**, 39.
Mouse
daily variations in response to noradrenaline: HAIM, McDEVITT AND SPEAKMAN **198**, 561.
mechanics of mammalian muscle: JAMES, ALTRINGHAM AND GOLDSPINK **198**, 491.
muscle tendon compliance: JAMES, YOUNG AND ALTRINGHAM **198**, 503.
sound transformation at the mouse pinna: CHEN, CAIN AND JEN **198**, 2007.
Movement
integrating field and laboratory studies of locomotion: WEINSTEIN **198**, 989.
Mudsucker
ATPase activity in permeabilized gill cells in the mudsucker: KÜLTZ AND SOMERO **198**, 1883.
Multipolar neurone
locust tension receptor: MATHESON AND FIELD **198**, 1673.
Munida quadrispina
extensor innervation in the squat lobster *Munida quadrispina*: WALLIS, PAUL, ANTONSEN AND HOLLENBERG **198**, 2453.
Munnopsid
deep-sea spiders that walk through the water: MARSHALL AND DIEBEL **198**, 1371.
Mus musculus
sound transformation at the mouse pinna: CHEN, CAIN AND JEN **198**, 2007.
Muscarinic acetylcholine receptor
expression of a cloned muscarinic acetylcholine receptor: MILLAR, BAYLIS, REAPER, BUNTING, MASON AND SATTELLE **198**, 1843.
Muscarinic agonist
rhythmicity in insect thoracic nerve cord: BÜSCHGES, SCHMITZ AND BÄSSLER **198**, 435.
Muscle
acclimation of burst escape performance in fish: JOHNSON AND BENNETT **198**, 2165.
bass red muscle activity: JAYNE AND LAUDER **198**, 1575.
calling and locomotor frog muscles: McLISTER, STEVENS AND BOGART **198**, 1527.
centipede locomotion: ANDERSON, SHULTZ AND JAYNE **198**, 1185.
enzyme activity in fish growth studies: PELLETIER, BLIER, DUTIL AND GUDERLEY **198**, 1493.
epaxial muscle function in a lizard: RITTER **198**, 2477.
extraordinary flight performance of orchid bees: DUDLEY **198**, 1065.
hindleg energy balance during cold-exposure in the rat: ADÁN, ARDÉVOL, REMESAR, ALEMANY AND FERNANDEZ-LOPEZ **198**, 1243.
insect leg function: FULL, YAMAUCHI AND JINDRICH **198**, 2441.
intermittent flight in starlings: TOBALSKE **198**, 1259.
mechanics of mammalian muscle: JAMES, ALTRINGHAM AND GOLDSPINK **198**, 491.
motor pattern allometry in *Micropterus salmoides*: WAINWRIGHT AND RICHARD **198**, 1161.
muscle contractile properties in sculpin: BEDDOW AND JOHNSTON **198**, 193.
muscle length and work from frog heart: SYME AND JOSEPHSON **198**, 2221.
muscle power during fast-starts in short-horned sculpin: JOHNSTON, VAN LEEUWEN, DAVIES AND BEDDOW **198**, 1851.
muscle tendon compliance: JAMES, YOUNG AND ALTRINGHAM **198**, 503.
myosin expression in small muscle fibres of carp: ENNION, GAUVRY, BUTTERWORTH AND GOLDSPINK **198**, 1603.
papillary muscle work production: LAYLAND, YOUNG AND ALTRINGHAM **198**, 2491.
peripheral modulatory neurones in *Clione limacina*: SATTERLIE **198**, 905.
protein synthesis and degradation in cricket flight muscles: GOMI, OKUDA AND TANAKA **198**, 1071.
serotonin immunoreactivity in *Clione limacina*: SATTERLIE, NOREKIAN, JORDAN AND KAZILEK **198**, 895.
thermal adaptation in moth muscle: MARDEN **198**, 2087.
tuning in to fish swimming waves: WARDLE, VIDELER AND ALTRINGHAM **198**, 1629.

within-myomere recruitment patterns: JAYNE AND LAUDER **198**, 805.
Muscle contraction
allelic variation in fish myosin light chains: CROCKFORD, JOHNSTON AND McANDREW **198**, 2501.
dynamic EMG–force relationship: GUIMARAES, HERZOG, ALLINGER AND ZHANG **198**, 975.
Muscle spindle
locust tension receptor: MATHESON AND FIELD **198**, 1673.
Muscle tension receptor
locust tension receptor: MATHESON AND FIELD **198**, 1673.
Muscle–tendon force
muscle and tendon stresses during wallaby hopping: BIEWENER AND BAUDINETTE **198**, 1829.
Muskrat
cardiac response to diving in muskrats: SIGNORE AND JONES **198**, 2307.
Mussel
exotic collagen gradients in the mussel: QIN AND WAITE **198**, 633.
zebra mussel potassium transport: WILCOX AND DIETZ **198**, 861.
Myocardium
heart mitochondrial properties and $\dot{V}_{O_2max}$: CONLEY, CHRISTIAN, HOPPELER AND WEIBEL **198**, 739.
Myogenesis
temperature and fish development: JOHNSTON, VIEIRA AND ABERCROMBY **198**, 1389.
Myosin
allelic variation in fish myosin light chains: CROCKFORD, JOHNSTON AND McANDREW **198**, 2501.
Myosin heavy chain
myosin expression in small muscle fibres of carp: ENNION, GAUVRY, BUTTERWORTH AND GOLDSPINK **198**, 1603.
Myotomal muscle
tuning in to fish swimming waves: WARDLE, VIDELER AND ALTRINGHAM **198**, 1629.
Myoxocephalus scorpius
muscle contractile properties in sculpin: BEDDOW AND JOHNSTON **198**, 193.
muscle power during fast-starts in short-horned sculpin: JOHNSTON, VAN LEEUWEN, DAVIES AND BEDDOW **198**, 1851.
swimming kinematics of sculpin: BEDDOW, VAN LEEUWEN AND JOHNSTON **198**, 203.
Mytilus californianus
basolateral taurine transport in *Mytilus* gill: NEUFELD AND WRIGHT **198**, 465.
Mytilus edulis
exotic collagen gradients in the mussel: QIN AND WAITE **198**, 633.
Mytilus trossulus
indices of protein damage in *Mytilus trossulus*: HOFMANN AND SOMERO **198**, 1509.
Myxine glutinosa
natriuretic peptide receptors in hagfish gills: TOOP, DONALD AND EVANS **198**, 117.
natriuretic peptide receptors in hagfish kidney and aortae: TOOP, DONALD AND EVANS **198**, 1875.

Na^+ current
Na^+ and Ca^{2+} currents in *Aplysia californica*: FIEBER **198**, 2337.
Na^+ pump
function of heterodimeric β-type ATPases: CHOW AND FORTE **198**, 1.
Na^+/K^+-ATPase
ATPase activity in permeabilized gill cells in the mudsucker: KÜLTZ AND SOMERO **198**, 1883.
branchial chloride cells in young tilapia: LI, EYGENSTEYN, LOCK, VERBOST, VAN DER HEIJDEN, WENDELAAR BONGA AND FLIK **198**, 2177.
euryhaline crab gill physiology: PILLER, HENRY, DOELLER AND KRAUS **198**, 349.
Na^+/K^+-ATPase in antarctic fish: GONZALEZ-CABRERA, DOWD, PEDIBHOTLA, ROSARIO, STANLEY-SAMUELSON AND PETZEL **198**, 2279.
$2Na^+/1H^+$ exchange
ion transport by echinoderm gastrointestinal epithelium: ZHUANG, DUERR AND AHEARN **198**, 1207.
Nadolol
cardiac response to diving in muskrats: SIGNORE AND JONES **198**, 2307.
NADPH diaphorase
NO synthesis in locust olfactory interneurones: ELPHICK, RAYNE, RIVEROS-MORENO, MONCADA AND O'SHEA **198**, 821.
L-NAME
enteric reflexes and nitric oxide in fish intestine: KARILA AND HOLMGREN **198**, 2405.
Natriuretic peptide
natriuretic peptide receptors in hagfish gills: TOOP, DONALD AND EVANS **198**, 117.
natriuretic peptide receptors in hagfish kidney and aortae: TOOP, DONALD AND EVANS **198**, 1875.
Navigation
hydrodynamic orientation by spiny lobsters: NEVITT, PENTCHEFF, LOHMANN AND ZIMMER-FAUST **198**, 2049.
Neck proprioceptor
squid dorsal light reflex: PREUSS AND BUDELMANN **198**, 1157.
Necrophorus humator
orientation to air current by walking beetles: BÖHM **198**, 1995.
Nematode
differential scanning calorimetry of *Globodera rostochiensis* cysts: WHARTON AND RAMLØV **198**, 2551.
intracellular freezing in a nematode: WHARTON AND FERNS **198**, 1381.
Nereis virens
adenylate compartmentation in polychaete coelomic cells: HOEGER, DUNN AND MÄRKER **198**, 2079.
Nerve net
L-Dopa in sea anemones: HUDMAN AND McFARLANE **198**, 1045.
nerve nets in sea anemones: CHO AND McFARLANE **198**, 817.
Nerve ring
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
Nervous system
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
Neural evolution
extensor innervation in the squat lobster *Munida quadrispina*: WALLIS, PAUL, ANTONSEN AND HOLLENBERG **198**, 2453.
serotonin immunoreactivity in a primitive crustacean: HARRISON, MACMILLAN AND YOUNG **198**, 531.
Neurite retraction
electrical activity and neurite outgrowth: NEELY AND NICHOLLS **198**, 1433.
Neurohormone
effects of FMRFamide-related peptides on crayfish: SKERRETT, PEAIRE, QUIGLEY AND MERCIER **198**, 109.
neurohormones in the crab *Cancer borealis*: CHRISTIE, SKIEBE AND MARDER **198**, 2431.
RPCH modulation of crayfish retinal function: GARFIAS, RODRÍGUEZ-SOSA AND ARÉCHIGA **198**, 1447.
Neuromodulation
actions of lobster peptide F_1: WORDEN, KRAVITZ AND GOY **198**, 97.
adipokinetic hormone in the insect CNS: **198**, 1307.
effects of 5-HT on antennal-lobe neurones: MERCER, HAYASHI AND HILDEBRAND **198**, 613.
5-HT neuromodulation in moth antennal lobe: KLOPPENBURG AND HILDEBRAND **198**, 603.
Neuromodulator
distribution of cholecystokinin-like peptides in stomatogastric ganglion: CHRISTIE, BALDWIN, TURRIGIANO, GRAUBARD AND MARDER **198**, 263.

Neuromuscular junction
actions of lobster peptide F_1: WORDEN, KRAVITZ AND GOY **198**, 97.
effects of FMRFamide-related peptides on crayfish: SKERRETT, PEAIRE, QUIGLEY AND MERCIER **198**, 109.
Neuropeptide
callitachykinins in blowfly: NÄSSEL, KIM AND LUNDQUIST **198**, 2527.
crustacean cardioactive peptides: McGAW, WILKENS, McMAHON AND AIRRIESS **198**, 2547.
hormonal activation of *Rhodnius* brain by feeding: MULYE AND DAVEY **198**, 1087.
neurohormones in the crab *Cancer borealis*: CHRISTIE, SKIEBE AND MARDER **198**, 2431.
RPCH modulation of crayfish retinal function: GARFIAS, RODRÍGUEZ-SOSA AND ARÉCHIGA **198**, 1447.
SALMFamide neuropeptides in starfish: ELPHICK, NEWMAN AND THORNDYKE **198**, 2519.
Neurosecretion
hormonal activation of *Rhodnius* brain by feeding: MULYE AND DAVEY **198**, 1087.
Neurotransmitter
neurotransmitters and stridulation in the grasshopper: OCKER, HEDWIG AND ELSNER **198**, 1701.
ovarian maturation in the crayfish: SAROJINI, NAGABHUSHANAM AND FINGERMAN **198**, 1253.
Neutral amino acid
a novel proline, glycine: K^+ symporter: BADER, PARTHASARATHY AND HARVEY **198**, 2599.
Nitric oxide
Cimex lectularius nitrophorin: VALENZUELA, WALKER AND RIBEIRO **198**, 1519.
enteric reflexes and nitric oxide in fish intestine: KARILA AND HOLMGREN **198**, 2405.
Nitric oxide synthase
NO synthesis in locust olfactory interneurones: ELPHICK, RAYNE, RIVEROS-MORENO, MONCADA AND O'SHEA **198**, 821.
Nitric oxide synthetase
nitric oxide synthetase in *Rhodnius prolixus*: NUSSENZVEIG, BENTLEY AND RIBEIRO **198**, 1093.
Nitrogen
nitrogen excretion: WRIGHT **198**, 273.
Nitrogen metabolism
cortisol and nitrogen metabolism in toadfish: HOPKINS, WOOD AND WALSH **198**, 2229.
Nitrogenous waste excretion
ammonia and urea metabolism in an elasmobranch: WOOD, PÄRT AND WRIGHT **198**, 1545.
Nitrophorin
Cimex lectularius nitrophorin: VALENZUELA, WALKER AND RIBEIRO **198**, 1519.
Nociceptor
recovery of function by sensory neurones in *Aplysia californica*: DULIN, STEFFENSEN, MORRIS AND WALTERS **198**, 2055.
regeneration and sprouting of sensory neurones: STEFFENSEN, DULIN, WALTERS AND MORRIS **198**, 2067.
Noise
locust first ocellar synapse: SIMMONS **198**, 537.
Non-planar wing
wing tip slots and drag in a gliding hawk: TUCKER **198**, 775.
Non-shivering thermogenesis
daily variations in response to noradrenaline: HAIM, McDEVITT AND SPEAKMAN **198**, 561.
Noradrenaline
daily variations in response to noradrenaline: HAIM, McDEVITT AND SPEAKMAN **198**, 561.
the osmolality-sensitive taurine channel and noradrenaline: THOROED, SOERGAARD, CRAGOE AND FUGELLI **198**, 311.
Norepinephrine
electrogenic norepinephrine transporters in humans: GALLI, DeFELICE, DUKE, MOORE AND BLAKELY **198**, 2197.
Northern pike
fast-start efficiency and power output in northern pike: FRITH AND BLAKE **198**, 1863.
Notonecta glauca
pupil adjustments in the common backswimmer: RO AND NILSSON **198**, 71.
Notothenia coriiceps
rheology of fish red blood cells: LECKLIN, NASH AND EGGINTON **198**, 1801.
Nuclear magnetic resonance
adenylate compartmentation in polychaete coelomic cells: HOEGER, DUNN AND MÄRKER **198**, 2079.
urea and trimethylamines in *Xenopus* tissue: WRAY AND WILKIE **198**, 373.
Nutrient transport
feeding response of pythons: SECOR AND DIAMOND **198**, 1313.

O_2 receptor
control of ventilation in *Bufo paracnemis*: BRANCO AND GLASS **198**, 1417.
Ocellar synapse
locust first ocellar synapse: SIMMONS **198**, 537.
Octopamine
adipokinetic hormone in the insect CNS: **198**, 1307.
cockroach DUM neurones and colleterial glands: SINAKEVITCH, GEFFARD, PELHATE AND LAPIED **198**, 1539.
dynamics of neurochemical action in *Aedes aegypti*: MESSER AND BROWN **198**, 2325.
Octopamine-like immunohistochemistry
cockroach DUM neurones and colleterial glands: SINAKEVITCH, GEFFARD, PELHATE AND LAPIED **198**, 1539.
Octopus vulgaris
ventilation and heartbeat in *Octopus vulgaris*: WELLS AND WELLS **198**, 1717.
Ocypode quadrata
integrating field and laboratory studies of locomotion: WEINSTEIN **198**, 989.
Odonata
thermally polymorphic dragonflies: MARDEN **198**, 2095.
Olfaction
chemosensitivity of pond snail osphradia: WEDEMEYER AND SCHILD **198**, 1743.
effects of 5-HT on antennal-lobe neurones: MERCER, HAYASHI AND HILDEBRAND **198**, 613.
5-HT neuromodulation in moth antennal lobe: KLOPPENBURG AND HILDEBRAND **198**, 603.
Omocestus viridulus
neurotransmitters and stridulation in the grasshopper: OCKER, HEDWIG AND ELSNER **198**, 1701.
Oncorhynchus mykiss
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
carbonic anhydrase infusion during hypoxia in fish: LESSARD, VAL, AOTA AND RANDALL **198**, 31.
effect of dietary Na^+ load on rainbow trout: SMITH, EDDY AND TALBOT **198**, 2359.
energy status in anoxic fish brain: JOHANSSON AND NILSSON **198**, 2575.
erythrocyte deformation in fish gills: NILSSON, LÖFMAN AND BLOCK **198**, 1151.
gas transfer in softwater-acclimated trout: GRECO, GILMOUR, FENWICK AND PERRY **198**, 2557.
hypoxia and organic phosphates in rainbow trout: VAL, LESSARD AND RANDALL **198**, 305.
immunolocalization of H^+ pumps in trout pavement cells: SULLIVAN, FRYER AND PERRY **198**, 2619.

induction of urea cycle enzymes in larval trout: WRIGHT, FELSKIE AND ANDERSON **198**, 127.
ion regulation in rainbow trout: POSTLETHWAITE AND McDONALD **198**, 295.
membrane-specific responses to temperature in rainbow trout: CROCKETT AND HAZEL **198**, 1105.
rheology of fish red blood cells: LECKLIN, NASH AND EGGINTON **198**, 1801.
trout blood viscosity: SØRENSEN AND WEBER **198**, 953.
Ondatra zibethicus
cardiac response to diving in muskrats: SIGNORE AND JONES **198**, 2307.
Ontogeny
electrosensory thresholds in larvae of a mormyrid fish: POSTNER AND KRAMER **198**, 783.
thermally polymorphic dragonflies: MARDEN **198**, 2095.
Operophtera bruceata
thermal adaptation in moth muscle: MARDEN **198**, 2087.
Opsanus beta
cortisol and nitrogen metabolism in toadfish: HOPKINS, WOOD AND WALSH **198**, 2229.
enzyme compartmentation in batrachoidid fishes: ANDERSON AND WALSH **198**, 755.
feeding and nitrogen excretion in toadfish: WALSH AND MILLIGAN **198**, 1559.
pulsatile urea excretion in toadfish: WOOD, HOPKINS, HOGSTRAND AND WALSH **198**, 1729.
Opsanus tau
enzyme compartmentation in batrachoidid fishes: ANDERSON AND WALSH **198**, 755.
Optics
optical scaling in ants: ZOLLIKOFER, WEHNER AND FUKUSHI **198**, 1637.
Optimal design
papillary muscle mechanics: LAYLAND, YOUNG AND ALTRINGHAM **198**, 1035.
Oreochromis andersonii
allelic variation in fish myosin light chains: CROCKFORD, JOHNSTON AND McANDREW **198**, 2501.
Oreochromis mossambicus
branchial chloride cells in young tilapia: LI, EYGENSTEYN, LOCK, VERBOST, VAN DER HEIJDEN, WENDELAAR BONGA AND FLIK **198**, 2177.
calcium pumps in the teleost kidney: BIJVELDS, VAN DER HEIJDEN, FLIK, VERBOST, KOLAR AND WENDELAAR BONGA **198**, 1351.
Oreochromis niloticus
allelic variation in fish myosin light chains: CROCKFORD, JOHNSTON AND McANDREW **198**, 2501.
Orientation
control of pitch and roll in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 665.
hydrodynamic orientation by spiny lobsters: NEVITT, PENTCHEFF, LOHMANN AND ZIMMER-FAUST **198**, 2049.
lobster magnetic compass: LOHMANN, PENTCHEFF, NEVITT, STETTEN, ZIMMER-FAUST, JARRARD AND BOLES **198**, 2041.
particle-based magnetoreceptor in the bobolink: BEASON, DUSSOURD AND DEUTSCHLANDER **198**, 141.
perception of wave direction by turtles: LOHMANN, SWARTZ AND LOHMANN **198**, 1079.
visual influence on spatial orientation in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 675.
Ornithine–urea cycle
ammonia and urea metabolism in an elasmobranch: WOOD, PÄRT AND WRIGHT **198**, 1545.
feeding and nitrogen excretion in toadfish: WALSH AND MILLIGAN **198**, 1559.
pulsatile urea excretion in toadfish: WOOD, HOPKINS, HOGSTRAND AND WALSH **198**, 1729.
Orthopteran
biomechanics of the cricket's kick: HUSTERT AND GNATZY **198**, 1275.
octopamine and 'fight or flight' behaviour in a cricket: ADAMO, LINN AND HOY **198**, 1691.
Oscillatory work
mechanics of mammalian muscle: JAMES, ALTRINGHAM AND GOLDSPINK **198**, 491.
Osmerus mordax
glycerol synthesis in smelt: RAYMOND **198**, 2569.
Osmolality
euryhaline crab gill physiology: PILLER, HENRY, DOELLER AND KRAUS **198**, 349.
Na^+/K^+-ATPase in antarctic fish: GONZALEZ-CABRERA, DOWD, PEDIBHOTLA, ROSARIO, STANLEY-SAMUELSON AND PETZEL **198**, 2279.
the osmolality-sensitive taurine channel and noradrenaline: THOROED, SOERGAARD, CRAGOE AND FUGELLI **198**, 311.
Osmolyte
basolateral taurine transport in *Mytilus* gill: NEUFELD AND WRIGHT **198**, 465.
Osmoregulation
calcium pumps in the teleost kidney: BIJVELDS, VAN DER HEIJDEN, FLIK, VERBOST, KOLAR AND WENDELAAR BONGA **198**, 1351.
Na^+/K^+-ATPase in antarctic fish: GONZALEZ-CABRERA, DOWD, PEDIBHOTLA, ROSARIO, STANLEY-SAMUELSON AND PETZEL **198**, 2279.
nitrogen excretion: WRIGHT **198**, 273.
spider excretion: BUTT AND TAYLOR **198**, 1137.
Osphradium
chemosensitivity of pond snail osphradia: WEDEMEYER AND SCHILD **198**, 1743.
Ouabain
energy status in anoxic fish brain: JOHANSSON AND NILSSON **198**, 2575.
Ovarian development
protein synthesis and degradation in cricket flight muscles: GOMI, OKUDA AND TANAKA **198**, 1071.
Ovary
ovarian maturation in the crayfish: SAROJINI, NAGABHUSHANAM AND FINGERMAN **198**, 1253.
Oviduct
oviductal motor neurones: KALOGIANNI AND THEOPHILIDIS **198**, 507.
Oviductal contractions
oviductal motor neurones: KALOGIANNI AND THEOPHILIDIS **198**, 507.
Ovine
effects of bafilomycinon A_1 sheep macrophage pH: HEMING, TRABER, HINDER AND BIDANI **198**, 1711.
Oviposition
ovipositor mechanoreceptors in the locust: KALOGIANNI **198**, 1359.
Oxidative phosphorylation
thermotolerance and mitochondrial function in the blowfly: EL-WADAWI AND BOWLER **198**, 2413.
Oxonol V
H^+-ATPase in crab gills: ONKEN AND PÜTZENLECHNER **198**, 767.
Oxygen
crayfish metabolism: ELLIS AND MORRIS **198**, 409.
effects of salinity on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 61.
ventilation and heartbeat in *Octopus vulgaris*: WELLS AND WELLS **198**, 1717.
Oxygen consumption
effects of salinity on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 61.
effects of temperature on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 49.

oxygen consumption in birds during flight: BISHOP AND BUTLER **198**, 2153.
oxygen consumption regulation in larval *Xenopus*: HASTINGS AND BURGGREN **198**, 2465.
Oxygen content
carbonic anhydrase infusion during hypoxia in fish: LESSARD, VAL, AOTA AND RANDALL **198**, 31.
Oxygen diffusion
oxygen availability in gelatinous egg masses: BOOTH **198**, 241.
Oxygen regulation
oxygen consumption regulation in larval *Xenopus*: HASTINGS AND BURGGREN **198**, 2465.
Oxygen transport
haemoglobin function in intact lamprey erythrocytes: NIKINMAA, AIRAKSINEN AND VIRRKI **198**, 2423.
oxygen affinity of lamprey erythrocytes: AIRAKSINEN AND NIKINMAA **198**, 2393.
Oxygenation
trout blood viscosity: SØRENSEN AND WEBER **198**, 953.
Oxygenation-dependent osmolyte transport
K^+ and amino acid transport in carp red blood cells: JENSEN **198**, 155.

Pacemaker
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
Pachymedusa dacnicolor
feeding kinematics of phyllomedusine treefrogs: GRAY AND NISHIKAWA **198**, 457.
Pacifastacus leniusculus
membrane currents in swimmeret motor neurones: CHRACHRI **198**, 1483.
Panagrolaimus davidi
intracellular freezing in a nematode: WHARTON AND FERNS **198**, 1381.
Panulirus argus
hydrodynamic orientation by spiny lobsters: NEVITT, PENTCHEFF, LOHMANN AND ZIMMER-FAUST **198**, 2049.
lobster magnetic compass: LOHMANN, PENTCHEFF, NEVITT, STETTEN, ZIMMER-FAUST, JAkRARD AND BOLES **198**, 2041.
Papillary muscle
papillary muscle mechanics: LAYLAND, YOUNG AND ALTRINGHAM **198**, 1035.
papillary muscle work production: LAYLAND, YOUNG AND ALTRINGHAM **198**, 2491.
Parabuteo unicinctus
wing tip slots and drag in a gliding hawk: TUCKER **198**, 775.
Parasympathetic control
parasympathetic influence in hibernation: HARRIS AND MILSOM **198**, 931.
Parasympathetic system
cardiac response to diving in muskrats: SIGNORE AND JONES **198**, 2307.
Partial-bound
intermittent flight in starlings: TOBALSKE **198**, 1259.
Particle image velocimetry
particle image velocimetry flow analysis on aquatic animals: STAMHUIS AND VIDELER **198**, 283.
Passer domesticus
variation in the respiratory quotient of birds: WALSBERG AND WOLF **198**, 213.
Passive immunization
hormonal function of *Locusta*-DP: PATEL, HAYES AND COAST **198**, 793.
Passive mechanical properties
papillary muscle work production: LAYLAND, YOUNG AND ALTRINGHAM **198**, 2491.
Patch-clamp
Na^+ and Ca^{2+} currents in *Aplysia californica*: FIEBER **198**, 2337.
Pavement cell
immunolocalization of H^+ pumps in trout pavement cells: SULLIVAN, FRYER AND PERRY **198**, 2619.
P_{CO_2}
chemosensitivity of pond snail osphradia: WEDEMEYER AND SCHILD **198**, 1743.
Peptide
adipokinetic hormone in the insect CNS: **198**, 1307.
distribution of cholecystokinin-like peptides in stomatogastric ganglion: CHRISTIE, BALDWIN, TURRIGIANO, GRAUBARD AND MARDER **198**, 263.
dynamics of neurochemical action in *Aedes aegypti*: MESSER AND BROWN **198**, 2325.
Peptide modulation
modulation of a sensory neurone in the leech: WENNING AND CALABRESE **198**, 1405.
Peptide receptor
natriuretic peptide receptors in hagfish kidney and aortae: TOOP, DONALD AND EVANS **198**, 1875.
Periplaneta americana
cockroach DUM neurones and colleterial glands: SINAKEVITCH, GEFFARD, PELHATE AND LAPIED **198**, 1539.
electrical models of cockroach integument: SMITH, MACHIN AND LAMPERT **198**, 249.
insect $GABA_B$ receptor: BAI AND SATTELLE **198**, 889.
water and carbon dioxide loss from the cockroach: NOBLE-NESBITT, APPEL AND CROGHAN **198**, 235.
Permeability
electrical models of cockroach integument: SMITH, MACHIN AND LAMPERT **198**, 249.
pore properties of a stretch-activated K^+ channel in *Lymnaea stagnalis*: SMALL AND MORRIS **198**, 1919.
water and carbon dioxide loss from the cockroach: CROGHAN, NOBLE-NESBITT AND APPEL **198**, 227.
Petromyzon marinus
haemoglobin function in intact lamprey erythrocytes: NIKINMAA, AIRAKSINEN AND VIRRKI **198**, 2423.
initiation of locomotion by photoreceptors in the lamprey: DELIAGINA, ULLÉN, GONZALEZ, EHRSSON, ORLOVSKY AND GRILLNER **198**, 2581.
visual influence on spatial orientation in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 675.
pH
adjustment of K' to varying pH and pMg: GOLDING, TEAGUE AND DOBSON **198**, 1775.
Bacillus thuringiensis toxin and receptor in planar lipid bilayer: MARTIN AND WOLFERSBERGER **198**, 91.
crayfish acid–base and ion status: ELLIS AND MORRIS **198**, 395.
fluid reabsorption by *Drosphila* Malpighian tubules: O'DONNELL AND MADDRELL **198**, 1647.
Pharmacology
insect $GABA_B$ receptor: BAI AND SATTELLE **198**, 889.
Phase
phase and lift in flying locust pairs: CAMHI, SUMBRE AND WENDLER **198**, 1051.
Phenotypic plasticity
thermally polymorphic dragonflies: MARDEN **198**, 2095.
Phentolamine
cardiac response to diving in muskrats: SIGNORE AND JONES **198**, 2307.
Pheromone
behavioural response to 17α,20β-P: BJERSELIUS, OLSÉN AND ZHENG **198**, 747.
cyclic AMP and barnacle settlement: CLARE, THOMAS AND RITTSCHOF **198**, 655.
Philosamia cynthia
mRNA-induced leucine transport in a lepidopteran larva: SACCHI, PEREGO AND MAGAGNIN **198**, 961.

Phloretin
glucose transport in carp red blood cells: TIIHONEN, NIKINMAA AND LAPPIVAARA **198**, 577.
Phoca vitulina
tactile sensitivity of mystacial vibrissae in seals: DEHNHARDT AND KAMINSKI **198**, 2317.
Phosphoenolpyruvate carboxykinase
glycerol synthesis in smelt: RAYMOND **198**, 2569.
Phospholipid
matrotrophic viviparity in rockfish: MACFARLANE AND BOWERS **198**, 1197.
Photoperiod
daily variations in response to noradrenaline: HAIM, McDEVITT AND SPEAKMAN **198**, 561.
Photoreceptor
spectral sensitivity of hawkmoth feeding: CUTLER, BENNETT, STEVENSON AND WHITE **198**, 1909.
Photosensitivity
initiation of locomotion by photoreceptors in the lamprey: DELIAGINA, ULLÉN, GONZALEZ, EHRSSON, ORLOVSKY AND GRILLNER **198**, 2581.
Phylomedusine
feeding kinematics of phyllomedusine treefrogs: GRAY AND NISHIKAWA **198**, 457.
Pied flycatcher
distribution of melatonin binding sites in avian brains: SCHNEIDER **198**, 1943.
Pigeon
functional morphology of pigeon feathers: ENNOS, HICKSON AND ROBERTS **198**, 1219.
lack of polarization sensitivity in the pigeon: VOS HZN, COEMANS AND NUBOER **198**, 325.
Pineal gland
distribution of melatonin binding sites in avian brains: SCHNEIDER **198**, 1943.
Pinna
sound transformation at the mouse pinna: CHEN, CAIN AND JEN **198**, 2007.
Pitch
control of pitch and roll in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 665.
Plaice
thermal adaptation of plaice cardiac pacemaker: HARPER, NEWTON AND WATT **198**, 137.
Plasma membrane
proteolipid localization in *Heliothesis virescens*: PIETRANTONIO AND GILL **198**, 2609.
Plasma membrane vesicle
calcium pumps in the teleost kidney: BIJVELDS, VAN DER HEIJDEN, FLIK, VERBOST, KOLAR AND WENDELAAR BONGA **198**, 1351.
Platichthys flesus
the osmolality-sensitive taurine channel and noradrenaline: THOROED, SOERGAARD, CRAGOE AND FUGELLI **198**, 311.
Pleuronectes platessa
thermal adaptation of plaice cardiac pacemaker: HARPER, NEWTON AND WATT **198**, 137.
Pleuronichthys verticalis
flatfish prey capture: GIBB **198**, 1173.
Polarization-sensitivity
lack of polarization sensitivity in the pigeon: VOS HZN, COEMANS AND NUBOER **198**, 325.
Polarographic oxygen sensors
energy use by developing marine animals: HOEGH-GULDBERG AND MANAHAN **198**, 19.
Polinices sordidus
oxygen availability in gelatinous egg masses: BOOTH **198**, 241.
Pollimyrus isidori
electrosensory thresholds in larvae of a mormyrid fish: POSTNER AND KRAMER **198**, 783.
Pollination
spectral sensitivity of hawkmoth feeding: CUTLER, BENNETT, STEVENSON AND WHITE **198**, 1909.
Polychaete
adenylate compartmentation in polychaete coelomic cells: HOEGER, DUNN AND MÄRKER **198**, 2079.
Polyploidy
acclimation of burst escape performance in fish: JOHNSON AND BENNETT **198**, 2165.
calling and locomotor frog muscles: McLISTER, STEVENS AND BOGART **198**, 1527.
***Polyspilota* sp.**
visual distance discrimination in praying mantis: POTESER AND KRAL **198**, 2127.
Porichthys notatus
enzyme compartmentation in batrachoidid fishes: ANDERSON AND WALSH **198**, 755.
Porrhothele antipodiana
spider excretion: BUTT AND TAYLOR **198**, 1137.
Postural control
control of pitch and roll in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 665.
visual influence on spatial orientation in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 675.
Potassium
energy status in anoxic fish brain: JOHANSSON AND NILSSON **198**, 2575.
Potassium ion
fluid reabsorption by *Drosphila* Malpighian tubules: O'DONNELL AND MADDRELL **198**, 1647.
Potassium transport
midgut compartmental analysis in *Manduca sexta*: KOCH AND MOFFETT **198**, 2115.
patency of goblet valves in insect midgut: MOFFETT, KOCH AND WOODS **198**, 2103.
zebra mussel potassium transport: WILCOX AND DIETZ **198**, 861.
Power
extraordinary flight performance of orchid bees: DUDLEY **198**, 1065.
fast-start efficiency and power output in northern pike: FRITH AND BLAKE **198**, 1863.
Power output
intermittent flight in starlings: TOBALSKE **198**, 1259.
muscle power during fast-starts in short-horned sculpin: JOHNSTON, VAN LEEUWEN, DAVIES AND BEDDOW **198**, 1851.
papillary muscle mechanics: LAYLAND, YOUNG AND ALTRINGHAM **198**, 1035.
thermal adaptation in moth muscle: MARDEN **198**, 2087.
Praying mantis
visual distance discrimination in praying mantis: POTESER AND KRAL **198**, 2127.
Prehensile
feeding in the frog *Hemisus marmoratum*: RITTER AND NISHIKAWA **198**, 2025.
Pressure
performance of a perfused crocodile heart: AXELSSON AND FRANKLIN **198**, 2509.
Prey capture
flatfish prey capture: GIBB **198**, 1173.
scaling of feeding kinematics: RICHARD AND WAINWRIGHT **198**, 419.
sunfish capture and transport behaviour: GILLIS AND LAUDER **198**, 709.
swimming kinematics of sculpin: BEDDOW, VAN LEEUWEN AND JOHNSTON **198**, 203.
Prey transport
sunfish capture and transport behaviour: GILLIS AND LAUDER **198**, 709.
Primary feather
wing tip slots and drag in a gliding hawk: TUCKER **198**, 775.

Procambarus clarkii
effects of FMRFamide-related peptides on crayfish: SKERRETT, PEAIRE, QUIGLEY AND MERCIER **198**, 109.
kinetics of free walking in crayfish: JAMON AND CLARAC **198**, 683.
ovarian maturation in the crayfish: SAROJINI, NAGABHUSHANAM AND FINGERMAN **198**, 1253.
RPCH modulation of crayfish retinal function: GARFIAS, RODRÍGUEZ-SOSA AND ARÉCHIGA **198**, 1447.
Proctolin
crustacean cardioactive peptides: McGAW, WILKENS, McMAHON AND AIRRIESS **198**, 2547.
dynamics of neurochemical action in *Aedes aegypti*: MESSER AND BROWN **198**, 2325.
Proline
a novel proline, glycine: K^+ symporter: BADER, PARTHASARATHY AND HARVEY **198**, 2599.
Proline oxidation
fuels for flight in blister beetle: AUERSWALD AND GÄDE **198**, 1423.
Propranolol
cardiac response to diving in muskrats: SIGNORE AND JONES **198**, 2307.
Proprioception
extensor innervation in the squat lobster *Munida quadrispina*: WALLIS, PAUL, ANTONSEN AND HOLLENBERG **198**, 2453.
Proprioceptive input
stinging response of the honeybee: OGAWA, KAWAKAMI AND YAMAGUCHI **198**, 39.
Protein damage
indices of protein damage in *Mytilus trossulus*: HOFMANN AND SOMERO **198**, 1509.
Protein synthesis
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
Proteolipid
proteolipid localization in *Heliothesis virescens*: PIETRANTONIO AND GILL **198**, 2609.
Protozoa
electromotor coupling of cilia in *Didinium nasutum*: PERNBERG AND MACHEMER **198**, 2537.
Pseudopupil
optical scaling in ants: ZOLLIKOFER, WEHNER AND FUKUSHI **198**, 1637.
Pumping
particle image velocimetry flow analysis on aquatic animals: STAMHUIS AND VIDELER **198**, 283.
Pupil dynamics
pupil adjustments in the common backswimmer: RO AND NILSSON **198**, 71.
Pupil sensitivity
pupil adjustments in the common backswimmer: RO AND NILSSON **198**, 71.
Pycnopodia helianthoides
ion transport by echinoderm gastrointestinal epithelium: ZHUANG, DUERR AND AHEARN **198**, 1207.
Pyloric caeca
ion transport by echinoderm gastrointestinal epithelium: ZHUANG, DUERR AND AHEARN **198**, 1207.
Pyruvate
glycerol synthesis in smelt: RAYMOND **198**, 2569.
Python molurus
feeding response of pythons: SECOR AND DIAMOND **198**, 1313.

Rainbow trout
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
carbonic anhydrase infusion during hypoxia in fish: LESSARD, VAL, AOTA AND RANDALL **198**, 31.
effect of dietary Na^+ load on rainbow trout: SMITH, EDDY AND TALBOT **198**, 2359.
energy status in anoxic fish brain: JOHANSSON AND NILSSON **198**, 2575.
erythrocyte deformation in fish gills: NILSSON, LÖFMAN AND BLOCK **198**, 1151.
gas transfer in softwater-acclimated trout: GRECO, GILMOUR, FENWICK AND PERRY **198**, 2557.
hypoxia and organic phosphates in rainbow trout: VAL, LESSARD AND RANDALL **198**, 305.
immunolocalization of H^+ pumps in trout pavement cells: SULLIVAN, FRYER AND PERRY **198**, 2619.
ion regulation in rainbow trout: POSTLETHWAITE AND McDONALD **198**, 295.
membrane-specific responses to temperature in rainbow trout: CROCKETT AND HAZEL **198**, 1105.
trout blood viscosity: SØRENSEN AND WEBER **198**, 953.
Raja eglanteria
taurine release from embryonic skate heart: GOLDSTEIN AND DAVIS-AMARAL **198**, 2635.
Rana pipiens
Ca^{2+} exchange in frog skin: STIFFLER **198**, 967.
effects of sudden spinal cord cooling in frogs: DALÓ, HACKMAN, STOREY AND DAVIDOFF **198**, 1765.
metabolism during dehydration in leopard frogs: CHURCHILL AND STOREY **198**, 147.
muscle length and work from frog heart: SYME AND JOSEPHSON **198**, 2221.
Rana sylvatica
effects of sudden spinal cord cooling in frogs: DALÓ, HACKMAN, STOREY AND DAVIDOFF **198**, 1765.
Rat
papillary muscle mechanics: LAYLAND, YOUNG AND ALTRINGHAM **198**, 1035.
papillary muscle work production: LAYLAND, YOUNG AND ALTRINGHAM **198**, 2491.
Reabsorption
fluid reabsorption by *Drosphila* Malpighian tubules: O'DONNELL AND MADDRELL **198**, 1647.
Receptor
expression of a cloned muscarinic acetylcholine receptor: MILLAR, BAYLIS, REAPER, BUNTING, MASON AND SATTELLE **198**, 1843.
Receptor gain control
modulation of a sensory neurone in the leech: WENNING AND CALABRESE **198**, 1405.
Recovery
recovery of ubiquitination in *Artemia franciscana*: ANCHORDOGUY AND HAND **198**, 1299.
regeneration and sprouting of sensory neurones: STEFFENSEN, DULIN, WALTERS AND MORRIS **198**, 2067.
Rectal fluid
pulsatile urea excretion in toadfish: WOOD, HOPKINS, HOGSTRAND AND WALSH **198**, 1729.
Red blood cell
Cl^- transport in fish red blood cells: JENSEN AND BRAHM **198**, 2237.
K^+ and amino acid transport in carp red blood cells: JENSEN **198**, 155.
oxygen affinity of lamprey erythrocytes: AIRAKSINEN AND NIKINMAA **198**, 2393.
Red-pigment-concentrating hormone
ovarian maturation in the crayfish: SAROJINI, NAGABHUSHANAM AND FINGERMAN **198**, 1253.
RPCH modulation of crayfish retinal function: GARFIAS, RODRÍGUEZ-SOSA AND ARÉCHIGA **198**, 1447.
Regeneration
recovery of function by sensory neurones in *Aplysia californica*: DULIN, STEFFENSEN, MORRIS AND WALTERS **198**, 2055.

remodelling of an intact neurone in the leech: CALABRESE AND PELLEGRINO **198**, 1989.
Regurgitation
pulsatile urea excretion in toadfish: WOOD, HOPKINS, HOGSTRAND AND WALSH **198**, 1729.
Relay system
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
Remodelling
remodelling of an intact neurone in the leech: CALABRESE AND PELLEGRINO **198**, 1989.
Reproduction
behavioural response to 17α,20β-P: BJERSELIUS, OLSÉN AND ZHENG **198**, 747.
Reproductive system
cockroach DUM neurones and colleterial glands: SINAKEVITCH, GEFFARD, PELHATE AND LAPIED **198**, 1539.
Resonance
sound production in crickets: STEPHEN AND HARTLEY **198**, 2139.
Resonator
bioacoustics of a miniature cricket: DAMBACH AND GRAS **198**, 721.
Respiration
buoyancy of gobies in hypoxia: GEE AND GEE **198**, 79.
expiratory valving in the avian lung: BROWN, KOVACS, BUTLER, WANG, LEHR AND BANZETT **198**, 2349.
respiration and vocalization in bats: LANCASTER, HENSON AND KEATING **198**, 175.
Respiratory control
control of discontinuous ventilation in a grasshopper: HARRISON, HADLEY AND QUINLAN **198**, 1755.
Respiratory quotient
variation in the respiratory quotient of birds: WALSBERG AND WOLF **198**, 213.
Respirometry
energy use by developing marine animals: HOEGH-GULDBERG AND MANAHAN **198**, 19.
euryhaline crab gill physiology: PILLER, HENRY, DOELLER AND KRAUS **198**, 349.
Reticulospinal neurone
initiation of locomotion by photoreceptors in the lamprey: DELIAGINA, ULLÉN, GONZALEZ, EHRSSON, ORLOVSKY AND GRILLNER **198**, 2581.
Retina
locust first ocellar synapse: SIMMONS **198**, 537.
RPCH modulation of crayfish retinal function: GARFIAS, RODRÍGUEZ-SOSA AND ARÉCHIGA **198**, 1447.
Retzius neurone
feeding-related inputs to Retzius neurones in *Hirudo medicinalis*: GROOME, VAUGHAN AND LENT **198**, 1233.
Rheology
rheology of fish red blood cells: LECKLIN, NASH AND EGGINTON **198**, 1801.
trout blood viscosity: SØRENSEN AND WEBER **198**, 953.
Rhodnius prolixus
hormonal activation of *Rhodnius* brain by feeding: MULYE AND DAVEY **198**, 1087.
nitric oxide synthetase in *Rhodnius prolixus*: NUSSENZVEIG, BENTLEY AND RIBEIRO **198**, 1093.
Rhythm generation
rhythmicity in insect thoracic nerve cord: BÜSCHGES, SCHMITZ AND BÄSSLER **198**, 435.
RNA
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
Roach
erythrocyte deformation in fish gills: NILSSON, LÖFMAN AND BLOCK **198**, 1151.
Rodent
development of synchronous stepping: BLUMBERG-FELDMAN AND EILAM **198**, 363.
Roll
control of pitch and roll in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 665.
Rubidium transport
zebra mussel potassium transport: WILCOX AND DIETZ **198**, 861.
Running
development of synchronous stepping: BLUMBERG-FELDMAN AND EILAM **198**, 363.
Rutilus rutilus
erythrocyte deformation in fish gills: NILSSON, LÖFMAN AND BLOCK **198**, 1151.

Salamander
ontogenetic stereotypy in salamander feeding: REILLY **198**, 701.
sunfish capture and transport behaviour: GILLIS AND LAUDER **198**, 709.
Salamandra salamandra
ontogenetic stereotypy in salamander feeding: REILLY **198**, 701.
Salinity
effects of salinity on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 61.
euryhaline crab gill physiology: PILLER, HENRY, DOELLER AND KRAUS **198**, 349.
Saliva
nitric oxide synthetase in *Rhodnius prolixus*: NUSSENZVEIG, BENTLEY AND RIBEIRO **198**, 1093.
Salivary gland
Cimex lectularius nitrophorin: VALENZUELA, WALKER AND RIBEIRO **198**, 1519.
nitric oxide synthetase in *Rhodnius prolixus*: NUSSENZVEIG, BENTLEY AND RIBEIRO **198**, 1093.
serotonin in mosquito salivary glands: NOVAK, RIBEIRO AND HILDEBRAND **198**, 167.
SALMFamides
SALMFamide neuropeptides in starfish: ELPHICK, NEWMAN AND THORNDYKE **198**, 2519.
Salmo trutta
copper and ammonia levels and swimming in trout: BEAUMONT, BUTLER AND TAYLOR **198**, 2213.
effects of thiocyanate on brown trout gills: MORGAN AND POTTS **198**, 1229.
Sarcomere length
mechanics of mammalian muscle: JAMES, ALTRINGHAM AND GOLDSPINK **198**, 491.
muscle tendon compliance: JAMES, YOUNG AND ALTRINGHAM **198**, 503.
papillary muscle work production: LAYLAND, YOUNG AND ALTRINGHAM **198**, 2491.
Sartorius
calling and locomotor frog muscles: McLISTER, STEVENS AND BOGART **198**, 1527.
Scaling
ontogenetic stereotypy in salamander feeding: REILLY **198**, 701.
optical scaling in ants: ZOLLIKOFER, WEHNER AND FUKUSHI **198**, 1637.
oxygen consumption in birds during flight: BISHOP AND BUTLER **198**, 2153.
scaling of feeding kinematics: RICHARD AND WAINWRIGHT **198**, 419.
Scarabaeidae
acoustic startle in scarab beetles: FORREST, FARRIS AND HOY **198**, 2593.
Schistocerca gregaria
central connections of hair plate sensory neurones: KUENZI AND BURROWS **198**, 1589.
development of locust kicking: NORMAN **198**, 1341.

directional responses in grasshopper ears: MICHELSEN AND ROHRSEITZ **198**, 1817.
locust hair plate receptor: NEWLAND, WATKINS, EMPTAGE AND NAGAYAMA **198**, 2397.
locust hindleg steering: LOREZ **198**, 869.
locust tension receptor: MATHESON AND FIELD **198**, 1673.
locust walking motor patterns: DUCH AND PFLÜGER **198**, 1963.
NO synthesis in locust olfactory interneurones: ELPHICK, RAYNE, RIVEROS-MORENO, MONCADA AND O'SHEA **198**, 821.
ovipositor mechanoreceptors in the locust: KALOGIANNI **198**, 1359.
Scolopendra heros
centipede locomotion: ANDERSON, SHULTZ AND JAYNE **198**, 1185.
Sea anemone
L-Dopa in sea anemones: HUDMAN AND McFARLANE **198**, 1045.
nerve nets in sea anemones: CHO AND McFARLANE **198**, 817.
Seabird
feeding in seabirds: WILSON, PÜTZ, GRÉMILLET, CULIK, KIERSPEL, REGEL, BOST, LAGE AND COOPER **198**, 1115.
Sea cucumber
the stiffening response of holothurian dermis: TROTTER AND KOOB **198**, 1951.
Season
Ca^{2+} exchange in frog skin: STIFFLER **198**, 967.
Sea turtle
perception of wave direction by turtles: LOHMANN, SWARTZ AND LOHMANN **198**, 1079.
Sea urchin
microtubule sliding in beating flagella: SHINGYOJI, YOSHIMURA, ESHEL, AKAHASHI AND GIBBONS **198**, 645.
Sebastes flavidus
matrotrophic viviparity in rockfish: MACFARLANE AND BOWERS **198**, 1197.
Second coxal abductor muscle
locust hindleg steering: LOREZ **198**, 869.
Secondary circulation
erythrocyte deformation in fish gills: NILSSON, LÖFMAN AND BLOCK **198**, 1151.
Selectivity
pore properties of a stretch-activated K^+ channel in *Lymnaea stagnalis*: SMALL AND MORRIS **198**, 1919.
Sensitization
regeneration and sprouting of sensory neurones: STEFFENSEN, DULIN, WALTERS AND MORRIS **198**, 2067.
Sensory ecology
bat echolocation call structure: WATERS AND JONES **198**, 475.
Sensory neurone
locust hair plate receptor: NEWLAND, WATKINS, EMPTAGE AND NAGAYAMA **198**, 2397.
recovery of function by sensory neurones in *Aplysia californica*: DULIN, STEFFENSEN, MORRIS AND WALTERS **198**, 2055.
regeneration and sprouting of sensory neurones: STEFFENSEN, DULIN, WALTERS AND MORRIS **198**, 2067.
Serotonin
cerebral modulatory neurones in *Clione limacina*: SATTERLIE AND NOREKIAN **198**, 917.
dynamics of neurochemical action in *Aedes aegypti*: MESSER AND BROWN **198**, 2325.
effects of 5-HT on antennal-lobe neurones: MERCER, HAYASHI AND HILDEBRAND **198**, 613.
feeding-related inputs to Retzius neurones in *Hirudo medicinalis*: GROOME, VAUGHAN AND LENT **198**, 1233.
5-HT neuromodulation in moth antennal lobe: KLOPPENBURG AND HILDEBRAND **198**, 603.
modulation of snail buccal muscle contraction: YOSHIDA AND KOBAYASHI **198**, 729.
peripheral modulatory neurones in *Clione limacina*: SATTERLIE **198**, 905.
serotonin immunoreactivity in a primitive crustacean: HARRISON, MACMILLAN AND YOUNG **198**, 531.
serotonin immunoreactivity in *Clione limacina*: SATTERLIE, NOREKIAN, JORDAN AND KAZILEK **198**, 895.
serotonin in mosquito salivary glands: NOVAK, RIBEIRO AND HILDEBRAND **198**, 167.
Settlement
cyclic AMP and barnacle settlement: CLARE, THOMAS AND RITTSCHOF **198**, 655.
Sheet illumination
particle image velocimetry flow analysis on aquatic animals: STAMHUIS AND VIDELER **198**, 283.
Short-circuit current
H^+-ATPase in crab gills: ONKEN AND PÜTZENLECHNER **198**, 767.
Short-horned sculpin
muscle contractile properties in sculpin: BEDDOW AND JOHNSTON **198**, 193.
muscle power during fast-starts in short-horned sculpin: JOHNSTON, VAN LEEUWEN, DAVIES AND BEDDOW **198**, 1851.
swimming kinematics of sculpin: BEDDOW, VAN LEEUWEN AND JOHNSTON **198**, 203.
Sinus arrhythmia
synbranchid sinus arrhythmia: GRAHAM, LAI, CHILLER AND ROBERTS **198**, 1455.
Siphon reflex
recovery of function by sensory neurones in *Aplysia californica*: DULIN, STEFFENSEN, MORRIS AND WALTERS **198**, 2055.
Skate
taurine release from embryonic skate heart: GOLDSTEIN AND DAVIS-AMARAL **198**, 2635.
Skeletal muscle
muscle power during fast-starts in short-horned sculpin: JOHNSTON, VAN LEEUWEN, DAVIES AND BEDDOW **198**, 1851.
Skin
Ca^{2+} exchange in frog skin: STIFFLER **198**, 967.
pulsatile urea excretion in toadfish: WOOD, HOPKINS, HOGSTRAND AND WALSH **198**, 1729.
Sliding velocity
microtubule sliding in beating flagella: SHINGYOJI, YOSHIMURA, ESHEL, AKAHASHI AND GIBBONS **198**, 645.
Snail
modulation of snail buccal muscle contraction: YOSHIDA AND KOBAYASHI **198**, 729.
oxygen availability in gelatinous egg masses: BOOTH **198**, 241.
pore properties of a stretch-activated K^+ channel in *Lymnaea stagnalis*: SMALL AND MORRIS **198**, 1919.
Soaring
wing tip slots and drag in a gliding hawk: TUCKER **198**, 775.
Soft water
gas transfer in softwater-acclimated trout: GRECO, GILMOUR, FENWICK AND PERRY **198**, 2557.
Solar heat gain
solar heat gain and coat colour: WALSBERG AND WOLF **198**, 1499.
Somitogenesis
temperature and fish development: JOHNSTON, VIEIRA AND ABERCROMBY **198**, 1389.
Song production
sound production in crickets: STEPHEN AND HARTLEY **198**, 2139.
Sound localization
directional responses in grasshopper ears: MICHELSEN AND ROHRSEITZ **198**, 1817.
Sound pressure transformation
sound transformation at the mouse pinna: CHEN, CAIN AND JEN **198**, 2007.
Sound production
bioacoustics of a miniature cricket: DAMBACH AND GRAS **198**, 721.
function of the cicada tymbal: YOUNG AND BENNET-CLARK **198**, 1001.
Space orientation
squid dorsal light reflex: PREUSS AND BUDELMANN **198**, 1157.

Span efficiency factor
wing tip slots and drag in a gliding hawk: TUCKER **198**, 775.
Spatial vision
visual distance discrimination in praying mantis: POTESER AND KRAL **198**, 2127.
Specific dynamic action
feeding response of pythons: SECOR AND DIAMOND **198**, 1313.
Specimen length
creep of wallaby tendons: WANG AND KER **198**, 831.
Spectrophotometry
euryhaline crab gill physiology: PILLER, HENRY, DOELLER AND KRAUS **198**, 349.
Speed
integrating field and laboratory studies of locomotion: WEINSTEIN **198**, 989.
mechanical control of swimming speed in fish: McHENRY, PELL AND LONG **198**, 2293.
Sperm motility
motility of the distal flagellum of spermatozoa: WOOLLEY AND BOZKURT **198**, 1469.
Sperm tail
motility of the distal flagellum of spermatozoa: WOOLLEY AND BOZKURT **198**, 1469.
Spermophilus lateralis
parasympathetic influence in hibernation: HARRIS AND MILSOM **198**, 931.
solar heat gain and coat colour: WALSBERG AND WOLF **198**, 1499.
Spermophilus saturatus
solar heat gain and coat colour: WALSBERG AND WOLF **198**, 1499.
Sphingidae
spectral sensitivity of hawkmoth feeding: CUTLER, BENNETT, STEVENSON AND WHITE **198**, 1909.
Sphyraena
malate dehydrogenases of barracudas: LIN AND SOMERO **198**, 551.
Spider
spider excretion: BUTT AND TAYLOR **198**, 1137.
Spinal cord
effects of sudden spinal cord cooling in frogs: DALÓ, HACKMAN, STOREY AND DAVIDOFF **198**, 1765.
Sprague-Dawley rat
heart mitochondrial properties and $\dot{V}_{O_2max}$: CONLEY, CHRISTIAN, HOPPELER AND WEIBEL **198**, 739.
Sprouting
recovery of function by sensory neurones in *Aplysia californica*: DULIN, STEFFENSEN, MORRIS AND WALTERS **198**, 2055.
remodelling of an intact neurone in the leech: CALABRESE AND PELLEGRINO **198**, 1989.
Squalus acanthias
ammonia and urea metabolism in an elasmobranch: WOOD, PÄRT AND WRIGHT **198**, 1545.
Squat lobster
extensor innervation in the squat lobster *Munida quadrispina*: WALLIS, PAUL, ANTONSEN AND HOLLENBERG **198**, 2453.
Squid
dye coupling in squid chromatophore muscles: REED **198**, 2631.
squid dorsal light reflex: PREUSS AND BUDELMANN **198**, 1157.
Stable expression
expression of a cloned muscarinic acetylcholine receptor: MILLAR, BAYLIS, REAPER, BUNTING, MASON AND SATTELLE **198**, 1843.
Stably transfected mammalian (HEK-293) cells
electrogenic norepinephrine transporters in humans: GALLI, DeFELICE, DUKE, MOORE AND BLAKELY **198**, 2197.
Starfish
ion transport by echinoderm gastrointestinal epithelium: ZHUANG, DUERR AND AHEARN **198**, 1207.
SALMFamide neuropeptides in starfish: ELPHICK, NEWMAN AND THORNDYKE **198**, 2519.
Statocyst
squid dorsal light reflex: PREUSS AND BUDELMANN **198**, 1157.
Steady-state current
electrogenic norepinephrine transporters in humans: GALLI, DeFELICE, DUKE, MOORE AND BLAKELY **198**, 2197.
Step-phase transition
rhythmicity in insect thoracic nerve cord: BÜSCHGES, SCHMITZ AND BÄSSLER **198**, 435.
Stereotypy
ontogenetic stereotypy in salamander feeding: REILLY **198**, 701.
Stick insect
rhythmicity in insect thoracic nerve cord: BÜSCHGES, SCHMITZ AND BÄSSLER **198**, 435.
Stiffening factor
the stiffening response of holothurian dermis: TROTTER AND KOOB **198**, 1951.
Stiffness
mechanical control of swimming speed in fish: McHENRY, PELL AND LONG **198**, 2293.
Stimulus-intensity threshold
electrosensory thresholds in *Eigenmannia*: KAUNZINGER AND KRAMER **198**, 2365.
Stinging response
stinging response of the honeybee: OGAWA, KAWAKAMI AND YAMAGUCHI **198**, 39.
Stomach temperature
feeding in seabirds: WILSON, PÜTZ, GRÉMILLET, CULIK, KIERSPEL, REGEL, BOST, LAGE AND COOPER **198**, 1115.
Stomatogastric ganglion
distribution of cholecystokinin-like peptides in stomatogastric ganglion: CHRISTIE, BALDWIN, TURRIGIANO, GRAUBARD AND MARDER **198**, 263.
neurohormones in the crab *Cancer borealis*: CHRISTIE, SKIEBE AND MARDER **198**, 2431.
Strain
muscle power during fast-starts in short-horned sculpin: JOHNSTON, VAN LEEUWEN, DAVIES AND BEDDOW **198**, 1851.
Strength
functional morphology of pigeon feathers: ENNOS, HICKSON AND ROBERTS **198**, 1219.
Stress
cortisol and nitrogen metabolism in toadfish: HOPKINS, WOOD AND WALSH **198**, 2229.
feeding and nitrogen excretion in toadfish: WALSH AND MILLIGAN **198**, 1559.
muscle and tendon stresses during wallaby hopping: BIEWENER AND BAUDINETTE **198**, 1829.
pulsatile urea excretion in toadfish: WOOD, HOPKINS, HOGSTRAND AND WALSH **198**, 1729.
Stress hormones
trout blood viscosity: SØRENSEN AND WEBER **198**, 953.
Stretch receptor
control of abdominal posture in crayfish: McCARTHY AND MACMILLAN **198**, 2253.
Stretch-activated channel
pore properties of a stretch-activated K^+ channel in *Lymnaea stagnalis*: SMALL AND MORRIS **198**, 1919.
Stride
development of synchronous stepping: BLUMBERG-FELDMAN AND EILAM **198**, 363.
Stride frequency
integrating field and laboratory studies of locomotion: WEINSTEIN **198**, 989.
Stridulation
bioacoustics of a miniature cricket: DAMBACH AND GRAS **198**, 721.
neurotransmitters and stridulation in the grasshopper: OCKER, HEDWIG AND ELSNER **198**, 1701.
sound production in crickets: STEPHEN AND HARTLEY **198**, 2139.
Stroke volume
crustacean cardioactive peptides: McGAW, WILKENS, McMAHON AND AIRRIESS **198**, 2547.

oxygen consumption in birds during flight: BISHOP AND BUTLER **198**, 2153.
performance of a perfused crocodile heart: AXELSSON AND FRANKLIN **198**, 2509.

Strongylocentrotus franciscanus
energy use by developing marine animals: HOEGH-GULDBERG AND MANAHAN **198**, 19.

Strongylocentrotus purpuratus
energy use by developing marine animals: HOEGH-GULDBERG AND MANAHAN **198**, 19.

Sturnus vulgaris
intermittent flight in starlings: TOBALSKE **198**, 1259.

Subunit assembly
function of heterodimeric β-type ATPases: CHOW AND FORTE **198**, 1.

Swimmeret system
membrane currents in swimmeret motor neurones: CHRACHRI **198**, 1483.

Swimming
bass red muscle activity: JAYNE AND LAUDER **198**, 1575.
bass steady swimming: JAYNE AND LAUDER **198**, 585.
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.
copper and ammonia levels and swimming in trout: BEAUMONT, BUTLER AND TAYLOR **198**, 2213.
hydroplaning by ducklings: AIGELDINGER AND FISH **198**, 1567.
mechanical control of swimming speed in fish: McHENRY, PELL AND LONG **198**, 2293.
particle image velocimetry flow analysis on aquatic animals: STAMHUIS AND VIDELER **198**, 283.
peripheral modulatory neurones in *Clione limacina*: SATTERLIE **198**, 905.
serotonin immunoreactivity in *Clione limacina*: SATTERLIE, NOREKIAN, JORDAN AND KAZILEK **198**, 895.
the relay system in a jellyfish: MACKIE AND MEECH **198**, 2261.
tuning in to fish swimming waves: WARDLE, VIDELER AND ALTRINGHAM **198**, 1629.
within-myomere recruitment patterns: JAYNE AND LAUDER **198**, 805.

Swimming speed
cerebral modulatory neurones in *Clione limacina*: SATTERLIE AND NOREKIAN **198**, 917.

Sympathetic system
cardiac response to diving in muskrats: SIGNORE AND JONES **198**, 2307.

Symport
a novel proline, glycine: K^+ symporter: BADER, PARTHASARATHY AND HARVEY **198**, 2599.

Synapse
locust first ocellar synapse: SIMMONS **198**, 537.

Synaptic modulation
effects of FMRFamide-related peptides on crayfish: SKERRETT, PEAIRE, QUIGLEY AND MERCIER **198**, 109.

Synbranchidae
synbranchid sinus arrhythmia: GRAHAM, LAI, CHILLER AND ROBERTS **198**, 1455.

Synbranchus marmoratus
synbranchid sinus arrhythmia: GRAHAM, LAI, CHILLER AND ROBERTS **198**, 1455.

Tachycardia
synbranchid sinus arrhythmia: GRAHAM, LAI, CHILLER AND ROBERTS **198**, 1455.

Tachykinin
callitachykinins in blowfly: NÄSSEL, KIM AND LUNDQUIST **198**, 2527.

Taeniopoda eques
control of discontinuous ventilation in a grasshopper: HARRISON, HADLEY AND QUINLAN **198**, 1755.

Taeniopygia guttata
distribution of melatonin binding sites in avian brains: SCHNEIDER **198**, 1943.

Tammar wallaby
muscle and tendon stresses during wallaby hopping: BIEWENER AND BAUDINETTE **198**, 1829.

Taurine
basolateral taurine transport in *Mytilus* gill: NEUFELD AND WRIGHT **198**, 465.
taurine metabolism in mollusc larvae: WELBORN AND MANAHAN **198**, 1791.

Taurine channel
the osmolality-sensitive taurine channel and noradrenaline: THOROED, SOERGAARD, CRAGOE AND FUGELLI **198**, 311.

Telemetry
cardiac response to diving in muskrats: SIGNORE AND JONES **198**, 2307.

Teleost
calcium pumps in the teleost kidney: BIJVELDS, VAN DER HEIJDEN, FLIK, VERBOST, KOLAR AND WENDELAAR BONGA **198**, 1351.
enteric reflexes and nitric oxide in fish intestine: KARILA AND HOLMGREN **198**, 2405.
muscle contractile properties in sculpin: BEDDOW AND JOHNSTON **198**, 193.
swimming kinematics of sculpin: BEDDOW, VAN LEEUWEN AND JOHNSTON **198**, 203.

Temperature
acid–base status in the freshwater crayfish: WHITELY, NAYLOR AND TAYLOR **198**, 567.
creep of wallaby tendons: WANG AND KER **198**, 831.
effects of temperature on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 49.
indices of protein damage in *Mytilus trossulus*: HOFMANN AND SOMERO **198**, 1509.
malate dehydrogenases of barracudas: LIN AND SOMERO **198**, 551.
swimming kinematics of sculpin: BEDDOW, VAN LEEUWEN AND JOHNSTON **198**, 203.
temperature and fish development: JOHNSTON, VIEIRA AND ABERCROMBY **198**, 1389.
thermal adaptation of plaice cardiac pacemaker: HARPER, NEWTON AND WATT **198**, 137.
thermally polymorphic dragonflies: MARDEN **198**, 2095.

Temperature acclimation
membrane-specific responses to temperature in rainbow trout: CROCKETT AND HAZEL **198**, 1105.
muscle power during fast-starts in short-horned sculpin: JOHNSTON, VAN LEEUWEN, DAVIES AND BEDDOW **198**, 1851.

Tendon
muscle tendon compliance: JAMES, YOUNG AND ALTRINGHAM **198**, 503.

Tenodera sinensis
visual distance discrimination in praying mantis: POTESER AND KRAL **198**, 2127.

Tensor chordarum
calling and locomotor frog muscles: McLISTER, STEVENS AND BOGART **198**, 1527.

Tentacle contraction
central circuitry in a jellyfish: MACKIE AND MEECH **198**, 2271.

Testis
temperature regulation of dolphin testes: PABST, ROMMEL, McLELLAN, WILLIAMS AND ROWLES **198**, 221.

Tetramethylammonium
patency of goblet valves in insect midgut: MOFFETT, KOCH AND WOODS **198**, 2103.

Thapsigargin
calcium pumps in the teleost kidney: BIJVELDS, VAN DER HEIJDEN, FLIK, VERBOST, KOLAR AND WENDELAAR BONGA **198**, 1351.

Thermal acclimation
acclimation of burst escape performance in fish: JOHNSON AND BENNETT **198**, 2165.
Thermal input
feeding-related inputs to Retzius neurones in *Hirudo medicinalis*: GROOME, VAUGHAN AND LENT **198**, 1233.
Thermocline
effects of temperature on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 49.
Thermodynamics
adjustment of K' to varying pH and pMg: GOLDING, TEAGUE AND DOBSON **198**, 1775.
Thermogenesis
daily variations in response to noradrenaline: HAIM, McDEVITT AND SPEAKMAN **198**, 561.
hindleg energy balance during cold-exposure in the rat: ADÁN, ARDÉVOL, REMESAR, ALEMANY AND FERNANDEZ-LOPEZ **198**, 1243.
Thermoregulation
daily variations in response to noradrenaline: HAIM, McDEVITT AND SPEAKMAN **198**, 561.
dragonfly flight behaviour and heat production: MAY **198**, 2385.
temperature regulation in a dragonfly: MAY **198**, 2373.
temperature regulation of dolphin testes: PABST, ROMMEL, McLELLAN, WILLIAMS AND ROWLES **198**, 221.
Thermotolerance
thermotolerance and mitochondrial function in the blowfly: EL-WADAWI AND BOWLER **198**, 2413.
Thiocyanate
effects of thiocyanate on brown trout gills: MORGAN AND POTTS **198**, 1229.
Thoracic ganglia
adipokinetic hormone in the insect CNS: **198**, 1307.
Tilapia
allelic variation in fish myosin light chains: CROCKFORD, JOHNSTON AND McANDREW **198**, 2501.
Tilapia mossambicus
rheology of fish red blood cells: LECKLIN, NASH AND EGGINTON **198**, 1801.
Tip feathers
wing tip slots and drag in a gliding hawk: TUCKER **198**, 775.
TNRNFLRFamide
actions of lobster peptide F_1: WORDEN, KRAVITZ AND GOY **198**, 97.
Toad
control of ventilation in *Bufo paracnemis*: BRANCO AND GLASS **198**, 1417.
Tobacco hawkmoth
a novel proline, glycine: K^+ symporter: BADER, PARTHASARATHY AND HARVEY **198**, 2599.
cage size and flight speed in the tobacco hawkmoth: STEVENSON, CORBO, BACA AND QUANG **198**, 1665.
Tolerance
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
Tongue
feeding in the frog *Hemisus marmoratum*: RITTER AND NISHIKAWA **198**, 2025.
feeding kinematics of phyllomedusine treefrogs: GRAY AND NISHIKAWA **198**, 457.
Touching
tactile sensitivity of mystacial vibrissae in seals: DEHNHARDT AND KAMINSKI **198**, 2317.
Trabecular bone
longitudinal variation in bone mechanics: BONSER **198**, 209.
Trafficking
function of heterodimeric β-type ATPases: CHOW AND FORTE **198**, 1.
Transepithial Na^+ exchange
effect of dietary Na^+ load on rainbow trout: SMITH, EDDY AND TALBOT **198**, 2359.
Transient current
electrogenic norepinephrine transporters in humans: GALLI, DeFELICE, DUKE, MOORE AND BLAKELY **198**, 2197.
Transmitter
L-Dopa in sea anemones: HUDMAN AND McFARLANE **198**, 1045.
Transport
metabolite transport in eel erythrocytes: SOENGAS AND MOON **198**, 877.
taurine release from embryonic skate heart: GOLDSTEIN AND DAVIS-AMARAL **198**, 2635.
Transport kinetics
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
Transporter
electrogenic norepinephrine transporters in humans: GALLI, DeFELICE, DUKE, MOORE AND BLAKELY **198**, 2197.
Treefrog
calling and locomotor frog muscles: McLISTER, STEVENS AND BOGART **198**, 1527.
feeding kinematics of phyllomedusine treefrogs: GRAY AND NISHIKAWA **198**, 457.
Trematomus bernacchii
Na^+/K^+-ATPase in antarctic fish: GONZALEZ-CABRERA, DOWD, PEDIBHOTLA, ROSARIO, STANLEY-SAMUELSON AND PETZEL **198**, 2279.
Trematomus newnesi
Na^+/K^+-ATPase in antarctic fish: GONZALEZ-CABRERA, DOWD, PEDIBHOTLA, ROSARIO, STANLEY-SAMUELSON AND PETZEL **198**, 2279.
Triatomine
nitric oxide synthetase in *Rhodnius prolixus*: NUSSENZVEIG, BENTLEY AND RIBEIRO **198**, 1093.
Trimethylamines
urea and trimethylamines in *Xenopus* tissue: WRAY AND WILKIE **198**, 373.
Trinucleotide
hypoxia and organic phosphates in rainbow trout: VAL, LESSARD AND RANDALL **198**, 305.
Tripneustes gratilla
microtubule sliding in beating flagella: SHINGYOJI, YOSHIMURA, ESHEL, AKAHASHI AND GIBBONS **198**, 645.
Tritiated water
water and carbon dioxide loss from the cockroach: CROGHAN, NOBLE-NESBITT AND APPEL **198**, 227.
water and carbon dioxide loss from the cockroach: NOBLE-NESBITT, APPEL AND CROGHAN **198**, 235.
Trout
carbonic anhydrase infusion during hypoxia in fish: LESSARD, VAL, AOTA AND RANDALL **198**, 31.
induction of urea cycle enzymes in larval trout: WRIGHT, FELSKIE AND ANDERSON **198**, 127.
ion regulation in rainbow trout: POSTLETHWAITE AND McDONALD **198**, 295.
rheology of fish red blood cells: LECKLIN, NASH AND EGGINTON **198**, 1801.
Turning movement
control of pitch and roll in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 665.
Tursiops truncatus
temperature regulation of dolphin testes: PABST, ROMMEL, McLELLAN, WILLIAMS AND ROWLES **198**, 221.
Turtle
NMDA receptor modulation by adenosine: BUCK AND BICKLER **198**, 1621.
Tymbal
function of the cicada tymbal: YOUNG AND BENNET-CLARK **198**, 1001.

Tympanal membrane
ventilation and hearing in the locust: MEYER AND HEDWIG **198**, 1327.

Ubiquitin
indices of protein damage in *Mytilus trossulus*: HOFMANN AND SOMERO **198**, 1509.
recovery of ubiquitination in *Artemia franciscana*: ANCHORDOGUY AND HAND **198**, 1299.
Ultrasonic transmitter
effects of salinity on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 61.
effects of temperature on free-swimming cod: CLAIREAUX, WEBBER, KERR AND BOUTILIER **198**, 49.
Ultrasound avoidance
acoustic startle in scarab beetles: FORREST, FARRIS AND HOY **198**, 2593.
Ultrastructure
nitric oxide synthetase in *Rhodnius prolixus*: NUSSENZVEIG, BENTLEY AND RIBEIRO **198**, 1093.
Ultraviolet vision
spectral sensitivity of hawkmoth feeding: CUTLER, BENNETT, STEVENSON AND WHITE **198**, 1909.
Undulation
mechanical control of swimming speed in fish: McHENRY, PELL AND LONG **198**, 2293.
Urea
ammonia and urea metabolism in an elasmobranch: WOOD, PÄRT AND WRIGHT **198**, 1545.
cortisol and nitrogen metabolism in toadfish: HOPKINS, WOOD AND WALSH **198**, 2229.
induction of urea cycle enzymes in larval trout: WRIGHT, FELSKIE AND ANDERSON **198**, 127.
nitrogen excretion: WRIGHT **198**, 273.
pulsatile urea excretion in toadfish: WOOD, HOPKINS, HOGSTRAND AND WALSH **198**, 1729.
urea and trimethylamines in *Xenopus* tissue: WRAY AND WILKIE **198**, 373.
Ureogenesis
enzyme compartmentation in batrachoidid fishes: ANDERSON AND WALSH **198**, 755.
feeding and nitrogen excretion in toadfish: WALSH AND MILLIGAN **198**, 1559.
Ureotelism
cortisol and nitrogen metabolism in toadfish: HOPKINS, WOOD AND WALSH **198**, 2229.
pulsatile urea excretion in toadfish: WOOD, HOPKINS, HOGSTRAND AND WALSH **198**, 1729.
Uric acid
nitrogen excretion: WRIGHT **198**, 273.
Urine
pulsatile urea excretion in toadfish: WOOD, HOPKINS, HOGSTRAND AND WALSH **198**, 1729.
Urticina felina
L-Dopa in sea anemones: HUDMAN AND McFARLANE **198**, 1045.

Vacuolar-type H^+-ATPase
effects of bafilomycinon A_1 sheep macrophage pH: HEMING, TRABER, HINDER AND BIDANI **198**, 1711.
Vagus
parasympathetic influence in hibernation: HARRIS AND MILSOM **198**, 931.
Vane
functional morphology of pigeon feathers: ENNOS, HICKSON AND ROBERTS **198**, 1219.
Varanus exanthematicus
pulmonary gas exchange in the monitor lizard: HOPKINS, HICKS, COOPER AND POWELL **198**, 1783.
Varanus salvator
epaxial muscle function in a lizard: RITTER **198**, 2477.

Vasodilator
Cimex lectularius nitrophorin: VALENZUELA, WALKER AND RIBEIRO **198**, 1519.
V-ATPase
proteolipid localization in *Heliothesis virescens*: PIETRANTONIO AND GILL **198**, 2609.
H^+-ATPase in crab gills: ONKEN AND PÜTZENLECHNER **198**, 767.
Vector flow field
particle image velocimetry flow analysis on aquatic animals: STAMHUIS AND VIDELER **198**, 283.
Velocity gradients
particle image velocimetry flow analysis on aquatic animals: STAMHUIS AND VIDELER **198**, 283.
Ventilation
comparative gas exchange in *Messor*: LIGHTON AND BERRIGAN **198**, 521.
gas transfer in softwater-acclimated trout: GRECO, GILMOUR, FENWICK AND PERRY **198**, 2557.
pulmonary gas exchange in the monitor lizard: HOPKINS, HICKS, COOPER AND POWELL **198**, 1783.
ventilation and hearing in the locust: MEYER AND HEDWIG **198**, 1327.
ventilation and heartbeat in *Octopus vulgaris*: WELLS AND WELLS **198**, 1717.
Ventilation–perfusion heterogeneity
pulmonary gas exchange in the monitor lizard: HOPKINS, HICKS, COOPER AND POWELL **198**, 1783.
Ventilatory tachycardia
parasympathetic influence in hibernation: HARRIS AND MILSOM **198**, 931.
Vestibular system
control of pitch and roll in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 665.
Vibrissae
tactile sensitivity of mystacial vibrissae in seals: DEHNHARDT AND KAMINSKI **198**, 2317.
Vickers microhardness
longitudinal variation in bone mechanics: BONSER **198**, 209.
Viscoelastic behaviour
the Young's modulus of feather keratin: BONSER AND PURSLOW **198**, 1029.
Vision
pupil adjustments in the common backswimmer: RO AND NILSSON **198**, 71.
spectral sensitivity of hawkmoth feeding: CUTLER, BENNETT, STEVENSON AND WHITE **198**, 1909.
visual distance discrimination in praying mantis: POTESER AND KRAL **198**, 2127.
visual influence on spatial orientation in lampreys: ULLÉN, DELIAGINA, ORLOVSKY AND GRILLNER **198**, 675.
visual targeting in flea-beetles: BRACKENBURY AND WANG **198**, 1931.
Visual system
distribution of melatonin binding sites in avian brains: SCHNEIDER **198**, 1943.
Vitellogenin
matrotrophic viviparity in rockfish: MACFARLANE AND BOWERS **198**, 1197.
$\dot{V}_{O_2max}$
heart mitochondrial properties and $\dot{V}_{O_2max}$: CONLEY, CHRISTIAN, HOPPELER AND WEIBEL **198**, 739.
Vocalization
respiration and vocalization in bats: LANCASTER, HENSON AND KEATING **198**, 175.
Voltage-clamp
electromotor coupling of cilia in *Didinium nasutum*: PERNBERG AND MACHEMER **198**, 2537.
membrane currents in swimmeret motor neurones: CHRACHRI **198**, 1483.

Voltage-gated current
Na^+ and Ca^{2+} currents in *Aplysia californica*: FIEBER **198**, 2337.
Volume
muscle length and work from frog heart: SYME AND JOSEPHSON **198**, 2221.
Volume regulation
K^+ and amino acid transport in carp red blood cells: JENSEN **198**, 155.
Vortex diffusion
wing tip slots and drag in a gliding hawk: TUCKER **198**, 775.
Vortex spreading
wing tip slots and drag in a gliding hawk: TUCKER **198**, 775.

Walking
development of synchronous stepping: BLUMBERG-FELDMAN AND EILAM **198**, 363.
elephant energetics: LANGMAN, ROBERTS, BLACK, MALOIY, HEGLUND, WEBER, KRAM AND TAYLOR **198**, 629.
locust walking motor patterns: DUCH AND PFLÜGER **198**, 1963.
rhythmicity in insect thoracic nerve cord: BÜSCHGES, SCHMITZ AND BÄSSLER **198**, 435.
Wallaby
creep of wallaby tendons: WANG AND KER **198**, 831.
fatigue of wallaby tendons: WANG, KER AND ALEXANDER **198**, 847.
Warm-up
development of synchronous stepping: BLUMBERG-FELDMAN AND EILAM **198**, 363.
Water balance
spider excretion: BUTT AND TAYLOR **198**, 1137.
Water loss
water and carbon dioxide loss from the cockroach: CROGHAN, NOBLE-NESBITT AND APPEL **198**, 227.
water and carbon dioxide loss from the cockroach: NOBLE-NESBITT, APPEL AND CROGHAN **198**, 235.
Water monitor
epaxial muscle function in a lizard: RITTER **198**, 2477.
Water permeability
water and carbon dioxide loss from the cockroach: NOBLE-NESBITT, APPEL AND CROGHAN **198**, 235.
Wave drag
hydroplaning by ducklings: AIGELDINGER AND FISH **198**, 1567.
Waves
perception of wave direction by turtles: LOHMANN, SWARTZ AND LOHMANN **198**, 1079.
Whelk
structure and physical properties of invertebrate arteries: DAVISON, WRIGHT AND DEMONT **198**, 2185.
Whole-cell voltage-clamp
electrogenic norepinephrine transporters in humans: GALLI, DeFELICE, DUKE, MOORE AND BLAKELY **198**, 2197.
Wind orientation
orientation to air current by walking beetles: BÖHM **198**, 1995.
Wingbeat
phase and lift in flying locust pairs: CAMHI, SUMBRE AND WENDLER **198**, 1051.
Winglets
wing tip slots and drag in a gliding hawk: TUCKER **198**, 775.
Winkler assay
energy use by developing marine animals: HOEGH-GULDBERG AND MANAHAN **198**, 19.
Wistar rat
hindleg energy balance during cold-exposure in the rat: ADÁN, ARDÉVOL, REMESAR, ALEMANY AND FERNANDEZ-LOPEZ **198**, 1243.
Wood mouse
daily variations in response to noradrenaline: HAIM, McDEVITT AND SPEAKMAN **198**, 561.
Work
mechanical work in locomotion: WILLEMS, CAVAGNA AND HEGLUND **198**, 379.
muscle length and work from frog heart: SYME AND JOSEPHSON **198**, 2221.
papillary muscle work production: LAYLAND, YOUNG AND ALTRINGHAM **198**, 2491.
Work loop
mechanics of mammalian muscle: JAMES, ALTRINGHAM AND GOLDSPINK **198**, 491.
muscle tendon compliance: JAMES, YOUNG AND ALTRINGHAM **198**, 503.
papillary muscle mechanics: LAYLAND, YOUNG AND ALTRINGHAM **198**, 1035.
papillary muscle work production: LAYLAND, YOUNG AND ALTRINGHAM **198**, 2491.

X-ray microanalysis
effects of thiocyanate on brown trout gills: MORGAN AND POTTS **198**, 1229.
Xenopus laevis
oxygen consumption regulation in larval *Xenopus*: HASTINGS AND BURGGREN **198**, 2465.
urea and trimethylamines in *Xenopus* tissue: WRAY AND WILKIE **198**, 373.

Yellowtail rockfish
matrotrophic viviparity in rockfish: MACFARLANE AND BOWERS **198**, 1197.
Yolk proteins
matrotrophic viviparity in rockfish: MACFARLANE AND BOWERS **198**, 1197.
Young's modulus
the Young's modulus of feather keratin: BONSER AND PURSLOW **198**, 1029.

Zebra finch
distribution of melatonin binding sites in avian brains: SCHNEIDER **198**, 1943.
Zebra mussel
zebra mussel potassium transport: WILCOX AND DIETZ **198**, 861.
Zn^{2+}
adaptation of trout to waterborne zinc: HOGSTRAND, REID AND WOOD **198**, 337.
ion transport by echinoderm gastrointestinal epithelium: ZHUANG, DUERR AND AHEARN **198**, 1207.
